

Course Bulletin

100113	Internal Conflicts and War in the 21st Century			
Subject: DHP	Catalog Nbr: P243	2023 FALL	Primary	Richard Shultz richard.shultz@tufts.edu
<p>Instability, conflict, and irregular warfare within states due to burgeoning challenges posed by armed groups have proliferated in number and importance since the Cold War ended. With the spread of globalization, the technological shrinking of the world and interdependence of states and regions, these internal/transnational conflicts have taken new dimensions with far-reaching consequences. This seminar examines their patterns and evolution. Topics include examination of: the global strategic environment which armed groups exploit; the causes of internal/transnational conflict; types of armed groups, their operational patterns and strategies; and six case studies.</p>				

100152	Modern Terrorism and Counterterrorism			
Subject: DHP	Catalog Nbr: P244	2024 SPRG	Primary	James Forest James.Forest@tufts.edu
<p>This course examines the nature of terrorism; the spectrum of terrorist motivations, strategies, and operations; the socio-political, economic and other factors that can enable terrorist group activities; the unique threat of WMD terrorism; and the internal vulnerabilities of terrorist organizations. Students will examine current and classic research on terrorism, and explore many of the puzzles that remain unanswered. Finally, the course will analyze these critical issues within the context of policies and strategies for responding to the threat of terrorism with increasing sophistication and success.</p>				

100526	Environmental Problem Solving			
Subject: DHP	Catalog Nbr: P250	2024 FALL	Primary	Melissa McCracken Melissa.Mccracken@tufts.edu
<p>Familiarizes students with global environmental problems – and solutions – facing the international community today. Global environmental problems can be thought of as a problem that has entered into the attention of governments, scientific communities, non-governmental organizations, and the public. Often these are complex, multi-faceted issues that are significant enough to be addressed by the global international community. While many of these issues can exist at multiple scales, our focus in this class will be on the international scale. The course is divided into two main sections: Foundations for Environmental Problem Solving and Environmental Problems and Solutions. The first section considers what environmental problems are, as well as the policy and quantitative tools used for addressing various environmental problems. Once there is a common foundation for discussing environmental problems, the course uses the framework of the Sustainable Development Goals to consider several global environmental problems. Through these discussions, we will explore the significant aspects of an environmental problem, some of its dominant solutions, as well as tools and skills that can contribute to solving the problem. This course aims to cover a breadth of environmental problems and policies to serve as a foundation for further exploration of these topics in other Fletcher courses.</p>				

Course Bulletin

100674	Sustainable Development Diplomacy			
Subject: DHP	Catalog Nbr: P253			
<p>Sustainable development diplomacy course examines how to integrate economic, environmental and social equity goals in foreign policy-making. It discusses the emergence of sustainable development as a concept and international institutions and negotiation processes that facilitate its implementation. Focusing on climate, water and forest diplomacy, we address a range of themes including UN climate negotiations, climate finance, environmental refugees, public-private cooperation, and water governance. The course also analyzes China and BRICS-led approaches to sustainable development and their new banks. It offers insights from practice, trainings in mutual gains negotiations and complex UN multiparty negotiations. Students develop expertise in policy analysis and planning, strategic thinking and feedback management.</p>				

100762	Climate Change Policy and Law			
Subject: DHP	Catalog Nbr: P254			
	2024 SPRG	Primary	Rishikesh Bhandary	Rishikesh.Bhandary@tufts.edu
	2024 SPRG	Primary	Travis Franck	Travis.Franck@tufts.edu
<p>This course provides an overview of the scientific, economic, political and ethical dimensions of the challenge of global climate change. It then focuses on developing a detailed understanding of whether and how the international "climate change regime" (comprising the UN Framework Convention on Climate Change, the Paris Agreement, and related instruments) has effectively and fairly addressed the challenge of reducing global greenhouse gas emissions. Students will develop an in-depth understanding of how the international climate change regime has put in place principles, goals and commitments to cut global emissions, as well as institutions, market and financial instruments, and transparency and accountability mechanisms to keep governments on track to meet their obligations. By participating in simulated negotiations on key elements of the Paris Agreement, students will gain a deeper appreciation of the geopolitics and the processes that have shaped the climate change regime. Finally, a series of case studies will assess how different national and regional jurisdictions have been implementing the international regime through their domestic law and policy, and assess whether these differences in approach are likely to lead to more cooperation or conflict in areas such as trade and investment policy.</p>				

100836	International Energy Policy			
Subject: DHP	Catalog Nbr: P255			
	2024 SPRG	Primary	Sarah Emerson	Sarah.Emerson@tufts.edu
<p>Energy affects every dimension of human society and it is crucial for economic prosperity. Energy is at the heart of economic development strategies, national security challenges, and intractable environmental problems. This review course maps how challenges and opportunities differ among countries, exploring basic differences between industrialized and developing countries. The policies of major energy producers and consumers are compared. The focus is on oil and gas, but renewable energy sources are also considered. Topics include: energy and the world economy, the geopolitics of oil and gas, energy markets, energy policy and economic development, climate change, technological change and the future of energy.</p>

100890	Innovation for Sustainable Prosperity				
	Subject:	Catalog Nbr:			
	DHP	P256			
	2024 FALL	Primary	Kelly Gallagher		Kelly.Gallagher@tufts.edu
<p>Innovation is the main source of economic growth and improvements in productivity, is a key lever for catalyzing development, reducing environmental harm, improving human health and well-being, and enhances national security. This seminar explores the nature of technology, theories and “stylized facts” about innovation processes, and how to think about innovation systems. A major focus is policy for innovation. Topics include national innovation systems, management of risks, global change, actors and institutions, social innovation, private vs. public, education, cross-country comparisons, competitiveness, technology transfer and diffusion, learning and “catch-up”, IPR’s, and leapfrogging. Case studies are used to understand each topic.</p>

101036	Islam and the West				
	Subject:	Catalog Nbr:			
	DHP	P260			
	2023 FALL	Primary	Ayesha Jalal		ayesha.jalal@tufts.edu
<p>(Cross-listed w/HIST 147) Going beyond the simplistic notion of a great civilization divide, this course puts the categories ‘Islam’ and ‘the West’ under the spotlight of historical and comparative analysis. After providing some essential background, the course concentrates on the colonial and postcolonial encounter between Muslim and Western societies and polities with special, but not exclusive reference to the South Asian subcontinent. Organized along historical and thematic lines, the course focuses on the overlapping domains of culture and politics, thought and practice, to elucidate aspects of dialogue, tension, and confrontation between the worlds of Islam and the West.</p>					

101088	Contemporary South Asia				
	Subject:	Catalog Nbr:			
	DHP	P262			
	2024 FALL	Primary	Ayesha Jalal		ayesha.jalal@tufts.edu
<p>(Cross-listed w/ HIST 145) Organized along both historical and thematic lines, the course surveys politics, economy, and society in late colonial India and offers a comparative historical analysis of state structures and political processes in post-colonial South Asia, particularly India, Pakistan, and Bangladesh. Among the themes considered are the reasons for the partition of 1947, the nature of the colonial legacy, the origins of</p>

101233	The Islamic World			
Subject:	Catalog Nbr:			
DHP	P266			
2023 FALL	Primary	Ibrahim Warde	Ibrahim.Warde@tufts.edu	
<p>This course aims to explain those aspects of the Islamic world—history, politics, economics, society, legal systems, business practices—that are necessary to conduct business or political negotiations in a number of countries. The course will discuss issues of political economy and business of the Islamic world, with a special focus on Islamic networks, business culture, oil, and issues of globalization and governance. Case studies will focus on specific companies and institutions. From a geographic standpoint, the course will focus primarily on Middle Eastern and Persian Gulf countries, although it will also include countries such as Malaysia and Pakistan.</p>

101451	Politics of the Korean Peninsula: Foreign and Inter-Korean Relations				
	Subject:	Catalog Nbr:			
	DHP	P274			
<p>An examination of Korea's modern "evolution" as a state and society. Emphasis on Korea's modern political history, from the origins and theory of statecraft in traditional Korea to the major geopolitical issues of the present day. Topics include Korea's relations with the great powers of the North Pacific and the primacy of international relations in the Korean world: from imperialism and Japanese colonialism, partition of the Korean peninsula and the establishment of two separate Koreas, Cold War politics and the Korean War, economic development and political freedom, to inter-Korean relations.</p>

103448	International Humanitarian Response			
Subject: DHP	Catalog Nbr: D213			
2024 SPRG	Primary	Paul Howe		Paul.Howe@tufts.edu
<p>Taught jointly by faculty from the Harvard Humanitarian Initiative and the Feinstein International Center, this course offers insight into the complex issues involved in humanitarian work and provides training in the practical field skills needed to engage in effective responses. Key topics include: humanitarian community and history; sphere standards; rapid assessments; humanitarian clusters: protection; shelter; camp coordination and management; food security; early recovery; water, sanitation, and hygiene; health; nutrition; education; logistics; and emergency telecommunications; program design, budgeting, and monitoring and evaluation; field security; civil-military relations; media skills; mental health and responder resilience; localization and diversity; ethics and accountability. Over the semester, the course will also explore questions about how the current model of humanitarianism needs to evolve in a changing world. It culminates with a mandatory, three-day intensive field simulation. The fee to cover camping gear, food, and other equipment is still to be determined, but in past years has been in the range of USD 300.</p>				

103575	Processes of International Negotiation			
Subject: DHP	Catalog Nbr: D220			
2024 FALL	Primary	Eileen Babbitt		eileen.babbitt@tufts.edu
2024 FALL	Primary	Diana Chigas		diana.chigas@tufts.edu
2024 SUMR	Primary	Elizabeth McClintock		Elizabeth.McClintock@tufts.edu
2024 SUMR	Primary	Naseem Khuri		Naseem.Khuri@tufts.edu
<p>This course explores the processes, rather than specific substantive issues, of international negotiation. Using exercises and simulations, it examines the nature of conflict in the international arena; the special characteristics of negotiation in the international setting; negotiation dynamics; the roles of culture, power, and psychological processes; and the strategy and tactics of international negotiation. Special problems of multilateral negotiation, and the follow-up and implementation of negotiated agreements are also examined.</p>				

103624	International Mediation			
Subject: DHP	Catalog Nbr: D221			
<p>Mediation is one of many international intervention approaches to prevent, resolve, or recover from political violence. It is practiced by individuals, international and transnational organizations, small and large states, and in bilateral or multilateral contexts. This seminar focuses on the ways in which mediators in the</p>				

Course Bulletin

international arena carry out their third-party roles. Topics to be covered include: gaining entry; developing a strategy; gaining and using leverage; and managing complexity. The seminar relies on detailed, extensive case study analysis to understand how international mediators operate in real-time, complex environments. Open to students who have completed D220 or equivalent.

103690	Theories of Conflict and Conflict Resolution			
Subject:	Catalog Nbr:			
DHP	D223			
2024 FALL	Primary	Nadim Rouhana	Nadim.Rouhana@tufts.edu	
<p>Offers an overview of theories of conflict and approaches to conflict resolution. It surveys theories of conflict that originate in various disciplines including sociology, political science, international relations, social psychology, and law. It presents multiple levels of analysis to explain both inter-state and intra-state conflicts. It also reviews approaches that seek to settle and to transform the relationships of disputing parties. This course will provide an in-depth and a critical look at leading theories of conflict and conflict resolution and will explore some of the major theoretical debates in the field.</p>				

103798	Conflict Resolution Practice			
Subject:	Catalog Nbr:			
DHP	D225			
2023 FALL	Primary	Eileen Babbitt	eileen.babbitt@tufts.edu	
<p>Focuses on three crucial aspects of conflict resolution practice: conducting a conflict assessment; facilitating discussions and consensus building processes in the context of intergroup conflict; and designing and conducting effective dialogues between contending identity groups. The seminar will emphasize the applied aspects of these processes and will use demonstrations, films, exercises, and guest lecturers. It will culminate with organizing and conducting a problem-solving workshop under the leadership of the instructor. Open to students who have completed D223.</p>				

103941	Protracted Social Conflict: Dynamics, Major Issues and Possible Consequences			
Subject:	Catalog Nbr:			
DHP	D228M			
<p>Distinguishing protracted social conflict from other types of international and ethnic conflicts, we will review contending frameworks that examine sources of social conflict and its political, economic, societal, and psychological dynamics. In particular, we will examine: the role of social identity; culture and the conditions under which religion plays constructive and destructive roles in conflict escalation and de-escalation; the dynamics of escalation, stalemate, and de-escalation; the political and cultural basis of genocide, mass killings, and ethnic terrorism; and the psychology of perpetrators and bystanders. Some conflict resolution approaches that deal with protracted social conflict will be discussed.</p>				

103990	Humanitarian Action in Complex Emergencies			
Subject:	Catalog Nbr:			

Course Bulletin

DHP	D230			
2024 FALL	Primary	Daniel Maxwell		Daniel.Maxwell@tufts.edu
<p>This multi-disciplinary course covers a broad range of subjects, including the evolution of the international humanitarian system, the political economy of conflicts and humanitarian aid, analytical and normative frameworks for humanitarian action, and a variety of programmatic topics. By the end of this course you will be aware of the historical, legal, social, political and moral context of both the causes and responses to complex humanitarian emergencies, and have a working knowledge of the principles and standards for performing humanitarian response to complex humanitarian emergencies. This course is cross-listed with the Friedman School of Nutrition Science and Policy.</p>				

104022	Gender, Culture and Conflict in Complex Humanitarian Emergencies			
Subject:	Catalog Nbr:			
DHP	D232			
2023 FALL	Primary	Elizabeth Stites	elizabeth.stites@tufts.edu	
2024 FALL	Primary	Dyan Mazurana	Dyan.Mazurana@tufts.edu	
<p>This course examines situations of armed conflict, civilian experiences of these crises, and the international and national humanitarian and military responses to these situations from a gender and intersectional perspective and highlights the policy and program implications that this perspective presents. Topics covered include gender and intersectional analyses of current trends in armed conflict and terrorism, and of the links among war economies, globalization and armed conflict; the manipulation of gender roles to fuel war and violence; gender and livelihoods in the context of crises; masculinities in conflict; sexual and gender-based violations; women's rights in international humanitarian and human rights law during armed conflict; gender and humanitarian response; gender and armed opposition groups; and gender peacebuilding. Case studies are drawn from recent and current armed conflicts worldwide. This course is cross-listed with the Friedman School of Nutrition Science and Policy.</p>				

104200	Nutrition in Complex Emergencies: Policies, Practice and Decision-making			
Subject:	Catalog Nbr:			
DHP	D237			
2024 SPRG	Primary	Erin Boyd	Erin.Boyd@tufts.edu	
<p>The course will introduce students to the concept of Public Nutrition and examine its central role in complex emergencies. The implications of the Public Nutrition approach for assessment and analysis, policy development, program design and implementation will be examined. This will provide an understanding of; the causes and nutritional outcomes of humanitarian crises and complex emergencies (malnutrition, morbidity and mortality). The course has a field oriented focus based on a wide range of recent and past food and nutrition crises ranging. The course reviews international response strategies, nutrition programmes and relevant policies; and incorporates relevant applied research. The course provides the opportunity for active class participation drawing upon the actual work experience of the students and applying a range of up-to-date case-study materials based on current humanitarian crises. This course is cross-listed with the Friedman School of Nutrition Science and Policy.</p>				

104373	Forced Migration			
---------------	-------------------------	--	--	--

Course Bulletin

Subject: DHP	Catalog Nbr: D239	2024 FALL	Primary	Karen Jacobsen	karen.jacobsen@tufts.edu
<p>The course is an exploration of how forced displacement, which includes trafficking, and other forms of involuntary migration, relates to the broader spectrum of migration stemming from persecution, development, natural disaster, environmental change, and impoverishment. We begin with an analysis of the root causes of migration, then review the international legal framework, and analyze asylum and refugee policies in different national contexts. The course will explore a range of critical issues including current controversies about climate change and migration, urbanization, trafficking, and new approaches to humanitarian assistance and protection. The course focuses on refugee and IDP movements, but adopts a wider perspective so as to address all kinds of global movements.</p>					

104672	The Arabs and their Neighbors				
Subject: DHP	Catalog Nbr: D263	2023 FALL	Primary	Leila Fawaz	leila.fawaz@tufts.edu
		2024 FALL	Primary	Ibrahim Warde	Ibrahim.Warde@tufts.edu
<p>(Cross-listed as HIST 207) With a particular focus on the Arab world and the Levant, this course examines the evolution of nation-states in the Middle East from colonial rule to the present. Themes addressed include the rise of nationalism and pan-Arabism, ideologies of internal unity and regional tensions, Islam as a political force, globalization, reform and radicalism, the current Arab revolts, and the search for new alternatives.</p>					

104937	International Relations of the U.S. and East Asia: 1945 to the Present				
Subject: DHP	Catalog Nbr: D271				
<p>An examination of the international relations of the United States and East Asia since the end of World War II, principally U.S. interactions with China, Japan, and Korea, and secondarily, with Vietnam and Southeast Asia. Focus on fundamental concepts and realities of international politics governing interactions between the U.S. and East Asian nations, as well as the major geopolitical issues of the day. Study of the continuing patterns of interaction among the U.S. and East Asian states—the dynamics of wars, ideologies, political, economic, and cultural issues.</p>					

105112	U.S.-European Relations Since the Fall of the Berlin Wall				
Subject: DHP	Catalog Nbr: D283	2024 SPRG	Primary	Klaus Scharioth	Klaus.Scharioth@tufts.edu
<p>Examines U.S.-European relations since a peaceful revolution brought down the Berlin Wall in November 1989. The seminar looks at various common challenges in the period thereafter and how they were dealt with, both from a U.S. and a European perspective: the unification of Germany, the opening of NATO to new members, NATO/Russia, Russia/Ukraine, 9/11 and the threat of violent extremism, Afghanistan, Iraq, Iran and nuclear non-proliferation and disarmament, the dilemma of security vs privacy, climate, and newer issues</p>					

Course Bulletin

such as trade, China policy, and extraterritorial sanctions. The emphasis is on practical skills rather than theory. Students will practice writing short memos for political leaders and giving short oral presentations.

105489	Classics of International Relations
Subject: DHP	Catalog Nbr: H204
<p>Most graduate courses in international relations focus on “cutting edge” research. Without a working knowledge of Thucydides, Kant, or Schelling, citizens and policymakers are unable to place new theoretical propositions into a historical context. This course surveys the history of international relations theory through a close reading of 10-15 classic works in the field. Among the questions that will be addressed: how far has IR theory developed since Thucydides? How closely do theories of international relations mirror the era in which they were written? In what ways are these widely cited works simplified or misstated in the current era?</p>	

105647	War and Society in the Middle East in Historical Perspective
Subject: DHP	Catalog Nbr: H261
<p>(Cross-listed w/ HIST 209) A century ago, World War I and its settlement shaped the modern Middle East. The end of the Ottoman Empire and the emergence of successor states in search of internal ideology and regional influence have characterized the region today. This course addresses the broader topic of struggle and survival during cataclysmic events, such as a world war, with reference to the history of the student’s region of interest. It is a research-based class in which students will learn how to better research conflict and how to develop an approach to the study of conflict given the many perspectives of those affected by it. The course will also discuss the ways in which conflict can transform a region.</p>	

106022	Comparative Politics
Subject: DHP	Catalog Nbr: P201
2024 FALL	Primary Katrina Burgess Katrina.Burgess@tufts.edu
<p>This course is designed to introduce students to the study of comparative politics. The first two weeks of the course will familiarize students with the type of questions that comparative political scientists tackle and the methodological tools that they employ. This week will also concentrate on issues such as concept formation and theory development. The rest of the course will be structured around key research areas in the field of comparative politics such as state formation, nationalism, constitutional structure of states, origins and persistence of political regimes, emergence of political parties and voting, religion and politics, political culture, and political violence.</p>	

106107	Analytic Frameworks for International Public Policy Decisions
Subject: DHP	Catalog Nbr: P203
2024 FALL	Primary Carolyn Friedman Carolyn.Gideon@tufts.edu

Course Bulletin

Introduction to the basic tools of policy analysis and decision making, providing students with analytic skills to make policy decisions in many types of organizations. The course includes an introduction to public policy objectives, decision making, and the role of analysis. Students then learn powerful analytic decision-making techniques, including decision trees, Bayes theorem, utility theory, prospect theory, game theory, benefit-cost analysis, and tipping models. Case studies are used to learn the policy analysis tools while applying them to real world policy problems. Cases come from developed and developing countries, and cover many different policy fields. No background in economics or statistics is required.

106193	National Security Decision Making: Theory and Practice			
Subject: DHP	Catalog Nbr: P205			
2024 FALL	Primary	Abigail Linnington	Abigail.Linnington@tufts.edu	
<p>Examines national security decision-making from both a theoretical perspective and from its execution in practice. The class focuses on how national security decisions are made rather than on the theories of international relations or the substantive content of national security or foreign policies. It begins with the history of the U.S. National Security Council, and an overview of the current structures, actors, and processes in the U.S. system of national security decision-making. Next, the course examines theoretical models of decision-making including cognitive biases, organizational processes, bureaucratic politics, how senior leaders often use history and analogies in their decisions, and the influence of domestic politics. The course also explores the roles of the Departments of State and Defense, the intelligence community, the influence of Congress and the media as well as the prospects for national security reform. Students are asked to analyze historical case studies and current events considering the broad themes covered throughout the semester. Emphasis throughout the course is placed on the national security decision-making system of the United States, however, participants are strongly encouraged to examine the systems and actors of other states and multinational organizations.</p>				

106314	GIS for International Applications			
Subject: DHP	Catalog Nbr: P207			
2024 FALL	Primary	Marcia Moreno-Baez	marcia.morenobaez@tufts.edu	
<p>This course introduces students to geographic information systems (GIS) with a specific focus on their applications in various international settings and topics. The primary objective of this course is to equip students to explore geospatial technology and related tools, including ESRI ArcGIS Pro, for data creation, management, analysis, and visualization. Throughout the curriculum, students will delve into the dynamic field of GIS through a combination of assignments and interactive discussions, which are organized into modules. This approach enables students to develop an understanding of how geospatial technologies can be utilized across different fields and disciplines. The course also includes a practical component, where students will work on a final project with guided activities. By the end of this course, students will have acquired a relevant skill set that can be readily applied in a wide range of professional contexts. It is worth noting that this course is specifically designed to fulfill the quantitative analysis requirements for both the Master of Arts in Law and Diplomacy (MALD) and the Master of Global Affairs (MGA) programs. Enrollment is limited to 24 students. For more information, visit: https://bit.ly/49cNV1A</p>				

Course Bulletin

107332	Global Political Economy			
Subject: DHP	Catalog Nbr: P217			
2024 FALL	Primary	Daniel Drezner	Daniel.Drezner@tufts.edu	
<p>What determines the direction, magnitude, governance, and fluctuation of international economic exchange? This course surveys the theories and issue areas of the global political economy, both in the current day and in the past. Different analytical models are presented to explain the variations in economic exchange over time. The issue areas that will be examined include: world trade, monetary orders, global finance, and foreign investment. Current topics that will be covered include: the effects of the 2007-2008 financial crisis, the rise of the BRIC economies, the future of the dollar, and the future of global economic governance.</p>				

107470	Political Economy of Development			
Subject: DHP	Catalog Nbr: P219			
2024 SPRG	Primary	Katrina Burgess	Katrina.Burgess@tufts.edu	
<p>This class offers a survey of some of the key debates and issues in the political economy of development. First, we examine alternative approaches to development and how they have informed policies in developing countries since the 1950s. Second, we compare different patterns of interaction among the state, political parties, interest groups, and civil society and examine how they have affected development outcomes. Third, we address current topics such as the rise of China and India, new approaches to poverty alleviation, and the impact of global financial crises on developing countries.</p>				

107736	Development Aid in Policy and Practice			
Subject: DHP	Catalog Nbr: P222			
2024 FALL	Primary	Elke Jahns-Harms	Elke.Jahns@tufts.edu	
<p>This course provides an overview of the key concepts, tools, challenges and trade-offs in the field of development aid. Students will gain an understanding of the theoretical and operational underpinnings of the current development aid system and its effects on development organizations, donors, aid workers, and the people the aid is ultimately intended to help. Students will not gain technical knowledge in education, health, infrastructure, etc., but they will learn about cross-cutting issues and approaches that appear in all fields of development cooperation: technical assistance, capacity building, participation, and conditionality among others.</p>				

108411	International Communication			
Subject: DHP	Catalog Nbr: P231			
2024 FALL	Primary	Carolyn Friedman	Carolyn.Gideon@tufts.edu	
<p>The course covers international communication from three perspectives: its governance, its many-dimensional relationship with governments, and policy issues. Students explore different theories and</p>				

Course Bulletin

examples of how different types of communication content and technology interact with sovereignty, politics, security, international relations, culture, and development. The course provides the foundations of this field with a structural approach. Topics covered include freedom of speech, global media and international journalism, public diplomacy, propaganda, media in democracies and totalitarian states, media influence on foreign policy, digital divide, intellectual property, privacy, convergence, security, media and political conflict and economic development.

108828	The Role of Force in International Politics				
	Subject:	Catalog Nbr:			
	DHP	P240			
	2024 FALL	Primary	Richard Shultz		richard.shultz@tufts.edu
<p>This core International Security Studies course presents an examination of the role of force as an instrument of statecraft. Topics covered include: 1) military power and the role of force in contemporary world politics; 2) the causes of war and the moral/ethical constraints on armed violence; 3) instruments and purposes of coercion force: military power and strategic non-violent action; 4) national security policy formation and process; 5) the modes and strategies of military power (nuclear, conventional, internal conflict); 6) the structure of the post-Cold War and post-9/11 international security environment.</p>					

109665	Introduction to Economic Theory				
	Subject:	Catalog Nbr:			
	EIB	E201			
	2024 FALL	Primary	Carsten Kowalczyk		carsten.kowalczyk@tufts.edu
	2024 SPRG	Primary	Bruce Watson		Bruce.Watson@tufts.edu
<p>This course provides the foundation of modern economics with an emphasis on its applications. Topics include demand and supply analysis, consumer theory, theory of the firm, welfare economics, monopoly and antitrust, public goods, externalities and their regulation, unemployment, inflation and economic growth, national income determination, monetary and fiscal policy. This is an introductory course for non-specialists.</p>					

109833	Quantitative Methods				
	Subject:	Catalog Nbr:			
	EIB	E210M			
	2024 FALL	Primary	Michael Klein		michael.klein@tufts.edu
<p>This module presents the mathematical methods that are used widely in economics, including logarithms, exponential functions, differentiation, optimization, constrained optimization, and an introduction to dynamic analysis. The mathematical material is presented in the context of economic applications and examples that illustrate the bridge between mathematics and economics. One-half credit.</p>					

109892	Microeconomics				
	Subject:	Catalog Nbr:			
	EIB	E211			

Course Bulletin

2024 FALL	Primary	Maulik Jagnani	Maulik.Jagnani@tufts.edu
<p>Microeconomics does not address every question about the economy, but it does provide tools to answer numerous questions about the choices individuals and firms make. The set of tools microeconomics gives you can be used to solve almost any economic problem an individual person or firm faces. In this course, we will start with theories and models, explanations of how things work that help us understand and predict how and why economic entities (consumers, producers, industries, governments, etc.) behave as they do; we will also cover theories and models that help us understand and predict how competitive, oligopolistic, and monopolistic markets work, as well as situations in which markets might not work well (e.g., asymmetric information, externalities, and public goods). To learn the intricacies of the theories and models, we will use the tools of graphs and mathematics. We then use theories and models to look at how people and firms actually behave in real life (including some seemingly noneconomic situations). The interaction between microeconomic theory and the events, decisions, and empirical data from the real world lies at the heart of microeconomics (Goolsbee, Levitt, and Syverson, 2020). Students are required to be concurrently enrolled in EIB E210M, unless they have passed E210M or the Quantitative Reasoning equivalency exam.</p>			

109932	Macroeconomics		
Subject: EIB	Catalog Nbr: E212M	2024 FALL	Primary
	Michael Klein	michael.klein@tufts.edu	
<p>Intermediate level course in macroeconomic theory and practice oriented toward industrial economy issues, with explicit, frequent reference to the global economic and financial turbulence of the last five years. Begins with rigorous coverage of national income accounting and definitions of the most important macroeconomic variables. Covers short-run Keynesian underemployment equilibria, money and financial assets, labor markets, inflation, economic growth and technological change, monetary and fiscal policy, the origins of the financial crisis of 2007-08. Includes interpretation of the most important macroeconomic indicators. Prerequisite: Comfort with basic economic principles at level of E201 or equivalent.</p>			

109948	Econometrics		
Subject: EIB	Catalog Nbr: E213	2024 SPRG	Primary
	Julie Schaffner	Julie.Schaffner@tufts.edu	
<p>This course introduces students to the primary tools of quantitative data analysis employed in the study of economic and social relationships. It equips students for independent econometric research and for critical reading of empirical research papers. The course covers ordinary least squares, probit, fixed effects, two-stage least squares and weighted least squares regression methods, and the problems of omitted variables, measurement error, multicollinearity, heteroskedasticity, and autocorrelation. Prerequisites include familiarity with (1) basic probability and statistics (EIB B206 or B205 or B206 equivalency exams), and (2) basic concepts of functions and derivatives (EIB E210m or an introductory calculus course).</p>			

110013	The Practice of Economic Policy Analysis		
Subject: EIB	Catalog Nbr: E214		

Course Bulletin

This seminar teaches skills that enable students to bridge the gap between coursework in economics and the types of economic analysis used in both government and private sector settings. These skills and tools build on material taught in Econometrics. The topics addressed in the seminar include a range of timely and policy-relevant issues in international economics and macroeconomics. The seminar will also focus on the use of empirical analysis for writing concise, effective policy memorandums. Open to students who have completed E213, which may be taken concurrently.

110089	Managerial Economics			
Subject: EIB	Catalog Nbr: E217M			
2024 FALL	Primary	Daniel Richards	dan.richards@tufts.edu	
<p>This course is a brief introduction to management issues presented from the perspective of economics. The focus is on the strategic responses a firm can make regarding both its internal organization and its external interaction with both consumers and other firms. Students will learn the role of economic analysis in determining organizational design and developing competitive strategies whether the organization is a for-profit firm or a non-profit enterprise. One-half credit.</p>				

110102	International Trade and Investment			
Subject: EIB	Catalog Nbr: E220			
2024 SPRG	Primary	Carsten Kowalczyk	carsten.kowalczyk@tufts.edu	
<p>This course investigates why nations trade, what they trade, and the distribution of the gains and the political economy from trade. Topics include trade and economic growth, technology, the product cycle, multinationals, international labor integration, tariffs, regional economic integration, dumping and international competitiveness of firms and nations. Special attention is given to analyzing the effects of various policy instruments. Open to students who have completed E211, or with instructor's permission.</p>				

110118	Advanced International Trade and Investment			
Subject: EIB	Catalog Nbr: E221M			
2024 FALL	Primary	Carsten Kowalczyk	carsten.kowalczyk@tufts.edu	
<p>This seminar presents the analytical economics and political economy of different integration strategies, and then applies these to WTO multilateral initiatives, Brexit, NAFTA, the Trans-Pacific Partnership, Mercosur, and the Trans-Atlantic Trade and Investment Partnership. Other topics this semester include the effects of Covid on trade and investment and international policy cooperation, supply chains and economic welfare, infra-structure and foreign aid, and multinationals and international taxation. The seminar format is a workshop with lectures, student presentations and discussions, a student research paper, and a conference. Open to students who have completed E220, other upper-level economics courses, or with permission by instructor.</p>				

Course Bulletin

110224	International Finance			
Subject: EIB	Catalog Nbr: E230	2024 FALL	Primary	Michael Klein michael.klein@tufts.edu
<p>This course examines the determination of income, the exchange rate, and the trade balance in economies that trade goods and services, as well as assets, with the rest of the world. Theory is developed and employed to study current events, as well as historical experience. Issues studied include exchange rate determination, monetary and exchange rate policy, the causes and consequences of external imbalances, international policy coordination, financial crises, and the global capital market. Open to students who have completed E201 or equivalent. E210m is suggested, and may be taken concurrently, but is not required.</p>				
110485	Development Economics: Macroeconomic Perspectives			
Subject: EIB	Catalog Nbr: E240	2023 FALL	Primary	Steven Block steven.block@tufts.edu
<p>This course provides an introduction to several central themes in development economics. The organizing framework is pro-poor economic growth. By combining economic models and case studies, one can draw lessons regarding what approaches have worked to alleviate poverty. The course also pays particular attention to situations that have led to economic crises, and develops models of macroeconomic management and structural adjustment. Lectures and assignments presume a background in economics at the introductory level. Open to students who have completed E201 or equivalent.</p>				
110546	Development Economics: Policy Analysis			
Subject: EIB	Catalog Nbr: E241	2024 FALL	Primary	Julie Schaffner Julie.Schaffner@tufts.edu
<p>This course equips students for rigorous economic analysis of development problems and policies. The first half of the course develops tools for studying the decisions, markets and institutions that shape development outcomes. The second half develops an approach to policy analysis that draws on those tools. Students apply the approach in the study of policy questions related to cash and food transfers, agricultural pricing, infrastructure, education, agricultural technology, microfinance, and health. Emphasis is on rigorous reasoning, careful synthesis of empirical evidence, and effective communication of policy analysis results. Open to students who have completed E201 or the equivalent.</p>				
110561	Development Economics: Micro Perspectives			
Subject: EIB	Catalog Nbr: E242	2024 SPRG	Primary	Jenny Aker Jenny.Aker@tufts.edu
<p>This course teaches students how to use microeconomic theory and econometric skills to analyze issues in low-income countries, develop policy interventions to address those issues, and measure the impact of such interventions in a rigorous empirical manner. It then addresses the issues that constrain and support</p>				

Course Bulletin

development, particularly in sub-Saharan Africa: health and education, labor, agriculture, financial services, and institutions. Open to students who have completed E211 or an intermediate microeconomic theory course. E213 is strongly recommended.

110617	Food Systems and Policy in Developing Countries			
Subject: EIB	Catalog Nbr: E243			
<p>This seminar examines a range of issues relating to food systems, employing tools of economic analysis to understand potential public policy interventions. We will draw on both theory and case studies to understand the determinants of food consumption and production, the role of agricultural marketing, the political economy of agricultural trade and pricing policy, the effects of globalization on food security, as well as the implications of climate change and the role of genetic modification of crops for food security, and the role of agriculture in economic growth and poverty alleviation in developing countries. While cases will be drawn primarily from Asia, Latin America, and Africa, we will also follow Ethiopia as a specific case throughout the course. Examining a wide range of challenges in the context of a single focus country will deepen our appreciation of the complexities facing policymakers who confront the full range of multi-dimensional challenges confronting food systems.</p>				

110665	Political Economy of Development Policy: Theory and Practice			
Subject: EIB	Catalog Nbr: E244			
2024 FALL	Primary	Steven Block	steven.block@tufts.edu	
<p>Combines economic and political perspectives to develop an interdisciplinary understanding of selected topics in economic development. Each session addresses a particular question that arises as policymakers contend with the dynamic interplay between economics and politics as competing influences on policy choice. How can it be rational for policymakers to adopt policies that harm a majority of their own citizens? In what ways do institutions shape the development process? How does history shape the evolution of institutions? Do elections lead to better or worse policy choices? Does democracy benefit the poor and promote economic growth? Comprehensive answers to these types of questions require a political economy perspective -- one that combines an understanding of the underlying economics with consideration of the interests and political influence of various stakeholders and pressure groups. In addition, a central goal of this seminar is to bridge the gap between theory and practice by providing tools for incorporating political economy perspectives into development policy analysis.</p>				

110723	Environmental Economics			
Subject: EIB	Catalog Nbr: E246			
2024 SPRG	Primary	Maulik Jagnani	Maulik.Jagnani@tufts.edu	
<p>This course seeks to understand the complex interplay between the environment and human societies. It will highlight the methodological and empirical challenges in this field, emphasizing the need for robust data and innovative research tools. Students will be introduced to a burgeoning stream of environmental economics research that raises compelling questions, such as: How might climate change affect economic growth? How</p>				

Course Bulletin

do extreme environmental health conditions like heat, floods, air pollution affect human well-being? How and how well do firms, households, and individuals adapt to extreme environmental health conditions? How do environmental protection measures impact economic development? How do policies designed to encourage economic growth affect the environment? The course aims to explore these questions, fostering an understanding of how policy decisions can both promote economic growth and protect the environment.

110762	Econometric Impact Evaluation for Development			
Subject: EIB	Catalog Nbr: E247			
2024 FALL	Primary	Sally Zhang		Sally.Zhang@tufts.edu
2024 SPRG	Primary	Jenny Aker		Jenny.Aker@tufts.edu
<p>One of the primary challenges for policymakers, development practitioners, donors and non-governmental organizations (NGOs) is understanding what policies and interventions are the most effective in improving the welfare of the world's poor. While monitoring and evaluation is useful in determining whether a program is on the "right track", impact evaluation sets the focus on assessing the causal impacts of policies and interventions. For example, how does a program that sends cash directly to households living in extreme poverty affect food security, household assets, and psychological well-being? Does increasing female income improve the education and health of girls? What is the causal effect of attending secondary school on fertility and occupational choices? The objective of this course is to provide students with a set of theoretical, econometric and practical skills to estimate the causal impact of a policy or program, with a particular focus on development programs. The course will introduce students to a set of econometric techniques that are commonly used in impact evaluation, including randomized control trials, instrumental variables, difference-in-differences, and regression discontinuity. Examples will be drawn from a variety of sectors, including health, education, financial services and governance.</p>

117076	Foundations in Financial Accounting and Corporate Finance				
Subject:	Catalog Nbr:				
EIB	B200				
	2024 FALL	Primary	Laurent Jacque	laurent.jacque@tufts.edu	
<p>An introductory course to corporate finance from the perspective of the chief financial officer (CFO). The first part of the course deals with financial planning and budgeting, financial analysis, and short-term financial management. The second part of the course develops a valuation framework for making investment decisions (capital budgeting) for new equipment, the launch of new products, mergers and acquisitions and LBOs... and the funding/financing decisions to be coordinated with those investment decisions. Special attention is given to the cost of capital and valuing stocks, bonds, convertible and preferred.</p>					

117468	Data Analysis and Statistical Methods for Business				
Subject:	Catalog Nbr:				
EIB	B206				
	2024 FALL	Primary	Robert Nakosteen	Robert.Nakosteen@tufts.edu	
<p>This course provides an overview of classical statistical analysis and inference with an emphasis on business applications. The goal is to provide you with an introduction to statistical thinking, concepts, methods, and vocabulary. This will give you some tools for dealing with statistical methods you may encounter in your coursework or research while at The Fletcher School, especially "regression analysis," which is covered at the end of the course. Students who have completed B205 are not permitted to take this course.</p>					

117529	Financial Statement Management				
Subject:	Catalog Nbr:				
EIB	B207M				
	2024 FALL	Primary	Surjit Tinaikar	Surjit.Tinaikar@tufts.edu	
<p>Accounting is an economic information system, and can be thought of as the language of business. Accounting information provides individuals with a starting point to understand and evaluate the key drivers of the firm, its financial position and performance. This can then be used to enhance decisions, as well as help predict a firm's future cash flows. The present (or current) value of those cash flows provides an estimate for the value of the firm. This course will cover the basic vocabulary, concepts, procedures and mechanics of financial and managerial accounting and the role of accounting information in society.</p>					

117748	Entrepreneurial Leadership: Starting New Ventures				
Subject:	Catalog Nbr:				
EIB	B212				
	2024 FALL	Primary	Gerald Weitz	Rockford.Weitz@tufts.edu	

Course Bulletin

This course takes a global approach to entrepreneurial leadership, drawing on lessons from the Indo-Pacific, Africa, Latin America, the Middle East, and the Arctic Ocean region, including indigenous perspectives on sustainability and entrepreneurship. This course is designed to prepare Fletcher students to develop an entrepreneurial mindset and to launch and nurture their own ventures – including private sector startups, social enterprises, and non-profits, as well as initiatives launched by academic entrepreneurs, policy entrepreneurs, and leaders of “tiger teams” in government agencies.

117839	Global Financial Services			
Subject: EIB	Catalog Nbr: B220			
<p>The focus is on the determinants of competitive performance of financial institutions including commercial banks, insurance companies, hedge funds, investment banks, and private equity firms. Review of bank management principles emphasizes asset liabilities management, interest rate risk management and Value at Risk (V@R). Discussion of international commercial banking will focus on international trade financing, syndicate lending, project finance, and international securitization. Open to students who have completed B200 or B221 or equivalent.</p>				

117859	International Financial Management			
Subject: EIB	Catalog Nbr: B221			
	2024 SPRG	Primary	Laurent Jacque	laurent.jacque@tufts.edu
<p>This course develops a conceptual framework within which the key financial decisions faced by multinational corporations can be analyzed. The traditional themes of corporate finance, including working capital management, capital budgeting, mergers and acquisitions, and funding strategies, are revisited in the context of volatile exchange rates, different regulatory environments and segmented capital markets. Focus on foreign exchange risk management including the appropriate use of new hedging instruments such as currency options, swaps, and derivatives. Case studies emphasize how international financial management should be integrated with corporate strategy and operating decisions. Open to students who have completed B200 or equivalent.</p>				

118183	Islamic Banking and Finance			
Subject: EIB	Catalog Nbr: B227			
	2024 SPRG	Primary	Ibrahim Warde	Ibrahim.Warde@tufts.edu
<p>The course is a comprehensive introduction to Islamic banking and finance. In addition to providing religious and historical background, the course discusses the political and economic context of the creation and evolution of Islamic institutions. The course will explain how Islamic products (murabaha, mudaraba, musharaka, ijara, sukuk, takaful, Islamic mutual funds and derivatives, etc.) work. The final part of the course will discuss Islamic finance in the context of the “war on terror” and the recent global financial meltdown.</p>				

Course Bulletin

118287	Global Investment Management			
Subject: EIB	Catalog Nbr: B229	2024 FALL	Primary	Patrick Schena patrick.schena@tufts.edu
<p>This course investigates the global dimensions of investment management. The course combines technical and theoretical tools with practical illustration and application of critical investment concepts. The course will open with an overview of global institutional investors and the business of investment management. Following sessions will focus on developing an understanding primary asset classes, including foreign exchange, global equities, global fixed income securities, alternative investment vehicles, and derivatives. On this foundation, subsequent class sessions will focus on introducing and developing portfolio skills in the areas of risk management, investment performance and attribution, and finally portfolio construction and asset allocation.</p>				

118499	Productive Knowledge			
Subject: EIB	Catalog Nbr: B233			
<p>The seminar encourages and guides the development of new products and practices and the productive knowledge they embody. We focus on advances, by and for the many, rather than elite, star-centric breakthroughs. This 'multiplayer' innovation gives ample scope to individuals of widely varying talents, backgrounds, and interests to contribute and benefit. We study eight foundational challenges – such as specifying goals, evaluation, communication, and motivation – and popular techniques used to address these challenges. Complementary case histories show that imagination, patience, perseverance and so on remain indispensable. The cases also highlight the romance of innovation, reminding us that great adventure has great risks and that what's safe and easy – or just financially rewarding -- is not always uplifting. A final paper co-written by student teams (instead of a final exam) on a noteworthy innovation integrates the lessons.</p>				

118528	Strategic Management in Privatizing and Deregulating Industries			
Subject: EIB	Catalog Nbr: B234M	2024 FALL	Primary	Jonathan Brookfield Jon.Brookfield@tufts.edu
<p>Surveys the literature related to privatization, considering both theoretical perspectives and practice. It also explores current issues shaping debates about how to structure the boundary between public and private sector activity in a comparative and interdisciplinary manner. The seminar examines key concepts and policy issues related to privatization and deregulation, looks at different national experiences, and explores the impact of privatization from an industry perspective. Students should come away from the seminar with a deep appreciation of the challenges confronting executives and policymakers dealing with changes to public sector–private sector boundaries in a variety of different settings.</p>				

118760	Field Studies in Global Consulting			
Subject: EIB	Catalog Nbr: B237			

Course Bulletin

2024 SPRG	Primary	Dipinder Singh	Dp.Singh@tufts.edu
<p>The goal of this course is to provide an introduction to consulting as it is practiced worldwide and across sectors. Students will achieve this goal by undertaking a consulting engagement for a real-world client. The first part of the course will include an introduction to and practice in the essential skills that form the core of professional development for consultants at top-level firms. Students will then put these skills to the test by completing a team consulting project for a sponsoring organization. Open to students who have completed B200 and/or B291 (or similar courses). Class size will be limited by the number of projects confirmed by external sponsors with a maximum of five projects, or twenty five students, being accepted. Input for the project grade will come primarily from the client project; team self- evaluations will be reflected in individual final grades. Course requires application. Contact the instructor or the TA for more information.</p>			

118853	Strategic Management		
Subject: EIB	Catalog Nbr: B238	2024 FALL	Primary
	Bhaskar Chakravorti	Bhaskar.Chakravorti@tufts.edu	
<p>Effective strategists can: size up the dynamics of the external environment of a firm, covering its economic, political, and social contexts; take a holistic view across all functions and configure all of a firm's internal choices to give it a competitive advantage; sustain this advantage over time and leverage it into adjacent business and geographic opportunities; use acquisitions and alliances when these are the more effective approaches to support a strategy; create the right organizational context to execute the chosen strategy efficiently; ensure the continuous renewal of the firm in anticipation of and adapting to its changing environment. The objectives of this short course are to master the field's core concepts and to build the skills needed to be an effective strategist.</p>			

119021	Inclusive Finance for Low Income Households and Businesses		
Subject: EIB	Catalog Nbr: B241M	2024 FALL	Primary
	Kimberley Wilson	Kimberley.Wilson@tufts.edu	
<p>Explores financial solutions to poverty. We begin by understanding the lives of people living in low-income markets and how they strategize to make the most of their earnings. We then explore inclusive finance as an industry—its suppliers, regulators, and facilitators—and how it has lived up to its reputation as a key strategy for poverty reduction. We examine how the digital world has accelerated financial inclusion, offering up opportunities and challenges for industry actors as well as consumers. The course analyzes a changing industry from a commercial, anthropological, humanitarian, and social service perspectives.</p>			

119358	Marketing Research and Analysis		
Subject: EIB	Catalog Nbr: B262	2024 SPRG	Primary
	Bernard Simonin	bernard.simonin@tufts.edu	
<p>This course adopts a comprehensive hands-on approach to designing and conducting research. From classic opinion research to social media analytics, a wide range of contexts, problem areas, and methods are covered</p>			

Course Bulletin

that are relevant across disciplines and fields of study. Students will be exposed to the various stages of the research process from recognizing the need for research and defining the problem to analyzing data and interpreting results. Proper design of research methods, fieldwork, questionnaires, and surveys (e.g., online surveys) is covered. Both qualitative (e.g., focus groups, projective techniques) and quantitative approaches (e.g., cluster, discriminant, and factor analysis) are presented. Various analytical techniques are introduced “hands on” via a series of computer exercises and cases (using SPSS and Excel).

119375	Marketing Management			
Subject: EIB	Catalog Nbr: B263M			
2024 FALL	Primary	Bernard Simonin	bernard.simonin@tufts.edu	
<p>It is not an overstatement to say that all non-monopolistic companies, NGOs and even government-sponsored organizations live or die by their ability to effectively market their products and services. In today’s hyper-competitive global markets, organizations that excel at identifying their customers, determining how to meet their interests and needs, and delivering an outstanding experience will be the winners. This course will cover six key market functions and responsibilities: understanding the roles and responsibilities of a marketer; segmentation: identifying and targeting your best customers; strategic social media: when, how, what and with who; sales enablement and support; brand strategy; delivering a superior customer experience. We will look at marketing issues facing both private and non-profit sector organizations. All the topics in the course will be discussed in an international context, including the unique issues that marketers face in global markets.</p>				

119407	Strategic Marketing for Non-Profit Organizations			
Subject: EIB	Catalog Nbr: B264			
2024 FALL	Primary	Bernard Simonin	bernard.simonin@tufts.edu	
<p>This course offers a comprehensive coverage of the fundamental issues in marketing and branding in nonprofits. The aim of this course is to arm students with the analytical skills and knowledge necessary to make, evaluate, and critique marketing and branding strategy decisions facing nonprofit organizations in an increasingly global arena. The course addresses how to craft a nonprofit marketing strategy; implement a coherent marketing plan and optimize the use of marketing resources, develop brand identity and positioning statements; leverage brand alliances and partnerships; and perform financial brand valuations.</p>				

119517	The Political Economy and Business Environments of Greater China			
Subject: EIB	Catalog Nbr: B272M			
<p>This course will expose students to similarities and differences in the business environments of Greater China. At the end of the course, students should have a better understanding of Chinese business and the context in which business occurs in Hong Kong, Singapore, the Republic of China (Taiwan), and the People’s Republic of China (PRC). For MIB students, this course is one of the regional course options.</p>				

Course Bulletin

119631	Managing Operations and Supply Chains in Global Companies			
Subject: EIB	Catalog Nbr: B281M			
2024 FALL	Primary	Thomas Hout		Thomas.Hout@tufts.edu
<p>A management-oriented, case study-based course on how companies design, manage, and measure operations around the globe today. The core topics will be: the exercise of competitive advantage through operational capability; business process design; supply chain management; lean operations; disruptive operations innovations; operations networks and connectivity; talent management; the managerial metrics revolution; etc. Readings and cases will focus on both the operations themselves and the management issues surrounding them. One-half credit.</p>

Course Bulletin

123556	The International Legal Order			
Subject: ILO	Catalog Nbr: L200			
2024 FALL	Primary	Michael Glennon	Michael.Glennon@tufts.edu	
<p>This introductory course deals with structural aspects of the international legal system, including the jurisprudence of international law and differing cultural and philosophical perspectives; the history of the international legal system; customary international law; treaty law; statehood and recognition; the United Nations and international organizations; and the relationship of the international legal system to domestic legal systems, using the United States as a primary example.</p>				

123569	Public International Law			
Subject: ILO	Catalog Nbr: L201			
2024 SPRG	Primary	Michael Glennon	Michael.Glennon@tufts.edu	
<p>This course will offer an introduction to the international legal system's principal subfields, including international dispute resolution, the law of state responsibility, the use of force and counter-terrorism, the law of war, international criminal law, human rights, and jurisdiction and immunities. Time permitting; we may also cover selected issues in arms control, international environmental law, and international economic law. We will also explore how these subfields relate to domestic law, focusing on the U.S. legal system as the primary example. Open to students who have completed L200 or equivalent.</p>				

123947	International Human Rights Law			
Subject: ILO	Catalog Nbr: L210			
2024 FALL	Primary	Chidi Odinkalu	Chidi.Odinkalu@tufts.edu	
<p>This course will trace the legal and political development of international human rights law. It will begin by exploring the philosophical bases of this body of law in the context of the positivist legal tradition of the 19th and early 20th centuries. It will examine the nature and structure of the international legal system, and provide an overview of the early development of international human rights law within the context of the evolution of that system. The course will focus on the scope and substance of modern human rights law, and will analyze the application of these standards in the context of case studies encompassing issues of hate speech, extraterritorial application of human rights law, and discrimination on the basis of sex and sexual orientation. It will also survey the extensive array of human rights mechanisms created under the auspices of the UN and regional intergovernmental organizations. In addition, the course will provide a brief introduction to related areas of international law, including the international law of armed conflict (also known as international humanitarian law) and international criminal law in the strict sense, and the interaction of these bodies of law with international human rights law. The format of the course will consist primarily of lectures, structured discussion, and role-playing activities.</p>				

Course Bulletin

123964	Current Issues in Human Rights			
Subject: ILO	Catalog Nbr: L211			
2024 SPRG	Primary	John Cerone		John.Cerone@tufts.edu
<p>This seminar addresses in greater depth various topics of current interest in international human rights law. It is not a general survey of human rights, and knowledge of international human rights law and procedures is a prerequisite for the course. The spring 2024 seminar will be centered around the theme of non-state actors. It will examine the application of human rights law in situations where the direct perpetrators are non-state actors across various contexts, including the prevention of discrimination & hate speech; business & human rights; human trafficking; climate change; and non-international armed conflict. Prerequisite: ILO L210 International Human Rights Law or the equivalent.</p>				

124114	International Criminal Justice			
Subject: ILO	Catalog Nbr: L213			
2024 SPRG	Primary	Karl Dannenbaum		tom.dannenbaum@tufts.edu
<p>Following a long fallow period after Nuremberg, the demand for accountability for mass atrocities in the 1990s and since has catalyzed the creation of a range of mechanisms of international criminal justice. This course explores the contours of international criminal law and the institutions that apply it. We will consider the scope and boundaries of the core international crimes - genocide, crimes against humanity, and war crimes - and the range of actors potentially liable for those violations. In so doing, we will examine the application of this body of law through international courts, such as the International Criminal Court and the UN tribunals for Rwanda and the former Yugoslavia, hybrid or special courts, such as those in Sierra Leone and Cambodia, and domestic courts exercising universal jurisdiction. The course will examine the reach and limits of these bodies in confronting impunity, the tension between state sovereignty and international criminal justice, and the problem of selectivity.</p>				

124164	Transitional Justice			
Subject: ILO	Catalog Nbr: L214M			
2024 SPRG	Primary	Cecile Aptel		Cecile.Aptel@tufts.edu
<p>This seminar considers the range of processes and mechanisms available to ensure accountability for large-scale human rights violations and achieve reconciliation, including criminal justice, truth and reconciliation commissions, and mechanisms, which incorporate local custom, such as gacaca in Rwanda. It reviews some of the philosophical, moral and political considerations pertaining to the challenge of reconciliation in these contexts. This course is taught remotely by the professor.</p>				

124286	International Humanitarian Law			
Subject: ILO	Catalog Nbr: L216			
2024 FALL	Primary	Karl Dannenbaum		tom.dannenbaum@tufts.edu

Course Bulletin

This seminar offers an introduction to international humanitarian law, the body of law regulating armed conflicts. It retraces its evolution, focusing on efforts to mitigate human suffering in war and on the protection of civilians. It considers the challenges posed to the application of IHL by the changing nature of armed conflicts. The topics discussed include: the principles underpinning IHL, the definition and types of armed conflicts, the distinction between combatants and civilians, the regulation of private military and security companies, humanitarian action during armed conflict, the use of child-soldiers, rape as a 'weapon of war,' and other war crimes.

124471	International Organizations			
Subject:	Catalog Nbr:			
ILO	L220			
2024 FALL	Primary	Ian Johnstone		ian.johnstone@tufts.edu
<p>This course provides an introduction to the field, focusing on the interaction between international law and politics in international organizations. It begins by briefly reviewing theories of global governance and international institutions, from the perspective of both international law and international relations. It then provides an overview of the United Nations system, the European Union and other regional organizations. We then turn to a number of cross-cutting legal and institutional issues, including law-making, interpretation of the law, and the role of the executive head of an international organization. The bulk of the course is devoted to the substantive work of international organizations in peace and security, human rights, humanitarian affairs, development and the environment. The course concludes with several sessions on reform, focusing on the legitimacy of the existing institutional architecture and new models of global governance.</p>				

124524	Actors in Global Governance			
Subject:	Catalog Nbr:			
ILO	L221			
2024 SPRG	Primary	Ian Johnstone		ian.johnstone@tufts.edu
<p>This seminar is designed to explore in a comparative mode various actors in global governance: global organizations, regional organizations, groupings of states, non-governmental organizations, private sector actors, and networks. The first part of the seminar is devoted to theoretical, institutional, and legal issues. Each student then develops and presents to the class an outline for a "Reform Report" on an institution of their choice, taking stock of its performance and offering a vision for the future. Based on feedback from the class, constituted as the 'senior management group' of the institution, the report is finalized and submitted as the major assignment for the course.</p>				

124593	International Environmental Law			
Subject:	Catalog Nbr:			
ILO	L223			
2024 FALL	Primary	Nigel Purvis		Nigel.Purvis@tufts.edu
<p>International environmental challenges rank among the most serious threats to peace, security, and sustainable development. This course examines how the international community is responding, focusing on the major international treaties and diplomatic initiatives of today. The course surveys global action on climate change, biodiversity loss, terrestrial and ocean conservation, ozone depletion, air and marine</p>				

Course Bulletin

pollution, plastics, and hazardous chemicals. The course also examines cross-cutting themes, including the structure and patterns in environmental geopolitics, law and diplomacy, the role of foreign aid and private capital, links between trade and environmental policy, and emerging ideas relating to environmental justice. Thematic discussions are often explored in the context of the climate crisis, the most active and high-profile area of environmental diplomacy. The course includes a simulated international negotiating session that is timed to preview the outcomes of the annual global climate summit, offering students a chance to compare their solutions to those in the real world. The course is hybrid, with in-person discussions lead by the professor and virtual meetings featuring outstanding guest lecturers (environmental diplomats, legal experts, and advocates) from around the world.

124670	Conflict Management Tools for International Organizations			
Subject:	Catalog Nbr:			
ILO	L224			
2024 SPRG	Primary	Ian Johnstone	ian.johnstone@tufts.edu	
Looks at peace operations both as instruments for the management of conflict, and as a lens for understanding major issues in contemporary international affairs. Combining a thematic and case study approach, we consider the law, politics and doctrine of peacekeeping. Select cases are examined to draw out recurring themes and dilemmas, such as sovereignty v. intervention, peace v. justice and the UN v. regional organizations. In addition to lectures and structured discussion, the format of the course includes student presentations and a simulation exercise.				

124815	International Business Transactions			
Subject:	Catalog Nbr:			
ILO	L230			
2023 FALL	Primary	Jeremy Leong	Jeremy.Leong@tufts.edu	
2024 FALL	Primary	Sebastian Mantilla Blanco	Sebastian.Mantilla_Blanco@tufts.edu	
This course is an introduction to the law of international business transactions. It is designed to be accessible to students with diverse academic backgrounds, legal or otherwise. The course is divided into seven parts. Part 1 provides a general introduction to basic legal categories and taxonomies, such as private-public law, substantive-procedural law, and choice of law. Part 2 focuses on specific international business contracts and instruments, covering international sales contracts, letters of credit, commercial terms, and project finance. Part 3 addresses the role of the public sector in international business transactions. This involves considering the role of the State both as a contractor through State-owned enterprises or in investment contracts, and as a regulator in areas such as taxation, corruption, competition, and intellectual property. Part 4 presents regimes of international law relevant to international business, such as trade and investment law. Part 5 features corporate social responsibility as an essential ingredient of business transactions. Part 6 considers the settlement of international disputes, covering litigation, commercial arbitration, and investment arbitration. Finally, Part 7 relates to the enforcement of judgments and arbitral awards related to international business transactions. Class discussions will include examples from both global-north and global-south jurisdictions.				

124869	International Investment Law
---------------	-------------------------------------

Course Bulletin

Subject:	Catalog Nbr:			
ILO	L232			
2024 FALL	Primary	Sebastian Mantilla Blanco	Sebastian.Mantilla_Blanco@tufts.edu	

This course offers an advanced introduction to the law of foreign investment, one of the most dynamic and yet contested areas of international law. It provides an overview of domestic and international law mechanisms for the protection of foreign capital, as well as the emerging network of soft law instruments relevant for foreign investment. The focal point of the course lies in the law of investment treaties. Students will become familiar with the notions of “investment” and “investor”, substantive standards of investment protection (e.g. the guarantee of a “fair and equitable treatment” and protection against expropriation), and legal devices striking a balance between the interests of foreign investors and the public interest (e.g. environmental and national security exceptions). The course draws particular attention to the settlement of investment disputes. It addresses key concepts of investor-State arbitration, such as jurisdiction of investment tribunals, admissibility of claims, applicable law, stages of the proceedings, and recognition and enforcement of arbitral awards. The final part of the course is devoted to the movements of reform and change in international investment law. Students will engage in ongoing debates about the future of international investment law and discuss competing reform agendas from both the global south and the global north.

124903**International Financial and Fiscal Law**

Subject:	Catalog Nbr:			
ILO	L233			
2024 SPRG	Primary	Joel Trachtman	joel.trachtman@tufts.edu	

This course is intended to introduce students to the legal and regulatory context of international finance. It covers selected domestic and international aspects of (i) corporate law relating to finance, (ii) bank financing and regulation, (iii) securities financing and market regulation and (iv) insolvency law. It also addresses the process of innovation in international financial law, with coverage of emerging market debt, swaps and other derivatives, privatizations, and securitization. These topics will be reviewed from the standpoint of domestic law of the United States and other selected jurisdictions, as well as from the standpoint of applicable international law and practice.

125237**Legal and Institutional Aspects of International Trade**

Subject:	Catalog Nbr:			
ILO	L240			
2024 SPRG	Primary	Joel Trachtman	joel.trachtman@tufts.edu	

This course examines the law of international trade in goods and services, focusing principally on the law of the World Trade Organization and its General Agreement on Tariffs and Trade, as well as on the foreign trade law of the United States. This sector of international law includes specialized negotiation and dispute settlement processes, as well as particular types of rules, restraining national restrictions on trade. These rules address tariff and non-tariff barriers, discrimination, regionalism, anti-dumping duties, countervailing duties and safeguards measures. This course will pay particular attention to how this legal system manages various facets of globalization.

Course Bulletin

125417	Law and Development			
Subject: ILO	Catalog Nbr: L250			
2024 SPRG	Primary	Chidi Odinkalu	Chidi.Odinkalu@tufts.edu	
<p>This seminar examines the role of law and legal systems in the economic and social development of developing nations, emerging markets, and countries in transition. It explores how law may both inhibit and foster change and the ways that legal institutions may be organized to achieve national goals. It first considers the nature of law, the nature of development, and the theoretical relationships of law to the development process. It then explores the links between law and development through case studies on land tenure, foreign investment, environment, governance, constitutionalism, corruption, judicial reform, enterprise organization, and the rule of law.</p>				

125576	Foreign Relations and National Security Law			
Subject: ILO	Catalog Nbr: L262			
2024 FALL	Primary	Michael Glennon	Michael.Glennon@tufts.edu	
<p>This course deals with the intersection of international law and United States constitutional law, focusing upon the separation of powers doctrine and the allocation of decision-making authority, international law as part of United States law, treaties and other international agreements, the war power and terrorism, the appropriations power, federalism, the role of the courts, and current national security issues. Open to students who have completed L200 or its equivalent, or with permission of the instructor.</p>				

127014	Negotiation Strategy and Skills			
Subject: GMA	Catalog Nbr: D220			
2024 SUMR	Primary	Eileen Babbitt	eileen.babbitt@tufts.edu	
2024 SUMR	Primary	Diana Chigas	diana.chigas@tufts.edu	
<p>Explores the processes, rather than specific substantive issues, of international negotiation. In addition to exploring a wide range of issues that confront leaders negotiating in the global arena, the course will include an emphasis on building analytic, strategic and tactical skills of each student for negotiation in their leadership role. Students will have a chance to practice these skills in several simulations and exercises throughout the semester and to reflect on their own assumptions, approaches, and skills in those exercises. An important aim of this course is to understand frameworks and tools that help negotiators analyze negotiation and leadership situations and to use that analysis to build and execute an effective negotiation strategy.</p>				

127269	The Role of Force in the 21st Century International Security and Conflict Environment			
Subject: GMA	Catalog Nbr: P240			
2024 SPRG	Primary	Richard Shultz	richard.shultz@tufts.edu	
2024 SPRG	Primary	Michael Sullivan	Michael.Sullivan@tufts.edu	

Course Bulletin

Examines the political, economic, military and ethical factors affecting the use and utility of military force in international relations today. It aims to provide both theoretical foundation and the tools needed to analyze current security challenges confronting the United States and other countries. Topics addressed (may) include debates about grand strategy, military transformation and force structure,; theories of practice and coercion; theories and practice of crisis and post-crisis management; the causes of terrorism; nuclear, biological and chemical weapons (NBC) proliferation and counter-proliferation strategies; dynamics of military occupations, counterinsurgencies, and “nation building”; and the security implications of epidemic disease, border controls and demographic trends.

129738	Curricular Practical Training for F-1 visa holders
Subject: IR	Catalog Nbr: CPT
<p>Summer study and Internship for Fletcher MALD and MIB students who do not hold U.S. work authorization and who choose to engage in off-campus work or internship experiences in the United States. Experiential learning and application of academic experiences are standard components of a two-year master’s level international affairs program. Requirements include successful completion of the Professional Development Program, mandatory attending at two lectures, the internship and a paper at the conclusion of the internship. PhD students in the dissertation phase of their program will be eligible for up to 11 months of curricular practical training provided that they enroll in a .25 credit independent study under the supervision of their dissertation director. The course will be graded and based on a paper submitted by the student based on their internship experiences and the relationship to their PhD research. Students are eligible one time only during their degree program. Available only for F-1 visa holders. Please consult with the Registrar’s Office for more information.</p>

138841	Advanced Evaluation and Learning in International Organizations			
Subject:	Catalog Nbr:			
DHP	P228M			
<p>This advanced module is key for students who wish to develop the full-package of skills and concepts expected of professionals working in development and peacebuilding. At the end of this class, students will have a working knowledge of the key evaluation designs, approaches and tools; the ability to evaluate existing evaluations for adequacy of the design and quality; a clear picture of the link between evaluation and learning; and an overview of the latest strategies and challenges in creating learning organizations. Introduction to DME is a prerequisite to take this course.</p>				

138842	Political Economy and Business of the EU			
Subject:	Catalog Nbr:			
DHP	P287M			
<p>Has the European Union (EU) delivered on its promise of a fully integrated economic and political union? How has Europe grown from its modest beginning with the European Coal and Steel Community established in 1951 with only six countries to the European Union which today encompasses 27 countries? Is the Euro crisis undermining the future of the European Union or will it usher the EU in a fiscal union which by necessity requires a closer political union? How does this multi-faceted integrative process shape the European business environment? Through class discussion and case studies managerial implications for firms operating in Europe are assessed at the provincial, national, and EU level. For MIB students, this course is one of the regional options.</p>

138880	Market Approaches to Economic Inclusion			
	Subject:	Catalog Nbr:		
	EIB	B243M		
<p>Examines how commercial, government, and non-profit stakeholders engage market forces in a range of crucial services to improve the lives of low-income customers. We explore strategies that affect sectors such as education, energy, and agriculture as well as approaches to scaling at the last mile, in particular, the use of agents and franchising. The course poses uncomfortable ethical dilemmas that the class will debate. Using lectures, case studies, and human-centered design activities, each class explores a different method of tapping value chains and market ecosystems. Student teams work with "live cases" or real clients to enhance their learning and are expected to present their findings to a panel of judges at the end of the semester. Skills acquired in the course include business design and analysis, client management, and presentation skills.</p>

139038	Islam and Politics: Religion and Power in World Affairs			
Subject: DHP	Catalog Nbr: P268	2023 FALL	Primary	Ibrahim Warde
				Ibrahim.Warde@tufts.edu
<p>Islamic ideas and actors play an important part in global politics today. Their impact on political change, international security, and economic and social trends has shaped international relations in recent years. This course will trace the historical evolution of political Islam from both an international relations and a comparative politics perspective. A particular focus will be on the diversity of political Islam and on the religious factor in the "Arab Spring". The course will also look at the role of other religions in contemporary politics.</p>				

139102	Foreign Relations of Modern China, 1644 to the Present			
Subject: DHP	Catalog Nbr: H271	2024 FALL	Primary	Sulmaan Khan
				Sulmaan.Khan@tufts.edu
<p>This course is a survey of China's foreign relations from the Qing dynasty to the present. Topics include geography, warfare, diplomacy, trade, cultural exchange, and the connections between past and present. Lectures followed by discussion.</p>				

139163	Informal and Underground Finance			
Subject: EIB	Catalog Nbr: B223	2024 FALL	Primary	Ibrahim Warde
				Ibrahim.Warde@tufts.edu
<p>This course aims to study the role of the informal (off- the-books) and underground (criminal) sectors in the global economy, from multiple perspectives ranging from economic development to law enforcement and global security. In the past decades, the removal of financial controls, combined with technological advances, has allowed deviant globalization (drug trade, piracy, cybercrime, counterfeiting, human trafficking, terrorist financing, etc.) to prosper, creating governance and law enforcement challenges to governments and corporations alike.</p>

	2024 FALL	Primary	Lawrence Quartana	Lawrence.Quartana@tufts.edu

Today's leaders must have the ability not only to analyze thoughtfully but also to communicate clearly and persuasively. This full semester course is intended to turn you into a significantly more persuasive and effective public speaker—someone who speaks with the ease, confidence, clarity, and modes of persuasion that are critical in today's corporate, nonprofit, policy, and diplomacy worlds. We will cover a range of speaking scenarios, from podium speeches on values to simulations of a press conference or media interview on camera. The course is intended to help you develop your own personal style by deepening your understanding of the persuasive tools, recommendations, refutations, modes of analysis, and variations in audiences that motivate listeners to turn business, policy and diplomacy ideas into action. The full semester course will take a deeper and wider dive into the world of public speaking relative to the module course, and include sessions on debating, ceremonial speeches, as well as more detailed sessions on facing the camera and press, impromptu speaking, and elevator pitching. Approximately one-half of the course will be devoted to classes that introduce students to strategies of spoken communication and to models of public presentation. The other half will consist of speech delivery sessions in which students will hone their skills in public speaking.

139472	Gender and Human Security in Transitional States and Societies		
	Subject: DHP	Catalog Nbr: D231	
<p>This course uses gender as a key analytical tool to examine states and societies transitioning from large-scale social and political upheaval. It explores key gender dimensions of such transitions and their implications for states, societies and citizens, including those that have moved toward more democratic forms of governance and those that transitioned (or appear to be transitioning) into more authoritarian or fundamentalist regimes. The course balances a population-focused approach (examining the evolving roles, expectations, and norms for men, women, boys and girls) with an analysis of the health, humanitarian, development, security, justice/legal, and governance sectors.</p>			

139473	21st Century Intelligence and National Security Seminar		
	Subject: DHP	Catalog Nbr: P265	
	2024 SPRG	Primary	Richard Shultz richard.shultz@tufts.edu
<p>21st century challenges to U.S. intelligence are being influenced by two different security and conflict contexts. The first appeared in the immediate aftermath of 9/11. As peacetime turned into wartime, intelligence institutions were tasked with combating new threats posed by transnational, decentralized and networked armed groups. This had a significant impact on the kinds of intelligence methods and capabilities that were could meet these challenges, which differed from those employed against 20th century state threats. The second context is what has been characterized as the new era of "great-power competition." For U.S. intelligence agencies this means that states will be the predominant target in years ahead, relegating nonstate armed groups to a secondary concern.</p> <p>To meet the challenges emanating from each of these security contexts, the U.S. intelligence community (IC) has sought to adapt how intelligence is collected, analyzed, and disseminated, as well as how it is employed as an instrument to help achieve policy objectives. A major theme running through the seminar will be to examine how U.S. intelligence has sought to make the necessary changes to adapt to these different challenges, and the extent to which the practices of the 21st century IC have been and will be affected by dramatic technological changes that may result in a revolution in intelligence affairs (RIA).</p>

139474	Global Private Equity: From Money In to Money Out			
	Subject:	Catalog Nbr:		
	EIB	B224		
	2024 SPRG	Primary	Patrick Schena	patrick.schena@tufts.edu
<p>This course provides a comprehensive examination of the role of private equity in global finance. It is intended to equip students with an analytical framework for assessing the industry and its key participants and to develop practical skills to support possible investment careers. The course is experiential by design and will be structured around two team-based projects that will engaged students directly in critical dimensions of the private equity finance process: fund development, investment analysis and decision-making. The course will cover the full spectrum of issues relevant to a globally oriented private equity firm from the structure of partnership agreements, through capital acquisition, deal sourcing, investment analysis, deal structuring, and exit. The course approach is intended to unite disciplinary rigor in financial and investment analysis with globally applied practices.</p>

<p>We are living through a historic shift in the media ecosystem, with profound implications for the informational foundations of democracy. This course will explore the changing role, power and responsibility of the press; the dynamic among leaders, citizens and journalists in shaping politics and policy; and the economic, social, technological and ethical challenges that newsrooms are facing in this environment. What drives the judgments editors make about which stories to cover and which to ignore? As we approach a U.S. presidential election, what has changed since 2016? And what is the role of journalism in shaping democratic institutions and policy solutions? This course will be conducted in real-time, with weekly analysis of coverage of on-going political stories, particularly the 2020 campaign. The perspective will be that of editors and reporters, principally in the national press, making decisions about coverage; the focus will be largely though not exclusively on U.S. media. Students will be expected to be heavy consumers of news and come to class prepared to discuss both the assigned readings for the week and the issues that erupt as we go.</p>

140027	Negotiation and Mediation in the Israeli-Palestinian Conflict: Past Lessons and Future Opportunities			
Subject: DHP	Catalog Nbr: D224	2024 FALL	Primary	Nadim Rouhana
				Nadim.Rouhana@tufts.edu
<p>Integrates negotiation and conflict resolution theory, international negotiation and mediation practice, and area studies within the Israeli-Palestinian conflict. Students will serve as active participants in their own learning by examining their ideas with people who have participated in negotiations or mediation in various rounds of the Israeli-Palestinian conflict or senior scholars who have studied this conflict. The first half of the course will explore the Israeli and Palestinian narratives and will review the conflict's historical developments since 1948. It will also review briefly main concepts and theories of negotiation, mediation, and conflict resolution. The second half relies heavily on high-ranking guest speakers from the U.S., Israel, and the Palestinian territories in an effort to give students formal and informal opportunities to interact with professionals who have had first-hand experience negotiating or mediating in this conflict.</p>				

140029	The Historian's Art and Current Affairs			
Subject: DHP	Catalog Nbr: H205	2024 FALL	Primary	Sulmaan Khan
				Sulmaan.Khan@tufts.edu
<p>Through case studies, this course aims to give students the historical powers they need as they go out into the world: empathy, detachment, and relentless skepticism. The course examines the origins of World War I and the analogies the war provoked and provokes, as well as the two paradigms that come up when debating whether or not to go to war: the trouble that flowed from appeasing Nazi Germany and Japan in the run up to World War II, and the disastrous Sicilian expedition embarked on by ancient Athens. The tension between these paradigms is explored through studies of war in Korea, Vietnam, and Iraq. The course will also examine how different readings of history can lead to dramatically different policies; the U.S., Russia, and China tell Cold War history differently and those differences do much to explain their different world views. Armed with knowledge of the many endings of the Cold War, the course will also compare the revolutions in Europe in 1989, Ukraine's Orange Revolution, and the Arab Spring.</p>				

140057	Democratization in the Middle East: Theory and Practice			
Subject: DHP	Catalog Nbr: P261			
<p>This course explores foundational theoretical, methodological, and operational questions relevant to understanding democratization in the Middle East. How do we specify regime types; how do we explain the pervasiveness of authoritarian resilience and hybrid regimes, versus democratic, regimes, in the region? How do historical conditions of state-formation and patterns of secular and religious nation-building shape democratization trajectories in the region? How does geopolitics affect democratization in the Middle East? Using comparative cases of Egypt, Israel, Palestine, Syria, and Turkey, and combining seminar-style presentations with visits by democratization policymakers from inside/outside the region, the course gives</p>				

Course Bulletin

students a robust introduction to scholar-practitioner issues at the cutting edge of democratization in the Middle East.

140066	Corporate Sustainability in the Age of Globalization			
Subject: EIB	Catalog Nbr: B252			
2024 SPRG	Primary	Jette Knudsen	Jette.Knudsen@tufts.edu	
<p>The context for business and society is changing in (at least) four ways: globalization and a lack of global governance; increasing relevance of ESG (environment, social and governance) challenges; rising scale and scope of corporate activities; digitalization and datafication. These changes create new challenges as well as opportunities for business but also for their stakeholders. Stakeholders as diverse as investors, employees, the media, NGOs, and customers often have strong views on how corporations should address these new issues.</p>

Subject: DHP	Catalog Nbr: P297
2024 SPRG	Primary Kimberly Theidon Kimberly.Theidon@tufts.edu
<p>This course enables students to develop a nuanced understanding of the central issues and debates in human security, and also develop a deeper understanding of various aspects of the predicament facing the people of a crisis-affected, conflict or post-conflict country, and international organizations mandated to help address their problems. Human security privileges the security and well being of humans rather than the state. A field of study in international affairs and international relations, human security focuses on issues at the heart of human rights, humanitarian affairs, conflict studies and mediation, economic development, health and wellbeing. Human security approaches are inter-disciplinary and problem-focused, and seek to understand a problem from the perspective of the people most affected, which requires an anthropological sensibility and an appreciation of different social-cultural framings of problems. Thus, the course itself is problem-focused. It takes five central fields, which human security has drawn from and influenced – human rights, humanitarian studies, feminist and gender studies, mediation and conflict resolution, and development – and uses foundational theories and applications in those fields to bring a human security lens to better understand and address current problems in Latin America. The course is also inter-disciplinary and involves readings in anthropology, political science, law, international relations, security studies, humanitarian studies, public health and trauma, conflict resolution, feminist/gender studies, economics, environmental studies, and history.</p>	

Course Bulletin

140379	Cross-Sector Partnerships
Subject: EIB	Catalog Nbr: B254
<p>This seminar offers an in-depth overview of cross-sector partnerships. The starting point is that finding solutions to today's complex social problems must incorporate the resources and expertise of governments, civil society and business. The seminar addresses collaborations between the public, non-profit and private sectors and highlights different forms of cross-sector partnerships such as multi-stakeholder initiatives, public private partnerships, cross-sector social initiatives, cause-related marketing, and event-sponsorship. The seminar analyses conditions for successful cross-sector partnerships as well as some limitations of such programs. The course also addresses how "multi-nationalization" of business can drive the emergence and configurations of cross-sector partnerships. Finally, the seminar emphasizes the growing importance of social impact assessment for cross-sector partnerships. The aim of this course is to arm students with the analytical skills and knowledge necessary to form, evaluate, and critique cross-sector partnerships and decisions about how to engage in such programs for governments, NGOs and corporations.</p>	

140383	Influencing Policy and the Global Debate: Writing Analysis and Opinion
Subject: DHP	Catalog Nbr: D218
<p>Informing and influencing the course of public affairs requires an ability to write clearly, explain accurately and be convincing. It also requires an understanding of your audience, including its cultural values and how to reach it through social media. Whether you choose to go into government, the non-profit sector, business or the news media itself, you will have to master these skills for success in the public arena, be it to lead or to affect policies. In this course, we will study how to write analysis, which generally attempts to address questions of why or how or to explain something, and opinion, which focuses more what should be done. Opinion can include value judgments, but you must back both analysis and opinion with facts. You also must provide context and be complete, weighing contradictory but relevant information. You will be asked in the first class to submit a theme, region or country on which throughout the course you will write disciplined, well-written essays of 800 to 1,200 words. Your pieces must have some relevance to public policy today, but can focus on economic, legal, historical, military, business or political matters.</p>

<p>This module will introduce and critically analyze efforts to direct private sector financial investments to public purpose. These efforts-falling under the headings of impact, responsible, mission, social, and sustainable investing-looks for ways to maximize the social utility of private investment. We will examine the: 1) types of investors engaged in these efforts (e.g. individuals, pension funds, endowments, foundations); 2) social goals they hope to achieve through their investments; 3) investment strategies and vehicles through which they hope to achieve these goals; 4) intersections of impact investing and public policy; 5) ways that stakeholders assess the impact of these investments. The class will balance U.S. domestic and global examples of investment, policymaking, and advocacy.</p>

---------------	--

Subject:	Catalog Nbr:
DHP	P221

Analyzes the relationship between memory and social reconciliation, and the role that theories of truth, justice and redress play in this equation. We begin with WWII, or more precisely its aftermath and the emergence of a series of conventions and covenants establishing human rights as a set of international laws, institutions, and norms. We trace the expansion of, and challenges to, the regime of human rights and international law by focusing on case studies that allow us to analyze war crimes tribunals, truth commissions, the burgeoning field of transitional justice, and local level forms of assessing guilt and administering justice. Our case studies this year include Rwanda, South Africa, Colombia, Guatemala, and Peru.

This course explores the fundamental aspects of managing and leading people including: managing one-on-one relationships; influencing team behavior; and motivating and aligning people behind a common vision. It also examines the challenges and tradeoffs in creating a meaningful personal leadership path, especially in the early stages of your career. The course pedagogy is case-method discussion, drawing primarily on cases from the private sector, supplemented with comparative material from the public sector

Course Bulletin

and civil society. This course will provide you with a number of critical concepts and competencies that will be useful in both the short term and long term. It will help you to make the transition from an individual contributor to a manager and, over time, build a career of increasing responsibility as a leader.

140907	Global Maritime Affairs: International Trade, Security, Energy and Environmental Issues at Sea			
	Subject: DHP	Catalog Nbr: D205		
	2024 SPRG	Primary	Gerald Weitz	Rockford.Weitz@tufts.edu
<p>Over 90% of international trade is carried by sea – the lifeblood of globalization. The world’s oceans also present a myriad of opportunities and challenges in international affairs, such as territorial disputes, opening Arctic sea routes, piracy, terrorism, strained fisheries, mineral and energy extraction, marine disasters, whaling, maritime security and technological advances in maritime domain awareness. The course will explore these issues and other maritime topics based on individual student interests. Course format is lecture and discussion. Writing and speaking skills receive considerable attention. No prerequisites other than a lively curiosity.</p>

141083	Gender Theory and Praxis	
	Subject: DHP	Catalog Nbr: P214
	2023 FALL	Primary Kimberly Theidon Kimberly.Theidon@tufts.edu
<p>This course provides a foundation in key theories and frameworks for understanding gender issues across disciplines. Drawing on key texts from the fields of anthropology, philosophy, post-colonial theory, women's and gender studies, feminist theory, international relations, development economics, environmental studies and beyond, students will explore the role of gender and gender relations across the spheres of social, cultural, political, economic and religious life. The course syllabus seeks to capture the diversity of identities and viewpoints that are reflected in theoretical conversations about gender. While many of these debates are commonly discussed with reference to international studies, this course will also wade into the realm of the domestic, exploring how gender theories manifest in reproduction, labor, and peacetime relationships. Discussions will draw out intersectional themes and invite students to reflect on how to apply these theories and approaches to issues of race, social class, and other dimensions of identity and privilege.</p>		

141084	Energy, Entrepreneurship, and Finance	
	Subject:	Catalog Nbr:

Course Bulletin

DHP	P251				
2024 FALL	Primary	Barbara Kates-Garnick	Barbara.Kates_Garnick@tufts.edu		
<p>Driven by environmental factors, technology and market conditions, opportunities abound in areas related to conventional and new energy, which is represented by renewables and new technologies. This course examines the role that entrepreneurship, policy and financing taken together play in driving change that impacts traditional energy sources and results new energy opportunities. Energy entrepreneurship and financing together will support and create new infrastructure and require new energy paradigms on both the supply and demand side. The class will meld policy, strategy, finance and entrepreneurship in order to build a coherent framework for integrating conventional and new energy with a focus on both business and the environment. DHP P254 is recommended but not required.</p>					

141085	Civil Resistance				
Subject:	Catalog Nbr:				
DHP	P246M				
2024 FALL	Primary	Abigail Linnington	Abigail.Linnington@tufts.edu		
<p>Offers an in-depth primer on civil (nonviolent) resistance waged by ordinary people to bring about substantive political, economic, and/or social change. The course begins with a brief history of nonviolent struggle over the last century, the theoretical foundations of resistance, and common misperceptions. The course then turns to the historical record to study how and why nonviolent resistance movements succeed at double the rate of armed struggles even when waged against oppressive regimes. Students learn several of the core skills taught by practitioners and leading academics in assessment, strategy and planning, tactics, mass mobilization, and organization, and apply these frameworks to case studies throughout the course. Next, the course examines the dynamics that often emerge within nonviolent struggle such as how violent repression can backfire, how to maintain resilience and discipline within the movement, and the role of external actors and assistance. The course ends with students' assessment of several ongoing civil resistance movements and the prospects for achieving enduring political, economic, or social change.</p>

141626	Global Water Security Perspectives		
Subject:	Catalog Nbr:		
DHP	P252		
2023 FALL	Primary	Melissa McCracken	Melissa.Mccracken@tufts.edu
<p>This is a seminar-style course to introduce students to the concept of water security. Water security is a relatively new term in the field of water science and policy, and it is a concept with multiple interpretations. One definition by the Global Water Partnership is “Water Security, at any level from the household to the global, means that every person has access to enough safe water at an affordable cost to lead a clean, healthy, and productive life while ensuring that the natural environment is protected and enhanced.” Since the early 2000s, the term has been used in increasing popularity often as justification or informing technical or policy solutions to the world’s water challenges. How the term is applied in these situations depends on its interpretation, making a solid understanding of the underlying concepts of water security important for decision-makers. Ultimately, water security is a concept that allows us to consider the risks associated with water, such as the risk of a lack of access, risk of poor quality, or risk of flood, and to develop solutions to address these risks, thereby ensuring one’s water security. However, water security is often conflated with the idea of securitization, which has the potential to encourage a securitized approach to water resources management, when interdependence and cooperation are often what is needed to ensure water security for all. This course will take a deep dive into the main concepts and theories underlying the term water security. We will use the Web of Water Security (Zeitoun 2011) as a framework for understanding how water relates to climate, energy, food, human, and national securities, plus consider the economics of water and address environmental water needs. This course aims to help students build an understanding of water security as a concept so that they can use it as a tool to evaluate and inform sustainable and equitable water solutions to the global water crisis we are currently facing.</p>

141741	Selected Issues in Law of the Sea
Subject: ILO	Catalog Nbr: L222
2024 FALL	Primary
Photini Pazartzis	Photini.Pazartzis@tufts.edu
<p>This course explores current issues implicating the Law of the Sea (and in particular the United Nations Convention on Law of the Sea and related treaties). It explores the interaction of an international legal regime with the challenges posed by geography, climate change, history, military rivalry, trade and politics, and in turn how an international legal regime can itself influence the course of national conduct, whether through negotiation, adjudication or “lawfare”. We will explore the ongoing tension between freedom of the seas and sovereign rights and regulation, in contexts ranging from current political-military rivalries and criminal conduct at sea to the exploitation and management of marine resources and preservation of the ocean environment. We will also discuss how the ambivalent attitudes of leading military and commercial powers affect the rule of law in the oceanic context. The course uses current challenges in the South China Sea and the Arctic as a vehicle for consideration of certain of these topics.</p>	

141742	Nuclear Weapons and Great Powers Competition
Subject: DHP	Catalog Nbr: P215
<p>The seminar offers an in-depth analysis of selected nuclear issues that today top the U.S. nuclear agenda. The course seeks to explain the genesis and the evolution of these issues and to examine and debate the appropriateness of current policies. The course offers both theoretical and policy perspectives on these issues so as to encourage students to experiment with different theoretical lenses and to familiarize themselves with the constraints and limits of policy formulation in the face of complex and pressing dilemmas.</p>	

141743	Non-Proliferation Law and Institutions
Subject: ILO	Catalog Nbr: L264

Course Bulletin

Existing non-proliferation regimes center around three important multilateral treaties and the verification mechanisms associated with them: the Nuclear Non-Proliferation Treaty, the Chemical Weapons Convention, and the Biological Weapons Convention. Recent developments, including concerns about weapons of mass destruction falling into the hands of non-state actors, have raised questions about the viability of existing regimes. The objective of this seminar is to explore these developments from a legal and institutional perspective. Situated in the broader context of the politics and policies of non-proliferation, we will look at the past, present and future of each regime, drawing on current cases to illustrate their strengths and weaknesses. We will look at the key legal instruments, the institutional arrangements for monitoring compliance, and the enforcement mechanisms. Special attention will be devoted to new initiatives that seek to complement existing regimes. More generally, we will consider what – if any - is the impact of international law and institutions in a field that goes to the core of national and international security.

141830	Maritime Security			
	Subject: DHP	Catalog Nbr: P206M		
	2024 SPRG	Primary	Gerald Weitz	Rockford.Weitz@tufts.edu
<p>Maritime security is a constant fixture in security headlines. Ranging from territorial disputes in the South China Sea to piracy near strategic chokepoints, maritime security challenges are varied and complex. This course seeks to unravel these challenges by examining the basic foundations of maritime security. These include the key technologies and technological trends which affect maritime security, the role of Great Powers, the importance of chokepoints, and future of non-state actors. Students taking this course will emerge with a nuanced understanding of security challenges in the maritime domain and knowledge of maritime terminology used by practitioners in the field.</p>

141840	Managing NGOs and Social Enterprises			
	Subject: EIB	Catalog Nbr: B230		
	2024 FALL	Primary	Alnoor Ebrahim	Alnoor.Ebrahim@tufts.edu
<p>This course examines how to create, develop and scale high-performing social sector organizations — be they for-profit, nonprofit, or hybrid organizations. In this course, student will learn how to: a) design an organization's mission, theory of change, and strategy in order to deliver social results; b) develop performance management systems useful for internal learning, while managing complex demands for accountability from diverse stakeholders; c) understand how to scale impact through multiple strategies including growth, collaboration, and policy influence; and, d) examine capital markets and the challenges of obtaining resources. Taken together, students will acquire the understanding, skills and knowledge necessary to lead and sustain high performance in enterprises dedicated to addressing some of the most challenging problems facing the world today.</p>

142320	Current Issues in Global Immigration Policy	
Subject:	Catalog Nbr:	
DHP	D238	
<p>This is a comparative immigration politics and policy course, with a focus on national immigration policies and the foreign policy, security and development implications of migration. Since 2015 when the migration crisis took hold in Europe, long-standing debates over how to reconcile foreign policy interests, national security concerns, and the humanitarian and development implications of migration have re-emerged at a global scale. This course takes a comparative perspective to these issues, comparing the experience of the US, EU, other OECD and selected middle- and low-income countries. The first half of the course explores general issues, the second half focuses more closely on specific countries. It is an introductory level course, intended for students with little or no background in comparative policy or global migration, beyond a familiarity with current events expected of any Fletcher student.</p>

Course Bulletin

International arbitration is one of the most widely used mechanisms of dispute resolution across legal systems, industries, and geographical regions. This module provides students with a practice-oriented introduction to international arbitration, from the formation of the arbitration agreement to the enforcement of foreign arbitral awards. The focus of the module lies in international commercial arbitration. The module begins with a general description of the legal frameworks applicable to international arbitral proceedings. It then addresses three key moments in an arbitration. The first moment is the period preceding the arbitral proceedings. This part of the module highlights the design of the arbitration agreement, considering its elements and validity requirements. It also conveys drafting techniques for effective arbitration clauses. The second part of the module covers the conduct of the arbitral proceedings. It provides an overview of the main stages of an arbitration, from the constitution of the arbitral tribunal through the production of an arbitral award. In this context, students will engage with a broad range of topics, including the ethical duties of arbitrators, transparency, the taking of evidence, and interim measures of protection. The third moment is the period that follows the end of the arbitral proceedings. Students will learn about the annulment, recognition, and enforcement of arbitral awards, with examples from a myriad of jurisdictions from both the global north and the global south. The final session of the module provides a general overview of the use of arbitration in the settlement of disputes between foreign investors and States. Students will recognize the peculiarities of investor-State arbitration and how it differs from international commercial arbitration.

Jette Knudsen	Jette.Knudsen@tufts.edu
This seminar explores how and why the nature of work has changed dramatically in recent years and what this means for future career patterns. The course has four learning objectives: Provide students with an understanding of key drivers shaping work such as globalization and organizational and technological	

Course Bulletin

innovations. 2) Offer students a critical comprehension of how the relationship between workers and management is changing and how this impacts work and company competitiveness. 3) Enable students to assess a range of approaches to improving the nature of work such as skills development and training, programs for reducing race and gender inequality in the workplace, initiatives for improving work-life balance, as well as programs for talent development. 4) Building on the material in the course students should develop concrete strategies to further develop their own careers and preferred management style.

142519	U.S.-EU Relations in the 21st Century: A Multidisciplinary Analysis of Transatlantic Affairs			
Subject: DHP	Catalog Nbr: D280			
2024 FALL	Primary	John Shattuck	John.Shattuck@tufts.edu	
<p>The course will explore the origins of transatlantic cooperation and the creation of common European economic and political structures, notably the European Union, and the development of transatlantic security alliances, particularly NATO. It will compare constitutional governance in the differing federal systems of the US and the EU, explore centrifugal forces like Brexit that are testing the sustainability of the EU, and examine the populist and nationalist political movements and neo-authoritarian tendencies that are challenging liberal democracy on both sides of the Atlantic. Areas of economic cooperation and tension will be studied, including the financial crisis, international trade and regulatory affairs, and the failed negotiation of a transatlantic trade and investment partnership. The course will also take up cooperative and conflicting policies of transatlantic partners in addressing security problems of terrorism, failed states, refugees and human rights catastrophes. Finally, it will examine the relationship of Russia, Turkey and countries to the east with evolving transatlantic security, economic and political structures.</p>				

142556	Contemporary Russian Foreign Policy			
Subject: DHP	Catalog Nbr: D282			
2024 FALL	Primary	Mikhail Troitskiy	Mikhail.Troitskiy@tufts.edu	
<p>Russia's full-scale invasion of Ukraine in 2022 became a watershed moment in the evolution of the Russian state and its relations with the outside world. The ongoing Russo-Ukrainian war has made irrelevant many approaches to analyzing Russian foreign policy that were popular before the February 2022 invasion. With this in mind, our course will provide a systematic review of the schools of thought on the sources and outcomes of Russia's post-Cold War foreign policy. We will study key concepts, cases, and personalities to understand the impact of the main long-term drivers of Russian foreign policy: historical legacies, identity politics, leader worldviews, domestic governance, economy, bureaucratic processes, education, social mobility, and others. As we go through several key cases in the second part of the course, we will seek to understand the extent of continuity in Russian foreign policy goals and potential for their change. With the benefit of hindsight, we will assess the adequacy of the explanations and forecasts offered by top analysts before the onset of the full-scale Russo-Ukrainian war: which of them proved prescient and which of them missed the direction Russia was headed, and why? Finally, we will look to develop approaches to modeling the future of Russia's place in the world and its foreign policy, depending on the key variables that we will work to identify.</p>

Josephine Wolff

Josephine.Wolff@tufts.edu

There is a myth that the Internet erases borders. But as Internet companies' ability to place localized ads show, that's false. What's more accurate is that the Internet complicates a nation's ability to control of the flow of information within its borders. (This is not a new challenge for sovereign nations; consider the telegraph.) This fluidity has created great economic opportunity and simplified trans-border access, the latter potentially threatening security and other basic state functions. With bits increasingly controlling the world around us, the Digital Revolution poses a highly disruptive threat. In this course, we'll explore cyber clashes in the civilian sec-tor: from jurisdictional issues and the challenges posed by new technologies to criminal activities and impacts on civil infrastructures.

142884**Introduction to Human Security**

Subject: Catalog Nbr:
DHP P295

Human security is a value proposition. It argues that seeking the security of the individual, as defined by that individual, is at least as important as seeking the security of the state – and sometimes more important. Although the term “human security” is relatively recent, originating in the 1990s post-Cold War era, the question of whose security is primary, the individual's or the state's, is seminal in international relations scholarship. The argument revolves around differences of viewpoint on what obligations the state has to its people in terms of providing for their security, and whether individuals have claims beyond the state if/when their security is threatened. In the 1990s in particular, these discussions included expanding the definition of security beyond physical safety (e.g., to include economic, identity, and rights-based dimensions), the recognition that entities other than the state provide for individuals' security when the state either can't or won't, and the need for including vulnerable groups in decision-making about security provision.

Human security covers a broad range of issues and practices, but they all share three main analytic components: (1) person-centered, focusing on views of security as defined from the ground up rather than top-down; (2) multi-dimensional, requiring both an interdisciplinary approach and one that integrates all voices and perspectives; and (3) preventive, choosing to look at root causes and early indicators to be pro-active rather than reactive to threat. Human security thus provides a powerful lens through which to analyze all threats to the security of individuals and communities.

Course Bulletin

The issue areas in which the human security lens is most often applied include: gender-based violence; human trafficking; forced migration; drug policy; civilian protection through human rights or non-violent action; multi-track diplomacy; youth and conflict; financial inclusion; and provision of basic services such as healthcare and education.

In this course, we will review the critical security and feminist security literature that preceded the development of human security. We then cover the core concepts in human security as outlined above: person-centered, multi-dimensional, and preventive. Under each of these themes, we will introduce relevant skills for building analytic competency and draw upon case studies that illustrate how these analytic approaches have been used in practice. Case studies will be drawn from the issue areas listed above.

Throughout the course, emphasis will be placed on becoming a “reflective practitioner,” with the ability to investigate one’s own values and assumptions and incorporate the learning from this inquiry into one’s work.

143030	Demography and National Security			
Subject:	Catalog Nbr:			
DHP	P209M			
<p>Demography is a critical factor in explaining the stability of states, it is often missed by both policymakers and academics until it is too late. Why is it missed? Policy makers tend to be focused on immediate crises and events, while population change happens over the longer term, in slow motion. Academics tend to favor immediate and direct causal factors in explaining political instability, war and state death. How demography impacts societies and politics is too complex and too messy for contemporary analysis that tends to emphasize the search for causality through formal modeling and statistical methods. This course seeks to remedy these oversights by providing an introduction to key concepts and trends related to the study of populations and what it means to international and states' national security. While demographers ask and answer questions such as 'how many people, of what kind, and where?' (facts of change); and 'why did this come about?' (determinants of change), international relations and national security experts need to understand why this matters (consequences of change). The goal is to build an understanding that enables scholars to better inform policy makers, and policy makers to be better prepared to grasp the opportunities and ameliorate the risks that demographic changes present.</p>				

143045	Power in World Politics			
Subject:	Catalog Nbr:			
DHP	P291			
2023 FALL	Primary	Daniel Drezner		Daniel.Drezner@tufts.edu
<p>Power is the defining concept in the international relations discipline, and yet there is no consensus about what that concept means. This is a problematic state of affairs. The need for a better conceptual and empirical understanding of power should be obvious. This seminar will confront these conceptual and empirical problems head-on. Through an array of scholarly readings and case studies, we will aim for a better understanding of what power means, its myriad dimensions, how it is perceived over time, and how it is exercised by actors in world politics.</p>

143465	Innovation Models for Building Inclusive Businesses
Subject: EIB	Catalog Nbr: B242
<p>The needs of the global sustainable development agenda are both broad and urgent; innovation models are central to addressing them in a timely, efficient and scalable manner. From promoting inclusive growth to ensuring the longevity of natural resources to addressing issues across the state of the human condition, there are many problems to be solved. Inclusive business - including large MNCs, social enterprises to impact investors - recognize that the private sector will increasingly play a lead role in solving such problems and closing the gaps. Such gaps-closing can cost \$3-5 trillion annually, according to some estimates; the value that businesses can unlock while closing the gaps are estimated to be in the range of \$12-15 trillion a year. This suggests a macro level business case supporting the mantra of "doing good while doing well." This course will prepare students with a practical micro-level understanding of this opportunity, why the private sector is essential in solving sustainability and inclusion problems, what barriers get in the way of following through on this seemingly compelling logic, and how the solution lies in developing robust and scalable "inclusive innovation" models that overcome the key barriers. The course will help students with a framework for archetypal inclusive innovation models and where to apply them, identify how to specifically construct them and dig into specific models in practical case examples and draw broader conclusions. Graduates of this class will leave with a set of inclusive innovation models that they can apply to their own future organizations - an existing large business, a social enterprise, a start-up they have founded, a client they are advising as a consultant, board member or an investor. They will leave with conceptual frameworks, practical tools and skills and case examples for pattern recognition and practicing analytical problem-solving to apply elsewhere.</p>

143675	Humanitarian Leadership: The Political and Policy Challenges of Being in Charge				
Subject:	Catalog Nbr:				
DHP	D234				
<p>NUTR 329/D234 is designed to provide students with a broad understanding of leadership actions in extreme contexts and how politics and policy affect the choices leaders make in humanitarian assistance programs. The course also will cover leadership concepts to enable students to extract lessons to begin to develop a personal leadership style, and political frameworks that enable the student to better analyze such influences on humanitarian actions.</p> <p>The course will examine political and policy ramifications for decision makers in humanitarian settings through review of various institutions that conduct humanitarian activities, but are part of larger systems with other considerations. Through use of case studies, the course will help students identify how specific leaders dealt with major issues in humanitarian crises, the successes and failures attendant to those decisions, and the consequences of those actions. The course is designed to also help students begin to build their own leadership skills and styles.</p>

143808	Ethics in the Practice of Foreign Affairs			
Subject:	Catalog Nbr:			
ILO	L215			
2024 SPRG	Primary	Karl Dannenbaum		tom.dannenbaum@tufts.edu
<p>Many of an individual's most morally significant decisions and actions occur at work. This is true whether one works in the private sector, the public sector, or the NGO sector. The normative weightiness of such decisions is particularly high in many of the careers to which Fletcher students aspire. At the same time, it is well established that social and organizational context plays a key role in shaping behavior, including by shaping an individual's behavior in ways that can run contrary to her independent ethical judgment. In other words, it is extremely difficult to think and act ethically at work. Detached from the professional context, graduate school provides a crucial opportunity for moral reflection at a moment when that reflection can have a real impact in shaping future action. Seizing on that opportunity, this course wrestles with the key dimensions of moral difficulty likely to face those working at the transnational or international level (broadly construed). We begin with philosophical foundations, covering the three key modes of moral reasoning: consequentialism, deontological ethics, and virtue ethics. We then turn in the second part of the course to thinking through problems at the intersection of morality and psychology, understanding the concept of moral dimensions (culpability, blame, and burden), and clarifying the distinction between justification and excuse. The third and dominant part of the course isolates and focuses on the most vexing normative issues and challenges likely to arise for those working in the transnational realm. Among others, this will include wrestling with the dilemmas involved in negotiating with criminal or terrorist actors, doing business in a context of mass corruption, prioritizing recipients of humanitarian aid, engaging in whistleblowing or disobedience, and deciding whether to serve in an administration engaged in nefarious. The objective of the course is to empower students with the philosophical tools to shape their professional lives in such a way that they can ultimately reflect back upon their careers and endorse them morally from a position of honest and searching self-evaluation.</p>

course will begin with a general overview of the history, structure, and culture of the State Department.

143836	Comparative Constitutional Law		
Subject: ILO	Catalog Nbr: L253		
2024 SPRG	Primary	Christine Bustany	Christine.Bustany@tufts.edu
<p>This course explores topics—from constitutional design to fundamental rights—arising in the comparative study of constitutional law globally in a variety of systems, including new and older constitutional democracies, as well as autocratic regimes. Course readings will go beyond the field’s dominant focus on North American and European constitutional systems to also include jurisdictions from the Global South. Class sessions are a mixture of lecture, discussion, student presentations, and debates.</p>

<p>Jurisdiction, speech, search, evidence, copyright, and response to attacks haven't been the same since the Internet came into play—and law has been having a hard time keeping up with the changes that the new technology has wrought. This course is an introductory course to some of the complex legal issues of cyberspace. Learn how the Digital Revolution impacts First, Fourth, and Fifth Amendment law, the failure and solutions of copyright in the Digital Age, problems raised by the Computer Fraud and Abuse Act, antitrust and tech, and the Law of Armed Conflict. The course will largely focus on U.S. law and jurisprudence, but will illuminate issues by adding an international perspective. Plan to write, think, and argue!</p>			

144254	Cyber Risk Management		
---------------	------------------------------	--	--

Course Bulletin

Subject: Catalog Nbr:
DHP D290

This course provides a survey of different tools and techniques for assessing and addressing online risks in an organization including threat modeling, security metrics and budgeting, incident response and remediation, legal compliance, and cyber-insurance. Through case studies of real companies and cybersecurity incidents, students will learn how to identify potential cyber threats to an organization, address related supply chain and procurement risks, develop qualitative and quantitative metrics for assessing cybersecurity, establish a policy for responding to law enforcement requests for data, use international security standards and frameworks, negotiate insurance coverage for cyber risks, and incorporate cloud-based services and other third-party IT vendors into a comprehensive cyber risk management plan for a multinational organization. The organizational risks discussed will include data breaches, online financial fraud, industrial espionage, social engineering, denial-of-service attacks, cloud provider outages, and online extortion. The first part of the class will focus on organizational threat modeling and risk assessment techniques, the second part will look at budgeting and metrics for cybersecurity, the third part will explore techniques for cyber risk sharing, and the fourth part will look at incident response and mitigation.

144255	Cyber for Future Policymakers		
Subject:	Catalog Nbr:		
DHP	D291		
2024 FALL	Primary	David Lillethun	David.Lillethun@tufts.edu
<p>(Cross-listed w/ CS 201) Computer technology runs modern societies, underlying virtually every activity we do, from how the foods we eat arrive on our table to how we receive and consume information. Because cyber technology has such a profound influence on society, policymakers frequently face decisions on technical issues. Computer Science for Future Presidents is designed to provide students interested in policy, political science, and international relations aspects of cyber technology with an understanding of how these technologies work and the underlying issues of the policy debate. This course will cover Internet architecture and basic networking, the Web, cloud architectures, cryptography, security and privacy, open source systems, AI and machine learning, and other new technologies; it has a heavy emphasis on labs. It assumes no more previous exposure to computer science than a single programming course.</p>

144323	Design, Monitoring and Evaluation			
Subject: DHP	Catalog Nbr: P225	2024 SPRG	Primary	Melita Sawyer Melita.Sawyer@tufts.edu
Provides a practical introduction to three of the main elements of the program cycle beginning with theories that underpin program design, then discussing monitoring for decision making, learning and accountability, the course ends with program evaluation from the perspective of an implementing actor or donor. The course focuses on the processes related to DME and applies them across development and humanitarian spheres.				

144324	International Law Practicum			
Subject: ILO	Catalog Nbr: L270	2024 FALL	Primary	Christine Bustany Christine.Bustany@tufts.edu
<p>A few years ago, Fletcher launched its first faculty-led International Law (“IL”) Practicum with the goal of bridging the divide between theory and practice in the international human rights field. As part of this innovative experiential learning course, a select group of Fletcher students have the opportunity to gain hands-on real world experience working on compelling human rights related projects under the professor’s supervision for real clients and partners from the nongovernmental and intergovernmental organization sector. The client/partners have included (i) the UN Special Representative to the Secretary General on Violence Against Children, (ii) International Detention Coalition, (iii) Norwegian Refugee Council, (iv) Mercy Corps, and (v) the Global Legal Action Network (“GLAN”) Law. Examples of potential project deliverables include desk reports, petitions, human rights education materials and programing, policy reports, memoranda, white papers, advisories, client briefings and oral presentations. All projects involve research, writing, and an opportunity to discuss and reflect on the skills and strategies employed by human rights practitioners as well as questions of ethical, political and professional responsibility related to human rights work. Through supervised practice, students cultivate a range of skills, become substantive experts on an issue or subject matter, and further develop a professional identity. In sum, the practicum serves not only as a professional credential but as critical preparation for the complex field of international human rights practice. An application is required to enroll. Application due Fri Aug 23 https://tufts.box.com/s/jo7by33veni1hb0eh49gfb6drmpqyyuy</p>

Subject:	Catalog Nbr:			
DHP	D240			
2024 SPRG	Primary	Dyan Mazurana	Dyan.Mazurana@tufts.edu	
<p>Drawing upon relevant theories, concepts and frameworks, and using a thematic approach and case studies, this class explores children and childhood, gender, violence, protection and resilience in both development settings and humanitarian crises. After a deep grounding of what constitutes a `child`, `childhood,` child protection, children's international rights and resilience, we use gender and intersectional analyses to explore children and nutrition; children, adversity and mental and physical health; child labor and child slaves; children `on the streets`; children and migration, displacement and resettlement; child brides and grooms; children and political violence; child soldiers; and conducting research with children. Throughout the course students will engage in conducting gender and intersectional child protection analyses for both development settings and humanitarian crises.</p>				

144566	Econometric Impact Evaluation for Public Policy and Social Programs			
Subject:	Catalog Nbr:			
EIB	E245			
<p>This course will cover econometric impact evaluation theory and empirical methods for evaluating public policies and social programs. The curriculum is oriented toward applied practitioners by focusing on research design and methods most commonly used for establishing causality and measuring the impact (e.g., randomization, matching, fixed effects, difference-in-differences, instrumental variables, and regression discontinuity). Students will learn to critically read, analyze, and evaluate papers using these techniques and implement them in your own research, which potentially leads to the capstone. The topics include a broad array of academic empirical research questions in diverse fields of economics, including labor, education, development, health, and environmental economics. Econometrics (at the level of E213) is a strict</p>

prerequisite and may not be taken concurrently.

144580	Strategy and Grand Strategy: Theory, Art and Practice			
Subject:	Catalog Nbr:			
DHP	P248			
2024 SPRG	Primary	Abigail Linnington	Abigail.Linnington@tufts.edu	
<p>This course aims to build students' understanding of the theory and practice of strategy and grand strategy and their influence on policy. It is a course designed for practitioners in which students are asked to think critically and creatively about today's geopolitical environment, potential strategies, their implementation and their consequences. The course begins by examining the nature of strategy and how it is defined across the literature. It explores the historic origins and modern foundations of the field, introduces the concepts of power and statecraft, and considers critiques of strategic planning. Next, the course turns to a discussion of strategic art - the assessment, formulation, and implementation of strategy including the use of diplomatic, economic, and military tools of statecraft. The course concludes by considering the influences of culture, national values, and institutions on contemporary cases of strategy in the United States, China, Russia, and the NATO Alliance. Emphasis throughout the course is primarily focused on nation-state behavior but students are strongly encouraged to apply the course frameworks to other actors in the international system including intergovernmental organizations, non-governmental organizations, the private sector, and other non-state actors.</p>

144791	Contemporary Critical Theory on International Issues		
Subject:	Catalog Nbr:		
DHP	D202		
<p>This course is grounded in the key proposition of critical theory: that the categories and ideas we use to make sense of the world can and should be situated historically and within power relations. Drawing on a number of post-World War II theorists from traditions that might be described as postmodern, post-Marxist, feminist or postcolonial, the course challenges the concepts that frame analysis of contemporary international relations issues. The course is structured around five key themes: refugees, trauma and truth-telling, violence as a productive force, new forms of empire, and ecological ruins. Exploration of each theme will be guided by a series of theoretical texts, alongside narrative forms (memoir and film) and more empirically grounded studies. Students are expected to bring insights from their research interests and their previous work experience to deepen the exchange between theoretical and narrative texts, and practical issues. The course is designed to increase students' confidence and ability to weave theoretical issues and approaches into their analyses of contemporary issues; and to stimulate an ethical discussion of how we conceptualize and engage with complex contemporary global issues.</p>

144977	International Law and Migration		
Subject:	Catalog Nbr:		
ILO	L217		
2024 FALL	Primary	John Cerone	John.Cerone@tufts.edu
<p>The number of displaced persons worldwide has reached record highs, and practitioners and policymakers working in situations of humanitarian crisis are confronted with increasingly complex legal, policy, and practical challenges related to displacement. In particular, migration flows are more than ever characterized by overlap between contexts and categories of persons with heightened vulnerabilities and protection needs. As a law course, it will focus on the analysis of relevant international legal frameworks applicable to migration and displacement, including international refugee law, international human rights law, international humanitarian law, international criminal law (in both the general and strict senses), the law of the sea, and international labor law. It will also examine the practice of relevant international organizations, and will consider the significance of the recently adopted Global Compact on Refugees and Global Compact on Migration and their follow-up mechanisms. The course will consider application of the above frameworks in the context of specific phenomena, including migration by sea, human trafficking, individuals fleeing violence perpetrated by non-State actors, the displacement of individuals internally and within transit countries, as well as the interface between international law and select domestic asylum systems.</p>			

144978	A Century of Transformation: Western-Middle East Relations from the 1920s to the Present
Subject:	Catalog Nbr:
DHP	H262
<p>Discusses the evolution of relations between the West and the Middle East as Western powers, who prior had begged for capitulations and other favors from local Middle East rulers, became the direct and indirect 'great powers' of the region, at different times throughout the 20th century. First as outsiders seeking special favors</p>	

Course Bulletin

from local dynasts, Westerners evolved as partners who soon rapidly took over power throughout much of the Middle East, along the way turning their war allies effectively into their subjects. How nationalists responded to these changes and how the 20th and early 21st centuries adjusted to the new world order is part of the story. This is a research-based class in which students will learn to better examine how historical conflicts and life under occupation shape identity, and how to develop a thematic approach to viewing identities through a historical lens.

145000	Climate and Migration			
Subject:	Catalog Nbr:			
DHP	D241			
2024 SPRG	Primary	Karen Jacobsen	karen.jacobsen@tufts.edu	
<p>Explores the ways in which people are displaced by the destruction of our environment, the role of financial capitalism in that destruction, and the consequences for climate change and global migration. Through the lens of global supply chains, we explore the connections between economic development and global capitalism, environmental impact, human mobility and climate change. Through case studies we explore different supply chains, and the interaction of their links with the environment, migration, and climate change and consequently, human security and justice. The course provides a perspective on the fast-growing body of research on climate change and migration, and explores the associated challenges of human security and environmental justice. The course explores potential policy responses and technological solutions, including positive interventions in supply chains, and ends with a perspective on pandemic response at the national and international level. Participants will gain an exposure to academic and non-academic literature and case studies from different regions. Flexible course assignments will offer students an opportunity to delve deeper into topics of their interest.</p>

145094	Overview of Survey Methods			
Subject:	Catalog Nbr:			
DHP	D243M			
2024 SPRG	Primary	Karen Jacobsen	karen.jacobsen@tufts.edu	
<p>This module expects that students will come to the course with a developed research question and hypotheses to be tested using survey data. This module focuses on how to use survey methods, to explore research questions, test hypotheses, and combine with qualitative data in mixed methods designs. It has three broad goals: familiarize with different kinds of large-N data (e.g. Big Data, census, RCTs) and establish how surveys are one type); enable students to design and implement a household survey; give students hands-on experience in implementing a pilot survey and analyzing survey data; show how and why survey data can be combined with qualitative methods to enable 'mixed methods'. Prerequisite: DHP D235M or equivalent preparation.</p>				

145095	Qualitative and Mixed Methods			
Subject:	Catalog Nbr:			
DHP	D244M			
2023 FALL	Primary	Kimberley Wilson	Kimberley.Wilson@tufts.edu	
2024 FALL	Primary	Aram Hur	Aram.Hur@tufts.edu	
<p>Introduces mixed-method research in the study of politics and policy, with an emphasis on how to effectively use qualitative methods for causal inference. We will answer questions such as, what is good mixed-method design? What are the relative strengths and weaknesses of qualitative and quantitative methods, and how do you make the sum greater than the parts? We will cover the nuts and bolts of specific qualitative methodologies, including case studies, interviews, and process-tracing, but with a consistent focus on how each method can contribute to strong research design when used alone or in combination with quantitative tools.</p>				

145096	Working in Difficult Research Environments w/Vulnerable Populations: Advanced Field Research Methods			
Subject:	Catalog Nbr:			
DHP	D245M			

Course Bulletin

2024 SPRG	Primary	Dyan Mazurana	Dyan.Mazurana@tufts.edu
<p>Drawing upon relevant theories, concepts and frameworks, and using a thematic approach and case studies, this class explores conducting research with vulnerable populations in difficult research environments. We will study the ethics of conducting research with violence and conflict affected populations. We will engage with the specific practicalities of the researcher and her/his team members working safely in these difficult environments, and best practices to help ensure the research and researcher do not harm the research subjects or put them at risk. We will explore a variety of means and best practices to carrying out field research with populations on the move such as conflict-migrants and refugees; survivors of gender-based violence and sexual violence in fragile states; children that have experienced violence and deprivation; and victims of international war crimes and crimes against humanity. Prerequisites: DHP D235M and DHP D244M or equivalent preparation.</p>			

145097	Overview of Research Methods

2023 FALL	Primary	Sulmaan Khan	Sulmaan.Khan@tufts.edu
2024 FALL	Primary	Karen Jacobsen	karen.jacobsen@tufts.edu
<p>This is the introductory research module for Masters and PhD students, and is the foundation for Fletcher's 'Research Track.' This module prepares students to come up with a draft research proposal that will be more fully fleshed out through a detailed exploration of qualitative and survey methods in subsequent modules. Research Module 1 has the following goals:</p> <ul style="list-style-type: none"> - to learn how to conceptualize and write up the design for any research project, - to provide an overview of qualitative, quantitative, and 'mixed methods' - understand case studies from different social science perspectives - to develop a critical awareness of what constitutes sound empirical research and what does not. 			

145099	Controlling the World's Most Dangerous Weapons		
Subject: HGAS	Catalog Nbr: GV1735		

145100	Interracial Intimacy: Sex, Race and Intimacy in the U.S.		
Subject: HGAS	Catalog Nbr: WG1278		
<p>What assumptions about race and sex are embedded in the term "interracial," and why are different types of interracial relationships viewed differently? How did White fears of relationships between Black men and White women influence the creation of the Ku Klux Klan? How did the story of Pocahontas influence the development of a settler colonial state? This course investigates the significance of interracial intimate relations throughout United States history and through the lens of race, class, gender, and sexual orientation. Although interracial intimate relations (consensual and non-consensual) predate the nation's founding, they have been considered taboo throughout most of American history. From Sally Hemings and Thomas Jefferson to Meghan Markle and Prince Harry, we will analyze how social perceptions of these relationships shift over</p>			

Course Bulletin

time, as well as the economic and legal implications of interracial intimacy in the construction of the U.S. as a nation-state.

145101	Political Economy of Non-Democracies
Subject: HGAS	Catalog Nbr: EC2418
<p>Non-democratic regimes have been the oldest and most common form of political governance. This course studies the forces of stability and forces of change in non-democratic regimes. Concerning the forces of stability, we will cover topics such as repression, hatred, state coercion, information control, corruption, co-optation, and political trust and norms. Concerning the forces of change, we will cover topics such as democratization, collective actions, conflict, nation building, reform and privatization, state capacity, bureaucracy, and the role of institutions on economic development and innovation. We will explore these topics both theoretically and empirically. Students will be exposed to various workhorse models in political economy, as well as recent advances in empirical methods such as natural experiments, field experiments, lab experiments, lab-in-the-field experiments, and text analyses.</p>	

145102	Social Choice Theory
Subject: HGAS	Catalog Nbr: EC2082
<p>A basic course in social choice theory and its analytical foundations. There will be particular emphasis on recent work in voting theory. Attention will also be paid to implementation theory, the theory of justice, and the analysis of liberties and rights.</p>	

145103	Macro Risk, Economics and Markets
Subject: HBS	Catalog Nbr: 1184
Macro Risk, Economics and Markets	

145104	Managing Human Capital
Subject: HBS	Catalog Nbr: 2060
Managing Human Capital	

145105	Negotiation Intensive Course
Subject: HBS	Catalog Nbr: 2241
Negotiation Intensive Course	

Course Bulletin

145106	Religion, Values, and Future Democracy	
	Subject: HDIV	Catalog Nbr: 2042
Religion, Values and Future Democracy		

145107	Getting and Keeping Democracy	
	Subject: HKS	Catalog Nbr: DPI407
<p>This is a course about how democracy comes into being and how it breaks down, and about what citizens, activists, and policymakers around the world can do to make the former more likely and the latter less so. Around the world, there is an increasing sense that democracy is under threat. In established democracies such as the United States and France, nativist and populist political leaders question liberal, democratic arrangements that had long been taken for granted. In new democracies such as Tunisia and Indonesia, political leaders capitalize on instability and disorder that invariably attend democratic transition to call for a return to the old, authoritarian order. And in authoritarian regimes, leaders point to models of economic success offered by such countries as China and Singapore to portray undemocratic, nonconsensual politics as more capable of delivering the prosperity that citizens desire. The legitimacy that democracy once enjoyed is now no more.</p> <p>In order to understand what we can do to erect democracy where it doesn't exist, to make it work better where it does exist, and to shore it up where it is fragile, this course draws on a variety of literatures to distill key lessons for citizens, activists, and policymakers. The readings will also cover a variety of regions, from Europe to Latin America to the Middle East to Southeast Asia, and will bring into dialogue the work of scholars and practitioners. Exercises will be writing intensive, and intended to help students develop their own intellectually coherent visions for how democracy can be built, deepened, and defended. This course is designed for students who seek careers in development and in international affairs. In addition to emerging with tools and insights useful for supporting democracy in their home countries and around the world, students will gain groundings in some of the principal social scientific approaches to the analysis of democracy and authoritarianism.</p>		

145108	Making Change When Change is Hard: the Law, Politics, and Policy of Social Change	
	Subject: HKS	Catalog Nbr: DPI535
<p>How does change happen? When, why, and how do people, and whole nations, come to together to influence large-scale policies and actions on issues like the environment, equality, criminal justice? Why do revolutions occur? This course will try to answer these questions, and do so by exploring a diversity of efforts related to societal change. In an effort to draw general lessons for those interested in making change, we will assess a range of political and legal approaches; examine mass movements and the leadership by organizations, governments, and individuals; and attempt to gauge outcomes. Using research from psychology, political science, and economics, and focusing on case studies, the course will explore the ideas behind several arguments: 1) big problems are rarely resolved with comparably big solutions, but instead are better met with small acts of reform; 2) coalition-building among strange bedfellows is usually indispensable; 3) agents of change fare best when they look to measure their impact and never lose sight of the real world results they seek, rather than the expressive highs along the way; 4) informational "cascades" are possible and critical, as</p>		

Course Bulletin

people follow one another; and 5) group polarization can be both desirable and dangerous, as groups become more heated and more extreme.

145109	The Arts of Communication
Subject: HKS	Catalog Nbr: DPI802
<p>Today's leaders must have the ability to communicate with clarity and integrity. This course seeks to strengthen the capacity of each student to do so in public and private settings while navigating a diverse range of leadership challenges. Approximately one-third of our time together will be devoted to lessons and discussions to introduce students to strategies of communication and models of public presentation. The other two-thirds will consist of smaller sections, in which students will have the opportunity to practice and improve their public speaking skills.</p>	

145110	Religion, Values, and the Future of Democracy
Subject: HKS	Catalog Nbr: DPI227
<p>G. K. Chesterton described the United States as “a nation with the soul of a church,” but America’s religious institutions have increasingly taken on the souls of political parties. At the same time, liberal democracy finds itself under stress and the core values of liberalism are being challenged by nationalism, authoritarian forms of populism, and a backlash against rising economic inequality. And embedded racism has come under vigorous challenge – in the US especially, but throughout the democracies. This course will explore the religious and secular values that under-gird democracy. It will examine both political and religious institutions, and explore the thinking of theologians and philosophers on the challenge of self-rule.</p>	

145111	The Rise of Authoritarian Populism
Subject: HKS	Catalog Nbr: DPI418
The Rise of Authoritarian Populism	

145112	Civil Resistance: How It Works
Subject: HKS	Catalog Nbr: IGA147
<p>Civil resistance is the application of unarmed civilian power using nonviolent methods such as protests, strikes, boycotts, demonstrations, without using or threatening physical harm against the opponent. The use of civil resistance has been increasing around the world in recent decades in places as diverse as Sudan, Algeria, Russia, Serbia, Spain, Egypt, Iran, Maldives, the Niger Delta, the West Bank, Thailand, Myanmar, and the United States, among others. Because civil resistance can have profound effects, it is essential to understand the causes, dynamics, outcomes, and consequences of civil resistance campaigns. Such questions also have clear practical implications for those seeking to use, support, or assist such movements – as well as those who would seek to undermine them. This course serves as a primer on the topic of civil resistance,</p>	

Course Bulletin

introducing students to the primary explanations for how and why civil resistance works, as well as the practical implications of empirical research on the topic for observers, activists, and policymakers alike. The five primary goals of the course are to: (1) present leading explanations, concepts, approaches, and discourses for understanding civil resistance; (2) explore and recover in-depth cases to better understand how civil resistance succeeds and fails; (3) apply empirical research to current questions and controversies that dominate activist and organizer circles; (4) provide students with opportunities to synthesize their knowledge; and (5) allow students to deepen their knowledge about several historical cases around the globe, particularly neglected cases that can offer up novel insights and perspectives.

145113	Working Together: Civilians, Military, and Foreign Policy
Subject: HKS	Catalog Nbr: IGA270
<p>One of the biggest challenges that faces the U.S. and other nations in achieving their security goals worldwide is the state of civil-military relations in that country. In the United States, many scholars talk about the growing divide between the military and citizenry, others talk about the impact of a warrior caste, while still others wonder about the deleterious, long term impact of a huge Defense Department budget and resulting deficits on other national priorities. This debate is even more acute in this election year. This course hopes to better inform debate in this and other countries about the connection of the populace with its military, the use of force, and the appropriate role of military leaders. The major objectives of this module are to provide insight into the complexities of national security, the major theoretical perspectives of civil-military relations, case studies of U.S. and selected foreign civil and military interactions, and the way ahead to ensure democratic processes thrive in the decisions about use of force. This module consists of five parts covering thirteen class sessions. The introductory case and follow-on lesson set the stage of the theory of strategy and present the challenges of achieving national security policy goals in today's complex global environment. The second block focuses on the major theoretical perspectives on civil-military relations and the differing impact some of those theories have had on military and civilian leaders. The third block looks at a comparative view of civil-military relations around selected countries around the world and helps provide context for the deeper dive into the American example. The fourth block of the module uses case studies and readings to look into the relationships between the citizenry, the government, and the military within the United States. Finally, the course concludes with a look toward the future of civil-military relations and talks about such topics as generals in public office and the lack of debate over the use of military force in American foreign policy.</p>	

145114	Financial Analysis of Public and Nonprofit Organizations
Subject: HKS	Catalog Nbr: MLD401
<p>Financial Analysis of Public and Nonprofit Organizations (MLD-401M) is an introductory course intended for a general audience of students with no background in accounting or financial analysis. By the end of the course, students should be able to: 1) Understand commonly-used accounting and financial analysis terminology, concepts, tools and processes; 2) Evaluate financial statements in order to ask probing questions, identify risks and/or opportunities, and think critically about financial performance; 3) Recommend and justify courses of action based on analyses of accounting and other financial data; and 4) Successfully move on to higher-level MLD courses. The course will be taught using a combination of lectures, case studies, problem sets and exams. Specific topics covered will include an overview of the financial reporting landscape and governance;</p>	

Course Bulletin

accounting principles and concepts; a detailed review of the major financial statements; and the analysis of major financial topics such as organizational liquidity, solvency, operations, funding, and benchmarking. Students will be exposed to the unique features of public and nonprofit accounting, but many of the topics covered are applicable to all types of organizations.

145115	Poverty, Race, and Health
Subject: HKS	Catalog Nbr: SUP234
<p>This course critically examines the health status of the poor, and of African Americans and other socially disadvantaged racial and ethnic groups in the US. Attention will be focused on the patterned ways in which the health of these groups is embedded in the social, cultural, political, and economic contexts, and arrangements of US society. Topics covered include the meaning and measurement of race, the ways in which racism affects health, the historic uses of minorities in medical research, how acculturation and migration affects health, and an examination of the specific health problems that disproportionately affect nondominant racial groups.</p>	

145116	Scaling Up for Development Impact
Subject: HKS	Catalog Nbr: DEV320
<p>The module will focus on what can we learn from the experience of scaling up in different institutional settings. Scaling up is key to improve development effectiveness all over the world yet it is difficult to achieve. This is an important issue for Governments, the private sector, NGOs and the Donor Community. And each of these organizations has different ways to go about it. We will start by presenting an analytic framework for understanding scaling up and the reasons why this is important. Throughout the 12 classes we will discuss specific cases of scaling up by the private sector, the government, international agencies, social entrepreneurs and grassroots organizations. We will then draw the lessons from these examples, including cross cutting issues they have in common and what they mean for service delivery and development effectiveness. Students will be asked to choose a scaling up challenge and work on it throughout the course, applying the lessons from the different cases which are presented.</p>	

145117	Geoeconomics: Trade, Investment and Security
Subject: HLS	Catalog Nbr: 3050
<p>In the post-Cold War period, economics and national security were relatively separate realms, both in policymaking and scholarship. But recent years have seen a marked convergence in the economic and security dimensions of policy and regulatory challenges facing many governments including Australia, China, Germany, Japan, Russia, South Korea, the United Kingdom, and the United States. This interdisciplinary course introduces students to the study of geoeconomics, which sits at the intersection of geopolitics, economics, security, law, and technology policy. It explores the way in which major power rivalry is reshaping international trade and investment and their associated legal regimes across domains as diverse as supply chains, export controls, trade tariffs, investment screening, and student visas. It examines changing ideas about the opportunities and vulnerabilities associated with economic interdependence, particularly with</p>	

Course Bulletin

respect to critical infrastructure and technology. It uses topical case studies, including economic coercion campaigns and the regulation of 5G networks, to examine the policy trade-offs and governance challenges involved in integrating economic and security considerations.

145118	Introductory Genomics & Bioinformatics for Health Research
Subject: HSPH	Catalog Nbr: BST280

145119	Societal Response to Disasters
Subject: HSPH	Catalog Nbr: ID205
Designed for physicians, public health officers, or others who may be charged with responsibility for intervention during crisis situations. The focus will be on societal response to disasters and war as well as decision-making under stress. The course will examine U.S. and international case studies within the established research and policy frameworks for disaster response and humanitarian action.	

145122	Intermediate Modern Chinese
Subject: HGAS	Catalog Nbr: CHN120

145123	Industrial Organization I
Subject: HGAS	Catalog Nbr: EC2610
An introduction to applied work in industrial organization. Static analysis (theory and estimation) of demand systems and cost functions (adverse selection, moral hazard, productivity), and applications of game theoretic concepts of equilibrium. Topics include the determinants of market structure and product availability, merger analysis and antitrust, and contracting and bargaining in vertical markets.	

145124	Labor Economics & Market Insts
Subject: HGAS	Catalog Nbr: EC2810
Theoretical and empirical research on labor markets. Wage determination covers equalizing differences, human capital, job mobility, and incentive models. Labor supply covers life-cycle models. Labor demand includes minimum wage and union models.	

145125	Elementary Korean
---------------	--------------------------

Course Bulletin

Subject: Catalog Nbr:
HGAS KOR_BA

This introductory course is designed to provide a basic foundation in modern Korean language and culture by focusing on the balanced development of the interpersonal (speaking), interpretive (listening & reading), and presentational (formal speech & writing) skills. Students in Korean Ba begin by learning the complete Korean writing system (Hangul), which is followed by lessons focusing on basic conversational skills, cultural competence, and grammatical structures. To provide sufficient opportunities to apply what has been learned in class, there are small group drill sessions, language tables, and a number of other cultural activities.

145126	Civil Society: East and West
---------------	-------------------------------------

Subject:	Catalog Nbr:
HGAS	GV2148

ocusing in particular on European and Asian settings, the seminar examines debates over what civil society is, notions of public space and social capital, and the role of civil society in political transitions.

145127	The Vernacular in South Asia: Language, Culture and Politics
---------------	---

Subject:	Catalog Nbr:
HGAS	SAS183

Language has long been a gateway to South Asia, a region famed for its linguistic diversity and multilingual populations. Language has also been of perennial interest for historians, literary scholars and philosophers. This introductory course will enable you to connect the region with these broader concerns by examining how and why language became significant for comprehending the modern world and how this changed the relationship of individuals, cultures and societies to language. The course makes South Asia the center of its enquiry and will focus on the region's significance for contemporary analyses of language, such as language's links to colonialism, the public sphere, political representation, modern theology and subalternity. It is also designed to deepen your understanding of language and its uses in your life and writing. To that end, we will explore how texts in a variety of genres (literature, history, political tracts and non-academic writing) by diverse writers (academics, public intellectuals and political figures) have made claims about language and its relationship to the self and the world. You will use these readings to produce a mix of academic and non-academic writing through the semester, including a semester long translation project that will relate to your interests outside this course.

145128	Introduction to Islamic Mystical Traditions
---------------	--

Subject:	Catalog Nbr:
HDIV	3620

This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of

Course Bulletin

Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam. Jointly offered in the Faculty of Arts and Sciences as Religion 1802 and Islamic Civilizations 163.

145129	Middle East Ethnography: Discourse, Politics, and Culture
Subject: HGAS	Catalog Nbr: AN2690
<p>The discursive construction of culture and its complex politics are examined in a wide range of ethnographies that have been written recently on countries in the Middle East, including Lebanon, Jordan, Israel/Palestine, Egypt, Morocco, Yemen, and Iran. Among the theoretical topics to be considered are orientalism, colonialism and post-colonialism, nationalism, self, gender, and tribalism.</p>	

145132	Why Our Failure to Confront Hard Legal and Policy Questions Makes Us Less Safe
Subject: HLS	Catalog Nbr: 2739
<p>After the Cold War, America failed to develop a new foreign and national security strategy for the century ahead. Our hubris, complacency and inability to imagine a multipolar world in which some nations and rogue actors reject our political values and economic model have cost us dearly. We over-corrected after the attacks of 9/11 by militarizing our response. Riven by toxic partisanship, Congress has failed to address the hard legal issues, and our legal frameworks are outdated and inadequate. The result is that the United States is less safe.</p>	

145147	The End of the World and What Comes Next
Subject: DHP	Catalog Nbr: P292
2024 SPRG	Primary Daniel Drezner Daniel.Drezner@tufts.edu
<p>The world has been coming to an end for some time now. Take your pick of catastrophe: terrorism, financial crisis, nuclear war, cyber-collapse, natural disasters, climate change, or, hey, devastating pandemic. It seems as if the 21st century has been replete with world-defining catastrophes and we are barely a fifth of the way through it. At the same time, however, it is worth remembering how many times civilization was supposed to come to an end in the past. Parson Malthus predicted a demographic time bomb in the mid nineteenth century. The Club of Rome predicted the depletion of key natural resources in the 1970s. Y2K was supposed to break the Internet on January 1, 2000. Many people embraced the misplaced eschatological beliefs surrounding the Mayan prediction of the end of civilization in December 2012. Even when catastrophes strike, like the Black Death or the 1918/19 influenza pandemic, civilization adapts and overcomes.</p> <p>This course is borne out of the coronavirus pandemic but focused on the larger questions it raises about possible catastrophes and the ability of the world to respond to them. It starts with some theoretical considerations of why societies might not be prepared to cope with looming catastrophic events. These include problems of collective action, time discounting, failures to differentiate risk and uncertainty, normal accidents, bureaucratic politics, millenarian beliefs, and the anarchical structure of international politics. It then considers which kinds of societies and polities are better placed to respond to disasters and catastrophes.</p> <p>The next section considers some of the historical instances in which threats both real and imagined affected</p>	

Course Bulletin

the globe, and how they played out. These threats range from pandemics to famines to nuclear catastrophes to overpopulation to cyber collapse. The third section of the course compares and contrasts the global responses to the 2008 financial crisis and the 2020 covid-19 pandemic. The fourth section of the course considers the post-coronavirus threats to the world, from climate change to the renewed possibility of great power war. The final section considers the role that fictional narratives play in thinking about catastrophes.

145148	Introduction to Nuclear Security: History, Policy, and Theory	
	Subject: DHP	Catalog Nbr: P277
<p>This course offers a general introduction to nuclear security. It provides a comprehensive but concise overview of the topic's main historical, theoretical, and policy dimensions. During the first part of the semester, we will discuss key concepts (fission, deterrence, vertical proliferation, etc.) associated with the post-World War II emergence of nuclear strategy, explore the superpowers' Cold War competition, and study the emergence of new nuclear-weapon states (Britain, China, etc.). Once these conceptual and historical foundations in place, we will investigate the theoretical debates that have divided scholars on seminal questions such as the causes of proliferation, the effectiveness of the international non-proliferation regime (and of counter-proliferation), the impact of nuclear weapons on state behavior (war/peace, coercion, etc.), and the many constraints and forms of resistance that have emerged over time (norms, disarmament, etc.). During the third section of the course, we will examine the post-Cold War emergence of the "second nuclear age," with a specific interest for nuclear terrorism, climate change, nuclear safety, and US primacy. Finally, we will probe the nuclear challenges that have (re)emerged in East Asia (China, North Korea), the Middle East (Israel, Iran), Europe (Russia's nuclear resurgence, NATO's extended deterrence), and South Asia (India, Pakistan). In each class meeting, we will cover these local nuclear powers' historical emergence, their current status, and the US response. The conclusion of the course will survey the latest trends, including prospects for disarmament, the Trump Administration's nuclear policy, and the impact of cyber on command-and-control systems.</p>		

145149	Famine, Livelihoods, and Resilience: Food Security Analysis and Response in Crisis	
	Subject: DHP	Catalog Nbr: D242
<p>After a decade of absence, famine returned with a vengeance in Somalia in 2011, and in 2017-18, there were four countries at imminent risk of famine. While this return highlights the extreme risks of famine, particularly in conflict-affected areas, it also raises again the limited progress made in addressing the underlying causes of severe food insecurity. "Resilience" has been the good word of the decade, but limited progress has been made in building greater resilience among the poorest or most marginalized populations, and the livelihoods of these populations are under more stress now than ever. This class will draw primarily on the international experience of the co-leaders but will attempt to draw on domestic US cases as well. This seminar class will consider new (and some not so new) approaches to this kind of the understanding and analysis of, and response to, food insecurity, hunger and malnutrition among crisis-prone populations.</p> <p>Students can register for this course as either 3.0 or 1.5 SHUs. Students must register for 3.0 SHUs and then contact FletcherRegistrar@tufts.edu to register for 1.5 to have their enrollment adjusted.</p>		

Course Bulletin

145151	How Systems Fail			
	Subject:	Catalog Nbr:		
	DHP	D293		
	2024 SPRG	Primary	David Lillethun	David.Lillethun@tufts.edu
<p>(Cross-listed w/CS 203) Failure of computer systems within the larger context of complex systems, including the power grid and aviation. Failures of algorithms and protocols, engineering and implementation, systems and applications, people and culture. Attacks, attack recovery, security, privacy, and attribution. Case studies of failures and attacks, including distributed denial of service, Meltdown, Spectre, and spear-phishing attacks. Prerequisites: COMP 13 or consent of instructor.</p>				

145226	Security Sector Reform: Conceptual and Contextual Debates in Peacebuilding			
	Subject:	Catalog Nbr:		
	DHP	P202M		
	2024 SPRG	Primary	Abigail Linnington	Abigail.Linnington@tufts.edu
<p>This module is an in-depth primer on the conceptual underpinnings and the record of implementation of security sector reform (SSR) over the past 20 years. The course begins with a brief overview of the historical and theoretical foundations of the field and frequent debates raised by the community of practitioners as well as critics. The course is organized around the SSR model as defined by Jane Chanaa across four dimensions: political, institutional, societal, and economic. Classes will explore the conceptual definitions, institutions and actors, and lessons learned within each dimension and apply the model to case studies. Students will compare SSR implementation when led by the local government, the United Nations, regional organizations, and/or outside states including the United Kingdom and the United States. The course closes with the students' assessment of the SSR as a conceptual tool for peace building and prospects for its future evolution in practice.</p>				

145241	Cyberlaw and Cyberpolicy			
	Subject:	Catalog Nbr:		
	ILO	L295		
<p>This course is an introduction to the complex legal issues of cyberspace. Technology has been evolving faster than the law's ability to handle the changes, so partially this course will be an education in the legislating and policy making of moving targets. It will also be an education in jurisdiction, privacy, surveillance, and copyright as it relates to the Internet. Topics covered will include cyberlaw and cybergovernance, the Digital Revolution and its impact on First, Fourth, and Fifth Amendment issues, copyright in the Digital Age, the Computer Fraud and Abuse Act, and Law of Armed Conflict. The perspective will start from US law and jurisprudence, although we will cover some of the issues from an international perspective.</p>				

145244	Climate Change Economics			
	Subject:	Catalog Nbr:		
	EIB	E253		

Course Bulletin

This course provides an economic overview and analysis of climate change. We will also use the DICE model, a well-known integrated assessment model (IAM) to illustrate and explore key issues in modeling climate change and policy responses.

145255	International Cyber Conflict			
Subject: DHP	Catalog Nbr: P249			
2024 SPRG	Primary	Josephine Wolff	Josephine.Wolff@tufts.edu	
<p>As a domain and instrument of competition and conflict, cyber space enables a range of global actors—including dissidents, terrorist organizations, and states with varying levels of offensive and defensive cyber capabilities—to assert influence, project power, and conduct activities in the increasingly ambiguous areas between war and peace. This course will explore the role of cyberspace in international conflict, including through the use of espionage, disinformation campaigns, and attacks; the course will examine the policies, strategies, and governance structures of key actors that operate within the cyber domain. We will also study why the development of international norms in cyberspace has proved so elusive.</p>				

145272	Global One Health Diplomacy: Holistic Approaches to Global Health Challenge			
Subject: DHP	Catalog Nbr: D253			
2024 FALL	Primary	Adam Kamradt-Scott	Adam.KamradtScott@tufts.edu	
<p>Humanity is slowly, progressively, recognizing the complex interdependencies that exist between human, animal, and plant species, and how what impacts each species' health and well-being also affects the health and well-being of the broader environment and planet upon which we all live. For decades now, human activity leading to increasing levels of urbanization, globalization, industrialization, deforestation, and intensive farming practices has actively contributed towards creating new environments in which diseases can thrive, evolve, multiply, and spread rapidly, even as our changing environment is creating new challenges around biodiversity loss and disease emergence. To mitigate these challenges will require dedicated professionals working across multiple sectors, industries, spheres of influence, and even countries, that are committed to working collaboratively, bringing their respective knowledge and expertise from multiple disciplines to systematically tackle the problems adversely affecting human-animal-environmental health. In sum, we need a new workforce of professionals that possess multisectoral, multidisciplinary expertise that are committed to working multilaterally to address the collective threats to human-animal-environmental health. The aim of this course is to familiarize students with the concept of 'One Health' and the existing institutions, tools, mechanisms, and approaches that have been adopted to help redress the adverse impacts to human-animal-environmental health we are currently observing. The course commences with examining core concepts and the global institutions charged with improving 'One Health' before exploring how the frameworks, tools, and approaches adopted at the international level are then implemented across the regional, national, and subnational contexts, the challenges that currently exist, and some of the problems that cannot be addressed without adopting a 'One Health' approach. At the conclusion of the course, students will have developed a shared understanding of the issues, skills, and tools that they can then apply in their respective professional trajectories to bring policy and One Health communities together to achieve mutual objectives.</p>				

Course Bulletin

145273	Health Security, Emerging Infections & Outbreak Response		
Subject:	Catalog Nbr:		
DHP	D254M		
<p>With increasing globalization of trade, travel and terrorism, public and individual human health have become topics of global concern, involving sovereign nations, international organizations and the scientific community. Threats from emerging infectious diseases outbreaks exemplify this trend. In contrast to the traditional idea of national security, the field of human security focuses on the individual, rather than state, as the nexus of analysis and takes a multidisciplinary approach through which to analyze the challenges related to community, national and global response to emerging infectious diseases epidemics. This course will start by examining human security literature and practice as it applies to infectious diseases threats. It will examine factors leading to increasing frequency of outbreaks due to novel pathogens, such as climate change and environmental degradation, and the concept of One Health. It will then look at the intersection between scientific research and related ethical issues, disease surveillance and global biosecurity issues. Further, the course will examine the historical basis for International Health Regulations and other frameworks for modern global health governance as they apply to outbreaks. Lastly, the class will utilize case studies to examine how outbreak preparedness and response have been managed during recent epidemics such as SARS, H1N1, MERS, Ebola and Zika. This course is meant to foster interdisciplinary perspectives by bringing together practitioners from international law, human development, public health and clinical care.</p>			

145274	Environmental Humanities and Global Health		
Subject:	Catalog Nbr:		
DHP	D255		
2024 SPRG	Primary	Kimberly Theidon	Kimberly.Theidon@tufts.edu
<p>The contemporary challenges arising from global environmental change, such as climate change, land degradation, loss of biodiversity, freshwater scarcity, toxic contamination and energy scarcity, are important issues for scholars from not only the natural and social but also the human sciences. As a result of increasing concerns about global environmental change, over the last decade a new scientific field of research has emerged, the Environmental Humanities (EH). Whereas scholarship on issues of environmental change was formerly dominated by the natural, economic and social sciences — and by technological approaches to problem-solving — this relatively new and rapidly growing field is constituted by the work of scholars from a wide variety of disciplines within the Humanities, including history, literature, philosophy, cultural studies, religion studies, arts, architecture, and linguistics. These scholars are investigating how the human and human agency are to be understood in the age of the Anthropocene —the era in which humans have become a geological force with devastating potential (Croetzen and Stoermer, 2000). Emergent transdisciplinary fields, such as the environmental humanities and global health, reflect a growing awareness that responses to contemporary environmental dilemmas require the collaborative work of not only diverse scientists, medical practitioners, and engineers, but also more expansive publics, including artists, urban and rural communities, social scientists, and legal fields. Environmental Humanities thus marks an effort to explore and channel the creative synergy that is possible when scholars from the humanities, social sciences, and sciences talk across disciplines about the environment and environmental problems. Central to our concerns are the unequal access to resources as well as the unequal exposure to risk during a period of widening economic disparity. The readings in this course have been selected to help us discuss questions that span the disciplines and the</p>			

Course Bulletin

globe: What does it mean to be human in a time of global environmental change? What should environmental ethics look like? How are political, social, and economic structures—and inequities—intertwined with ecological realities? How has our understanding of the relationship between culture and nature shaped our conservation efforts? How do our concepts of nature and of environmentalism need to change in response to our current situation? Scholars in the environmental humanities ask and seek to answer these questions, and to develop more equitable ecologies.

145328	The Cyber Domain and U.S. National Security				
	Subject:	Catalog Nbr:			
	DHP	P271M			
It has been roughly thirty years since "cyber" threats became part of the national security discourse. And yet,					

Course Bulletin

despite several decades of cyber-attacks, policy documents, cyber strategies, legislation, and countless academic articles, the place of cyber in the national security curriculum remains tenuous and underdeveloped. Practitioners worry endlessly about the challenge of cyber threat and hope that cyber weapons and capabilities might provide competitive, even war-winning advantages. Scholars, analysts and students need to catch up to the reality of cyberspace as a contested domain. This course will provide students with a solid foundation for thinking clearly U.S. national security and cyber conflict, especially with other state actors. By the conclusion of the final session students should be prepared to undertake further study on cyber topics and, perhaps most important, be alert to the many myths associated with the field.

2023 FALL	Primary	Josephine Wolff	Josephine.Wolff@tufts.edu	
2024 FALL	Primary	Qitong Cao	Qitong.Cao@tufts.edu	
<p>Artificial intelligence (AI) has become a cornerstone of modern technology, radically changing how we interact with the world and make decisions. From self-driving cars and language translations to criminal sentencing and surveillance, AI systems are embedded in various applications that significantly impact society. As these systems become more pervasive, understanding how they work is crucial for anyone involved in shaping the future of technology and society. This course is designed to provide students with an introduction to AI combining technical and policy perspectives. We will explore the fundamental principles of AI to build a basic technical foundation, which will allow students to better analyze the ethical, legal, and policy challenges associated with AI applications, examining how these issues can be addressed through informed policy-making.</p>

145520	Climate Change: Risk and Adaptation for Food Systems and Beyond			
Subject: DHP	Catalog Nbr: P288			
2024 FALL	Primary	Erin Coughlan	Erin.Coughlan@tufts.edu	
<p>Climate change is one of the most pressing problems in the world today. This course will focus on the projected impacts of climate change around the world and related adaptations, with particular attention to humanitarian impacts and food systems. Students will cover climate risk assessment, risk perception, risk communication, and climate risk management/adaptation. The course will cover major climate impacts by sector, as well as their interactions and humanitarian implications. Each week of class will have two components: a lecture component and a lab component. The lecture will consist of instructor presentation of content as well as student reflection and discussion. The lab will consist of an exercise or simulation of technologies and methods related to climate impact assessment and management. Students will experiment with different methodologies to assess climate risk and identify impact modeling methodologies that are most appropriate for specific applications. Students will learn why people perceive risk differently and experiment with innovative methods to communicate risk. In the risk management section, students will critique alternative risk management strategies and identify equity and justice implications. As a final project, students will develop a proposal for the Green Climate Fund, which is the largest global fund to address climate change. Pre-requisite: Graduate standing or instructor consent.</p>				

145537	Technology and Public Policy

2023 FALL	Primary	Francesca Giovannini	Francesca.Giovannini@tufts.edu	
2024 FALL	Primary	Josephine Wolff	Josephine.Wolff@tufts.edu	
<p>Throughout history, technology has played a fundamental role in shaping international affairs by serving as one of the principal drivers for cooperation, competition, and war among communities, societies, and nation-states. Advances in S&T have always been driven by man's concurrent aspiration for progress and peace and primacy and domination. And in all ages, technologies inevitably brought about extraordinary benefits and daunting risks of weaponization and misuse. This class while trying to make sense of the contradictions, challenges and promises of technology, seeks to encourage students to think critically about these issues. Ultimately, this class hopes to contribute to create a new global generation of analysts and decision-makers prepared to manage the many facets of the future technological revolutions.</p>

145712	Seminar on Urban Africa
Subject: DHP	Catalog Nbr: P276
<p>The city is often used as “a device to read social change” and this seminar draws on urban scholarship and writing to explore African challenges, opportunities and contributions. There are many ways to approach the study of African cities, and this course is my personal take, as both an African and an American, a transnational who visits the continent regularly for work, play and family, and as a researcher, scholar and recent author of a book about African cities. We focus on topics I believe are crucial to our planet today: the environment, migration, economic life, governance, public health and political action. Each week we focus on a specific issue, using one or two cities as case studies, and invite guest speakers from those cities. Students are encouraged to become familiar with at least one city, to study and write about it, possibly plan to visit it, and to engage with someone living in that city. Course readings draw on African scholars and writers as much as possible, from both the humanities and social sciences.</p>	

145727	Advanced GIS
Subject: DHP	Catalog Nbr: P289
2024 SPRG	Primary
Marcia Moreno-Baez	marcia.morenobaez@tufts.edu

Course Bulletin

GIS and Spatial analysis offer a unique and insightful perspective on our world, serving as a distinctive lens through which we explore events, patterns, and processes that unfold on or near the Earth's surface. At its core, spatial analysis resides at the crossroads of human insight and computational power, combining the art of interpretation with the precision of spatial data analysis, modeling, machine learning, deep learning, and AI. This fusion of human expertise with advanced technologies is pivotal in shaping decision-making processes, enabling us to unravel complex spatial phenomena and make informed choices that drive progress and innovation. This course is designed to immerse professionals in training in a rich learning experience, blending lab sessions with hands-on activities and engaging lectures and discussions through a holistic approach. The course not only covers spatial data science but also delves into the intricate realms of machine learning, deep learning, and AI. Participants will gain the knowledge and skills needed to apply these cutting-edge technologies to spatial analyses and decision-making processes. Throughout the course, the emphasis is on practical, real-world applications, including topics such as modeling, suitability analysis, pattern detection, deep learning, neural networks, dynamic visualization, and the nuanced examination of complex spatial datasets. This ensures that students are well-equipped with various quantitative methods, from descriptive to geostatistical methodologies. Finally, decision-making methods and visualization techniques are embedded to ensure we equip students with the practical skills to effectively interpret and communicate complex spatial data. These skills help bridge the gap between data analysis and real-world applications, fostering a deeper understanding of spatial relationships and their impact on decision outcomes. GIS for International Applications is a prerequisite to enroll, and the class is limited to a maximum of 24 students. For more information, visit: <https://bit.ly/3u2xki8>

145730	Grand Strategy			
	Subject: DHP	Catalog Nbr: D252		
	2024 SPRG	Primary	Sulmaan Khan	Sulmaan.Khan@tufts.edu
<p>This course seeks to introduce students to grand strategy. Definitions of that art vary---and we will discuss those variations---but we can start by understanding it as the weaving together of different categories of power to achieve overarching objectives. The best way of understanding grand strategy is to study it in action. This course, therefore, takes us through a series of case studies in grand strategy. Some of these are studies in success, others in failure; most have elements of both (part of the challenge you will face in the course, as well as in real life, will be figuring out what constitutes success or failure). Grappling with them all will hone students' skills in grand strategic thinking: that is, in formulating a policy that is all-encompassing, looks to the long-term, and is sufficiently flexible to survive the real world. Though the course is rooted firmly in security studies and history, the principles of grand strategy are relevant to virtually all aspects of the policymaking world and can be usefully applied to business, activism, and other realms of life.</p>				

145731	Impact Investing			
	Subject: EIB	Catalog Nbr: B283		
	2024 SPRG	Primary	Leticia Emme	Leticia.Emme@tufts.edu
	2024 SPRG	Primary	Quyen Tran	Quyen.Tran@tufts.edu
<p>Impact investments are investments made with the intention to generate positive, measurable social and environmental impact alongside a financial return. As such, they challenge the perspective that social and</p>				

Course Bulletin

environmental problems could only be addressed by government, multilaterals, and philanthropy and that market investments should only seek financial returns. As the world faces unprecedented challenges, the impact investing market plays a critical role in providing much needed capital and strategic partnerships to help address the world's most pressing social and environmental problems. Social issues include access to health care, housing, education, clean water, financial inclusion, and safe work conditions. Environmental challenges include not only climate change, but also biodiversity and sustainable agriculture. This class will focus on impact investing, discerning how it fits among other investing strategies in the broader sustainable investing ecosystem. We will discuss concepts including SRI, ESG, and UN SDGs, debate what is and what is not impact investing, and we will evaluate important tools and resources to measure and manage the social and environmental impact of investments. The format is interactive with a combination of case studies, workshops, lecture, and guest speakers. Goals include: developing fluency on the broader sustainable investing ecosystem, which includes SRI, ESG, UN SDGs, thematic, and impact investing strategies; understanding key characteristics of impact investments and tools to recognize "green-washing" or "impact-washing"; learning the basics of impact management, including industry frameworks, impact measurement tools, different investment vehicles, and best practices. EIB B229 Global Investment Management is a prerequisite for enrollment.

145732	Introduction to Data Science for Global Applications		
Subject: DHP	Catalog Nbr: D258		
2024 SPRG	Primary	Anna Haensch	Anna.Haensch@tufts.edu
Provides an overview of the principles and applications of data science. The first part of the course deals with the acquisition and handling of data, with an emphasis on contextualizing data and framing data analysis. The second part of the course will focus on tools and techniques for data manipulation and visualization. The third part of the course will introduce students to several methods for modeling data. The course will present both theoretical frame-works and practical tools for implementing various algorithms for regression, classification, and clustering. Students will become proficient in Python based tools for data analysis including numpy, pandas, and scikit-learn.			

145733	Business and Political Economy in Latin America I		
Subject: EIB	Catalog Nbr: B277M		
Doing business in Latin America is syncretic and complex. In this part I of Business and Political Economy in Latin America, we discuss the characteristics of the business environment that make Latin America a unique place for doing business. This module examines the business environment in Latin America through a multidisciplinary approach weaving business history, political science, economics and international business. We develop a comparative institutional approach to analyze how the political economy of development, hierarchical market economies, political institutions, state capitalism and corruption have shaped business in the region. This course is designed to be hands-on and interactive. While you will be exposed to both classic readings and new empirical research, the dynamics in the classroom will favor interactive group work and case analysis. At the end of this course, you will develop a deeper and multidisciplinary understanding of the business environment in Latin America.			

Course Bulletin

145734	Business and Political Economy in Latin America II
Subject: EIB	Catalog Nbr: B278M
<p>Creating and delivering value for customers, although necessary, is not a sufficient condition to establish and sustain competitive advantage in Latin America. Successful business models leverage both the market and institutional environments. While the Part I of Business and Political Economy in Latin America provide a deeper understanding of the institutional environment that has shaped businesses in the region, in this Part II, we draw from strategy, innovation, and the international business literature to take a managerial standpoint and focus on the decisions regarding the strategy and organization of local and foreign multinationals in Latin America. Although highly desirable, the Part I of the course is not a prerequisite to Part II. This course was designed to be hands-on and interactive. While you will be exposed to both classic readings and new empirical research, the dynamics in the classroom will favor interactive group work and case analysis. At the end of this course, you will be familiarized with winning strategies in Latin America, the dilemmas managers face while organizing and strategizing in the region, and will improve your analytical skills to make informed business decisions when doing business in Latin America.</p>	

145735	Water Policy and Governance
Subject: DHP	Catalog Nbr: P259
<p>Every day, multiple times a day, you interact with freshwater. Yet, how often do you think about the policies and management practices in place that bring clean, fresh water to your tap? For most of us, particularly those in the United States and other industrialized countries, we seldom think about it –it is almost a resource we can take for granted, knowing it will be there when we turn the tap. However, for much of the world, this is not the case. This course will ask you to dive deeper (pun intended) into the policies, governance, and management practices that ensures water is in the tap, as well as those that may limit the access and availability of water. We will look at the broad topic of water policy and governance from a multiscale lens, focusing on the subnational and international scales. The course is divided into three sections: 1) water foundations, 2) subnational policies and governance, and 3) international policy and governance. This course is open to those without experience with freshwater as a resource, and the first section provides a common foundation and language to further our discussion. The next section on subnational policies and governance will explore core issue areas affecting decision-making for the governance and management of water resources at the subnational level. We will close by adding complexity and scaling the discussion to the international scale. At this scale, the course explores the influence of international water law and politics on the governance of transboundary waters. Students will practice developing policies at the national level and negotiating agreements over the sharing of transboundary water resources.</p>	

145736	Climate Change and Security
Subject: DHP	Catalog Nbr: P278
<p>From sensational news headlines about resource wars to measured, consensus-based reports that warn of potential instability caused by climate change: the discourse around climate and security varies widely. This course will explore the evolution of that discourse from the early environment and security literature of the</p>	

Course Bulletin

1980s and 1990s to current empirical studies and government reports on the impact of climate change on national and global security. Looking at root causes, impacts, and responses to climate insecurity, the course aims to provide students with a comprehensive understanding of this complex field. By the end of this course, students will be prepared to think through policy options that consider the evidence-based security implications of issues like climate-induced migration, resource scarcity, and natural disasters.

145743	Sustainable Development and Global Human Rights			
Subject: ILO	Catalog Nbr: L227			
2024 SPRG	Primary	Chidi Odinkalu	Chidi.Odinkalu@tufts.edu	
<p>In an age of multiple crises for international law and relations and for multilateral institutions, it is essential to deepen the study of the relevance and function of international law to the shared challenges of coexistence, development and survival of human communities. This course on Sustainable Development and Global Human Rights (SD-GHR) is framed to focus attention on the role of human rights and its mechanisms globally in complementing the contemporary challenge of sustainable development. An emphasis in the course will be on illustrating how the norms and mechanisms of international human rights law and sustainable development coexist around five themes: data and digital participation; hunger; water; health and knowledge management; and reduction of violence and access to remedies.</p>				

145744	Economic Theory and Policy			
Subject: EIB	Catalog Nbr: E219M			
<p>This course applies economic theory to current issues and policy. The course considers various economic modeling strategies, the roles of positive and normative analyses, the relationship between theory and data, models of rational and behavioral economics, welfare economics, externalities and public goods, models of the firm and other types of organizations, and discrimination in national and international transactions and within organizations. The course considers also instruments of government spending and financing, and how monetary policy can affect real economic activity. Course Prerequisites: E201, E211, or permission of the instructor.</p>

145797	Development in a Digital Age
Subject: DHP	Catalog Nbr: P267M
<p>For decades, a community of practice called “Information and Communication Technologies for Development” (ICT4D) has championed the use of technologies to pursue lofty aspirations like the UN’s Sustainable Development Goals. Lately, that community is reinventing itself as “Digital Development”. This reinvention reflects additions to the underlying technologies –satellites, AI, biometric identity, etc. -- but also, a changing understanding of the roles complex digital systems play in shaping economies and societies on a crowded, warming, interconnected world. This class will examine the history, unresolved tensions, and current state of the art in Digital Development, across topics such as health, livelihoods, sustainability, financial inclusion, agriculture, trade, and more. We’ll identify key actors (from governments and development institutions to NGOs and the new internet giants), apply useful toolkits and frameworks from practice, and explore insightful theoretical perspectives from a variety of disciplines.</p>

2024 FALL	Primary	Abiodun Williams
		Abiodun.Williams@tufts.edu
<p>Provides an introduction to the essential subject of leadership, focusing on the relationship between contextual factors and leadership. This course begins by reviewing theories of leadership, including normative and empirical traditions. It then explores the role of the Secretary-General of the United Nations and the leadership of two previous holders of the unique job in world politics. It then turns to the executive heads of various agencies and programs in the UN system and their roles in meeting the demands for leadership at the global level. The course considers the work of the World Bank's president in defining the Bank's contours and methods for international cooperation. It explores the functions of the African Union and its Chairperson in responding to Africa's needs and aspirations. It examines global philanthropy which has become a significant force in global cooperation in recent years. It analyzes the transformation in the nature and importance of the role of NGOs in the global arena, with a particular focus on the contributions of think tanks and global policy networks.</p>		

146007	Global Decolonization	
Subject:	Catalog Nbr:	
DHP	H250	
2024 FALL	Primary	Elisabeth Leake
		Elisabeth.Leake@tufts.edu
<p>(Cross-listed as HIST 206) Decolonization is one of the most significant historical phenomena of the modern world. The end of empires across the nineteenth and twentieth centuries gave way to the international system in which we live today: one constituted of politically independent nation-states. This course, drawing on historical methodologies, explores how decolonization was often a fraught, contested process that shaped</p>		

Course Bulletin

not only the international system but also forms of nationhood and statehood, modes of political and social mobilization, and definitions of individual rights. Special attention is paid to the “Global South” as a crucial arena through which local, national, and international relations were forged, and we will further reflect on “decolonization” as the past versus “decolonization” as method.

146019	Security of the Black Sea Region				
	Subject:	Catalog Nbr:			
	DHP	D281			
<p>The security situation in the wider Black Sea area has been transformed over the past few decades—and especially over the past year. With dissolution of the Eastern bloc and Soviet Union the region has seen an influx of new players. This new diversity of actors has created new international groupings –EU, OSCE, NATO, BSEC, GUAM and more. The security situation is dynamic, with multiple frozen conflicts and an ongoing hot war between Russia and Ukraine. The Black Sea area has seen a wide array of security concerns ranging from more traditional “hard” ones (vividly demonstrated by the 2008 war between Russia and Georgia) to the once unconventional “soft,” security issues, including energy and environmental security, the problems of migration, trafficking in humans, weapons and drugs, socio-economic underdevelopment, lapses in democracy, human rights and good governance. The regional security complex provides rich material to be studied. The Russian attack on Ukraine has multiple implications for the security of the region.</p>					

146020	African Politics and Development				
	Subject:	Catalog Nbr:			
	DHP	P211M			
<p>This module, with the aid of geo-economics, geo-politics and meta-geopolitics, explores the political and economic dynamics of postcolonial Africa from a macro-level perspective. The overarching aim is to critically examine the key dimensions of processes which shape the political and economic realities of the continent. The module presents and addresses theoretical and policy-relevant deliberations that may be of interest not only to those who are eager to learn about Sub-Saharan Africa beyond stereotypical perspectives but also to those interested in the global experiences of countries situated at the lowest-rungs of the world pecking</p>					

Course Bulletin

order. Beginning with a macro level depiction and then moving to selected topics, the module will illuminate the complexities of the Westphalian state model in Africa, with emphasis on the legacies colonialism, Pan-Africanist imperatives attending decolonization/independence in the context of the Cold War, the spectre of political instability, the experiences of neoliberal economic and political reforms after the Cold War as well as the pressures and mitigation strategies in the age of anthropocene. Each week will be dedicated to specific topics which boarder on the political role of the state in economic development, policy options and reforms.

146021	The Role of Economic Statecraft in International Politics
Subject: DHP	Catalog Nbr: H220
<p>For decades, economic statecraft was viewed as the forgotten stepchild of foreign policy analysis. The use of force was the ne plus ultra of international relations; economic sanctions were viewed as a symbolic afterthought. Over the past three decades, however, the explosion of economic statecraft has required a rethink of this policy instrument. This course will offer a survey of analytical approaches to economic statecraft, as well as an assessment of prominent cases in economic history. It starts with a conceptual survey of what is under the umbrella of “economic statecraft,” with a special attention to sanctions in particular. The next section conducts a brief historical survey of sanctions, with a special emphasis on the cases that led to rethinks about the use of the policy option. The last section considers current practices on sanctions, in the United States and elsewhere, with a eye on what the future holds.</p>

146132	Leadership in the Public Sphere
Subject: DHP	Catalog Nbr: D288
2024 SPRG	Primary
Carlos Alvarado Quesada	Carlos.Alvarado@tufts.edu
<p>Why is it necessary to have public leadership? What are the motivations behind it? To what ends is leadership oriented? Today's world is in a transition from traditional male, white, northern leadership visions, to more diverse, feminine, and decolonized leadership approaches which are still unfolding, while coexisting with phenomena such as populism, patriarchalism and corruption. The intent of this course is to contrast these realities. The objective of this course is to explore the nature of public sphere leadership in various dimensions, to contribute to the student's growth in understanding of contemporary public leadership, and to provide conceptual and practical tools for understanding it, connecting with it, or exercising it.</p>	

146133	Cultural Diplomacy: Theory and Practice
Subject: DHP	Catalog Nbr: D273
<p>Provides an in-depth look at how culture has been harnessed by nations to advance their interests worldwide. Beginning with a review of core definitions and principles, the course will move on to an examination of case studies from different countries throughout history to understand why this key element of soft power has come to be so valued by many nations and why it is an underdeveloped resource for others. Finally, the course will conclude with the development of scenarios for how cultural diplomacy may be utilized to address contemporary foreign policy challenges.</p>	

146173	Reparation in International Law
Subject: ILO	Catalog Nbr: L246
2024 SPRG	Primary
Photini Pazartzis	Photini.Pazartzis@tufts.edu
Offers a critical reflection on the evolution of the legal regime applicable to repairing wrongs under	

Course Bulletin

international law. It will look at the codification of the principle of reparation and its forms by the International Law Commission in its Articles on State Responsibility for Internationally Wrongful Acts, and then at reparation(s) in practice, including novel forms of reparation outside the traditional framework codified by the International Law Commission. We will examine the jurisprudence of international courts and tribunals and the practice of other international bodies in interpreting and applying the principles and standards of reparation across the spectrum of international law, international investment law, international human rights law, international criminal law. At the end of the course, students are expected to develop an understanding of the international legal frameworks governing reparation for violations of international law, and strengthen their skills in legal analysis, interpretation and argument. In addition, students will develop critical skills, identifying areas of debate reflected in international jurisprudence and practice within the broader context of law, policy and interdisciplinary considerations.

146189	Case Study Methods Research			
	Subject:	Catalog Nbr:		
	DHP	D246M		
	2024 FALL	Primary	Karen Jacobsen	karen.jacobsen@tufts.edu
Explores the use of case studies from a theoretical, methodological, and practical perspective. The goal is to understand the advantages and disadvantages of the case study method and its place in a mixed methods research design. We examine the tasks and problems involved in all stages of case study development. The goal of the course is to equip students with the knowledge and skills to implement a sound case study, either as part of a capstone or a PhD dissertation.

Subject: GMA	Catalog Nbr: D200			
2023 SUMR	Primary	Kimberley Wilson	Kimberley.Wilson@tufts.edu	
2024 FALL	Primary	Eileen Babbitt	eileen.babbitt@tufts.edu	

Course Bulletin

2024 FALL	Primary	Diana Chigas	diana.chigas@tufts.edu
2024 FALL	Primary	Diane Ryan	Diane.Ryan@tufts.edu
<p>The aim of this year-long lab is to link the leadership and negotiation skills introduced in the first residency and subsequent terms to the strategies and practices of GMAP students themselves. Our hope is that armed with the knowledge of their own leadership styles and negotiation strategies, they will leave Fletcher with a firm set of goals and action steps that will assist them in achieving their vision of a meaningful career.</p>			

146308	Cyber Policy Analysis and Risk Management		
Subject: GMA	Catalog Nbr: D290		
2024 SPRG	Primary	Josephine Wolff	Josephine.Wolff@tufts.edu
<p>Looks at cyber policy, risk management, and compliance challenges facing global leaders today, ranging from data breaches and cyber attacks to issues of online speech, censorship, and intermediary liability. It will cover tools for how organizations manage cyber risk, as well as approaches to crafting both public and private sector cybersecurity policies with a particular focus on dealing with an evolving threat landscape and designing realistic, tech-informed policy.</p>			

146309	Policy Lab		
Subject: GMA	Catalog Nbr: P243		
2024 SPRG	Primary	Kimberley Wilson	Kimberley.Wilson@tufts.edu
2024 SPRG	Primary	Melita Sawyer	Melita.Sawyer@tufts.edu
<p>Using Fletcher's own eight question method (8QM) to help leaders formulate sound policy, this workshop examines both high level government or IO policy ideas as well as ground level organizational policies. We also examine business policies in the form of business plans. The workshop takes students through the steps of establishing an evidentiary base or evidence gap, root cause analysis, solution proposals, assumption testing, policy strategy for key stakeholders, and policy communications.</p>			

146311	International Security Simulation		
Subject: GMA	Catalog Nbr: P238		
2024 SPRG	Primary	Richard Shultz	richard.shultz@tufts.edu
2024 SPRG	Primary	Michael Sullivan	Michael.Sullivan@tufts.edu
<p>The red team simulation is a scenario driven exercise focused on building better plans through groupthink mitigation, cultural empathy, and alternative future analysis tools and methods. Scenarios come from real world international conflict areas and are developed by subject matter experts in that area.</p>			

146312	Public Policy Formulation and Practice		
Subject: GMA	Catalog Nbr: P269		

Course Bulletin

2024 SPRG	Primary	Carlos Alvarado Quesada	Carlos.Alvarado@tufts.edu
<p>Examines how public policies are designed, implemented, and evaluated. This course explores both the theory and practice of the policy process with the level of analysis being at the national level and including comparative analysis in a global context. The course provides a conceptual framework for creating public policies and uses real cases of policies from different settings and contexts from the real-world public challenges - such as climate change housing, public health, digital transformation- in order to build skills of framing the values behind policy design decisions, examining the root causes of policy problems, stakeholder engagement, developing policy recommendations based on evidence and analysis, and evaluating policy solutions from diverse stakeholder perspectives.</p>			

146313	Arts of Communication		
Subject: GMA	Catalog Nbr: P234	2024 SUMR	Primary
	Lawrence Quartana	Lawrence.Quartana@tufts.edu	
<p>This course is intended to help you become a significantly more persuasive and effective public speaker—someone who speaks with the ease, confidence, clarity, and modes of persuasion that are critical in today’s nonprofit, policy, and diplomacy worlds. The course is intended to help you develop your own personal style by deepening your understanding of the persuasive tools, recommendations, refutations, modes of analysis, and variations in audiences that motivate listeners to turn business, policy and diplomacy ideas into action.</p>			

146314	Addressing Global Environmental Challenges		
Subject: GMA	Catalog Nbr: P250	2024 FALL	Primary
	Kelly Gallagher	Kelly.Gallagher@tufts.edu	
	Melissa McCracken	Melissa.Mccracken@tufts.edu	
<p>The goals of this course are to understand the intersection of complexity theory in addressing global environmental challenges; assess and compare the role can leadership play in solving environmental problems; explore three of the most pressing environmental challenges: plastics, climate, and water; learn and apply three types of skills that leaders will use regardless of sector in addressing these and similar challenges.</p>			

146315	Global Security Governance: International Law and Institutions		
Subject: GMA	Catalog Nbr: L247	2024 FALL	Primary
	Ian Johnstone	ian.johnstone@tufts.edu	
<p>Focuses on the law and practice of global governance institutions in the field of peace and security. It introduces the concept of global governance and the various institutions involved: formal inter-governmental organizations (such as the United Nations); informal inter-governmental institutions (such as the G-20); non-governmental actors (both NGOs and business); and public-private partnerships. The course then turns to selected issue areas: the use force, conflict management, human security, and health security. In each issue area, we look at institutions, law, and practice – painting a picture of how global governance actually</p>

functions.

146316	The International Legal System			
Subject:	Catalog Nbr:			
GMA	L202			
2024 FALL	Primary	John Cerone		John.Cerone@tufts.edu
Provides the basic introduction to international law and the principal system in which it operates – the international legal system. Topics include the nature and structure of the international legal system, sources of international law, states & other subjects of international law, the law of treaties, and the law of state responsibility.				

146317	Global Economic Governance: Sustainable Trade and Investment			
Subject:	Catalog Nbr:			
GMA	L253			
2024 FALL	Primary	Joel Trachtman		joel.trachtman@tufts.edu
Focuses on the relationship between globalization in the form of international flows of trade and investment, and sustainability, including climate change, other environmental policy, development, health, and other areas of non-commercial public policy. It explores the ways in which international law addresses these issues through legislative techniques, including special exceptions as well as integrative rules, through dispute settlement, and through international organizations. It provides an opportunity to examine forms and strategies of leadership in settings with multiple concerns and multiple horizontal and vertical nodes of authority.				

146318	Data Driven Decision Making in the World of Machine Learning and AI			
Subject:	Catalog Nbr:			
GMA	P281			
2023 SUMR	Primary	Abani Patra		Abani.Patra@tufts.edu
Data driven equitable decision making is a core competency of strong and sustainable leadership. In this skill summit we will explore traditional methodology for such use of data and its rapid transformation with methodologies from Machine Learning and Artificial image. We will reinforce these ideas with suitable case studies.				

146319	Global Leadership			
Subject:	Catalog Nbr:			
GMA	D212			
2024 SUMR	Primary	Diane Ryan		Diane.Ryan@tufts.edu
Global leadership is the process of influencing individuals, groups, and organizations representing diverse cultural, political and institutional systems toward achieving a stated goal. This course utilizes a multi-layered systems approach to explore the theories and empirical evidence related to effective leadership in a global context. Integrating concepts from a broad range of social and behavioral science disciplines, this course will				

Course Bulletin

enhance students' capabilities to lead themselves, teams and organizations in preparing to face the world's most complex challenges.

146320	Global Economy			
Subject:	Catalog Nbr:			
GMA	E229			
2024 SUMR	Primary	Bruce Watson	Bruce.Watson@tufts.edu	
<p>Provides an introduction to selected economic issues and to basic economic principles and methods. The economist John Maynard Keynes wrote that "the ideas of economists and political philosophers, both when they are right and when they are wrong, are more powerful than is commonly understood." Economics is not primarily a set of answers, but rather a method of reasoning. In this class, we apply that reasoning to a variety of global economic topics. After a review of basic economic tools, we will study market structures and the role of multinational firms, economic growth, the loanable funds market, exchange rate dynamics and the role of monetary policy in domestic and international affairs. The goal of the course is not to provide a comprehensive or intensive study of the discipline, but rather to highlight several topics of special importance in current international economic affairs.</p>				

146321	Political Analysis: International Politics			
Subject:	Catalog Nbr:			
GMA	D227			
2024 SUMR	Primary	Jeffrey Taliaferro	jeff.taliaferro@tufts.edu	
<p>Examines contemporary international politics. We study how different types of states—great powers, regional powers, and small states—attempt to adapt to the changing strategic environment of the twenty-first century. Guiding questions include: How do shifts in the international distribution of power create threats and opportunities for these states? How might domestic political dynamics of these states and the belief systems and perceptions of their leaders shape the types of foreign policies pursued, as well as states' ability to efficiently adapt to changing international dynamics? Topics include: the new era of great power competition (the United States, China, and Russia), alliance dynamics, the future of international organizations, the intersection of energy and geopolitics, and the emergence of disruptive technologies.</p>				

146356	South Asia in the World: Political and Historical International Relations			
Subject:	Catalog Nbr:			
DHP	H275			
2023 FALL	Primary	Elisabeth Leake	Elisabeth.Leake@tufts.edu	
<p>South Asia has a long history of international engagement, whether in the form of transnational anti-colonial mobilization, diplomatic encounters with states and international organizations, or the movement of South Asian peoples and cultures across the world. This course explores South Asia's significance in global politics, with a particular historical focus on the twentieth century. It examines a number of case studies in which national, regional, and international political impetuses have intersected, placing emphasis on South Asians as key actors who have played leading roles in defining the parameters of nation-state politics and global governance in the era of decolonization and the Cold War. In so doing, it uses South Asia's history to offer a history of international relations from a Global South perspective.</p>

146406	Policy Memo Development			
	Subject:	Catalog Nbr:		
	GMA	D298		
	2024 SPRG	Primary	Kimberley Wilson	Kimberley.Wilson@tufts.edu
<p>The Policy Memo represents the culmination of knowledge and skills gained during the Policy Lab which takes place during the March Residency. While the outcome of the Policy Lab is a policy pitch where students address a policy problem or opportunity delivered through a TED-Style talk, the Policy Memo is a written document that analyzes the same theme they explored in the Policy Lab. The Policy Memo outlines current policy gaps (backed by evidence) and proposes policy recommendations (also backed by evidence) in light of their chosen policy theme.</p>				

146500	The Policymaking Process			
	Subject:	Catalog Nbr:		
	DHP	P227		
	2023 FALL	Primary	Alexander Pascal	Alexander.Pascal@tufts.edu
<p>Provides foundational knowledge and skills for the design, formulation and implementation of public policy. The course will cover the philosophies and values underpinning public policymaking, the processes and actors involved in making policy, and the skills and structures required to do so effectively. The course will cover issues including: problem/issue identification and prioritization, evidence-based policy analysis and design, various policy tools and levers, stakeholder mapping and engagement, interagency policy development, bureaucratic culture and politics, constraints on policymakers, senior-level decision-making, communications, and ensuring effective implementation. Students will gain an understanding of the reasons why governments make public policy, the opportunities and limits of public policy, and practical experience in how policy is developed, decided and implemented. Special attention will be played to role of politics, power, and the institutional and public ecosystems in which policy is made in practice. The course primarily takes the perspective of a policymaker in the executive branch of government.</p>				

146501	International Affairs Writing			
	Subject:	Catalog Nbr:		
	DHP	D215M		
	2023 FALL	Primary	Tara Sonenshine	Tara.Sonenshine@tufts.edu
<p>This course is designed to strengthen the writing and communications skills of international affairs students and practitioners through hands-on writing training, workshops, critiques, and development of op-eds, writing samples, long-form pieces, and academic materials. By working with a professional foreign policy journalist,</p>				

Course Bulletin

you will deepen your skills of writing and argumentation for different formats including policy papers, research papers, memos, articles, short form, etc. We will work on how to build a strong evidence-based argument and write analytically. We will critique writing and explore multiple drafts, outlines, and finished products. We will strengthen the art of revising your writing so you can feel confident with any writing assignment. From the basic tenets of writing, we delve into specific ways to enrich original writing for different audiences. Students come away comfortable with writing, and knowledgeable about how to find writing resources and to seek support and how to revise their own work.

146514	U.S.-China Security Relations			
Subject:	Catalog Nbr:			
DHP	D272			
2023 FALL	Primary	David Logan	David.Logan@tufts.edu	
<p>China's rise is arguably the most important development of the 21st century and relations between the United States and China touch on every aspect of international affairs, from addressing climate change and responding to global pandemics to limiting the spread of nuclear weapons and promoting economic development. Relations between these two countries have the potential to touch every element of international affairs. In recent years, U.S.-China relations have become increasingly "securitized," meaning that security considerations dominate. This course provides a survey of these relations today. While the course includes historical elements and considers how both China and the United States interact with the rest of the world, this course is strongly focused on contemporary security issues in the bilateral relationship.</p>				

146515	Small States, Asymmetry and Influence			
Subject:	Catalog Nbr:			
DHP	D227M			
2024 FALL	Primary	Carlos Alvarado Quesada	Carlos.Alvarado@tufts.edu	
<p>More than 190 countries are members of the United Nations, and more than half of them can be considered small states in some way. The study of International Relations (IR) has primarily focused on the "big powers," despite the significance of small states in understanding and navigating the current global landscape. While there is no consensus on the best definition of small states, they play a critical role in shaping today's world. The increasing influence of small states and their organizations in multilateral discussions is undeniable. The Forum of Small States (FOSS), which was established by Singapore, the Alliance of Small Island States (AOSIS) that emerged in response to the Climate Crisis, the Caribbean Community (CARICOM), and the Central America Integration System (SICA) are just a few examples of the diverse groupings of small states which are relevant international and multilateral players.</p>				

146516	The Great Transformations in the Contemporary Middle East			
Subject:	Catalog Nbr:			
DHP	H266M			
2023 FALL	Primary	Salim Tamari	No Email on file.	
<p>Examines four great transformations in the contemporary Middle East through biographic trajectories. It will look at the modern and early modern urban social history of the Middle East through the prism of biography and autobiographical writings and how it relates to policies and practices in the current context. Participants</p>				

Course Bulletin

will read and discuss key texts on the structural transformations that engulfed the Middle East: The End of the Ottoman Era and the rise of the colonial states under British and French Mandates; Nationalism and the Nasserist Movement; the Rise of Revolutionary Radicalism; and the Arab Spring and its Aftermath. A number of interpretive social science texts, as well as original diaries, memoirs and autobiographies from a number of Middle Eastern countries.

<p>Advances in technology, emergent social issues and pressing environment challenges are elevating the importance of corporate sustainability. Independent of the chosen designation (CSR, corporate responsibility, ESG...) an array of stakeholders (including NGOs, employees, consumers, communities, investors, and the</p>				

Course Bulletin

planet) are expanding the boundaries of responsibility and elevating expectations for corporate executives. This course provides students with an understanding of the nomenclature, frameworks, and analytical tools needed to effectively integrate sustainability and responsibility into the management of a corporation.

146652	Technological Innovation and International Security			
Subject: DHP	Catalog Nbr: P232			
2024 SPRG	Primary	David Logan		David.Logan@tufts.edu
2024 SPRG	Primary	Peter Dombrowski		Peter.Dombrowski@tufts.edu
<p>Technological innovation has long had important implications for international security, from the longbow and the internal combustion engine to the aircraft and the carrier. This class studies the impact of technological innovations on international security. The aim of the course is to equip students with analytical frameworks useful for thinking about the causes and consequences of technological innovation for international security, technical literacy in key legacy and emerging military technologies, and an understanding of the impact of these technologies for patterns of interstate conflict, competition, and cooperation.</p>				

146654	Africa's Global Politics			
Subject: DHP	Catalog Nbr: P284			
2024 SPRG	Primary	Abiodun Williams		Abiodun.Williams@tufts.edu
<p>Africa is playing a rapidly increasing and important role in global politics in the 21st century. Its role in the international system has largely been analyzed from the perspective of external actors, and African states have been assumed to be passive actors. Diverging from orthodox and conventional approaches, this course does not treat Africa as a bystander or powerless victim. It focuses on Africa's agency as a particular lens through which to view its global politics, not just the impact of external actors and processes on the African continent. It analyzes the degree to which African political actors have space to maneuver and exert influence within the international system. It explores the ability of Africa to make meaningful contributions and to lead international efforts on key global issues.</p>				

146655	China and International Business			
Subject: EIB	Catalog Nbr: B269			
2024 SPRG	Primary	Jonathan Brookfield		Jon.Brookfield@tufts.edu
<p>International business refers to business activities that involve the transfer of goods, money, information, and/or people across national boundaries. In a truly global economy, such transfers would occur around the world without restriction. Today's world falls short of such an ideal, but changes in the connectedness of the world economy generate new opportunities and challenges, and in recent years, Chinese companies and Chinese economies have been at the center of many of those changes. This course aims to help students understand the organization, structure, and functioning of several different Chinese economies and companies as well as some of the issues faced by businesses going international. In so doing, it is hoped that the class can assist students in developing their own points of view regarding potential international business opportunities and challenges.</p>				

Course Bulletin

146656	Revolutions: Theories and Histories			
Subject:	Catalog Nbr:			
DHP	H246			
2024 FALL	Primary	Elisabeth Leake		Elisabeth.Leake@tufts.edu
<p>Revolutions have been responsible for some of the greatest political, social, economic, and cultural changes in human history. But what is a revolution? What sort of change does it induce, and what are its causes? What leads a revolution to fail? This course explores the history and meaning of revolutions by taking a theoretical and comparative historical approach. Students will first explore different sociological theories of revolution before studying a series of case studies in order to develop their own views about how to define and understand revolutions. The course is intended to provide students a framework through which to understand revolutions, as well as to encourage them to apply these frameworks to various historical and contemporary case studies.</p>				

146657	Conflict Management in a Polycentric World Order			
Subject:	Catalog Nbr:			
DHP	D262			
2024 SPRG	Primary	Tamirace Fakhoury		Tamirace.Fakhoury@tufts.edu
<p>As conflicts have become more diffuse and fragmented in a “multiplex” world order, conflict management has equally become distributed, polycentric, and fuzzy. A plethora of actors including governments, states, organizations as well as informal actors seek to shape conflict outcomes and intervene at different stages of the conflict resolution (CR) process. Against this backdrop, how do various actors’ strategies compete, interact, and intersect at the same time? The course is structured around three core parts: theory, methodology and case studies. The first part introduces students to theoretical frameworks that inform the field of conflict, conflict management and polycentric governance. The second part discusses various methods that enable students to “see” and “analyze” polycentricity as well as evaluate its impact in conflict management. The third part provides a palette of case studies that explore multi-actor interventions in violent/armed conflict, negotiations in peace processes, and multi-scalar peacebuilding initiatives etc. The course offers a variety of interactive activities such as in-class discussions, group work, guest lectures and a final role-playing exercise.</p>				

146658	Identity Politics of East Asia			
Subject:	Catalog Nbr:			
DHP	P279M			
2024 SPRG	Primary	Aram Hur		Aram.Hur@tufts.edu
<p>The axis of global competition continues to shift eastward. Although East Asia is increasingly pivotal to the economic and political stability of the world, it is also a region that long suffers from stereotypes and mischaracterizations. Specifically, the idea that ethnic homogeneity precludes vibrant identity politics in the region is not only false, but also leads to a shallow and often inaccurate understanding of what drives conflict and cooperation in the region. This course dives into the identity politics of East Asia, illuminating how it shapes everything from elections, domestic stability, international conflict, and democratic viability in the region. New and seasoned students of East Asia alike will walk away with a more nuanced understanding of</p>				

Course Bulletin

the identity issues that underlie the contemporary politics of East Asia.

Subject: DHP	Catalog Nbr: D229M
2024 SPRG	Primary
Nadim Rouhana	Nadim.Rouhana@tufts.edu
<p>Over the past years, the various forms of intersection between religion and nationalism have increasingly been invoked as potent forces in framing and perhaps driving national and international conflicts. This module examines the processes and mechanisms by which religion and religious claims, through their intertwining with nationalism, influence state policies—particularly in relation to conflict and interethnic relations in multiethnic states. The course will comparatively examine if state politics, when determined by or framed in terms of nationalism fused with religious claims, have the potential to provoke protracted conflicts, infuse explicit religious beliefs and theories into politics and modes of governance, legitimize the exclusion of groups—including of fellow citizens—on the basis of interpreting sacred texts, and condone or instigate violence in the name of religiously embedded claims. The course will also examine what types of interaction are needed between religion and nationalism in order to reduce or mitigate intergroup conflict.</p>

146878	Sustainable Finance and Investment
Subject:	Catalog Nbr:
EIB	B248
2024 FALL	Primary
Patrick Schena	patrick.schena@tufts.edu
<p>Designed for students with prior coursework and/or practice in finance and investments and interested in understanding the effects of environmental, social, and governance factors on financial decision-making. These include risks posed to the firm and its stakeholders resulting from such factors, as well as risks posed by the firm to its extended stakeholders. The course is structured as an intermediated seminar, i.e. sessions will be facilitated by lecture slides with active engagement expected. The course will examine key themes and developments in regulation, financial reporting, sustainability assessment (or ratings), investment analysis, and capital sourcing across a range of financial markets and asset types, including public equities, public debt, private equity, and infrastructure. Across asset types, key themes include climate risks and financing climate transition, blended capital and innovations in development finance, and fintech, financial inclusion and democratization. Central to the course design is to examine financial strategies and vehicles as tools to advance sustainability and impact objectives whether at the investor, state, or multinational level. To this end,</p>	

Course Bulletin

it will introduce and leverage a variety of analytic tools to understand the basic decision models of sustainable and impact investing.

146879	The Energy Transition			
	Subject: DHP	Catalog Nbr: P258		
	2024 FALL	Primary	Eric Hines	Eric.Hines@tufts.edu
<p>Consideration of engineering concepts relevant to the global transition from fossil fuels to renewable sources of energy. Interface between policy and technology in the energy sector and its relevance to decision making. Offshore wind energy is used as an example to illustrate the convergence of technology, infrastructure, policy, and markets that is necessary to achieve a just and equitable energy transition. Course is open to juniors, seniors, and graduate students from across the university.</p>				

146882	Strategic Management Module			
	Subject: EIB	Catalog Nbr: B238M		
	2024 FALL	Primary	Bhaskar Chakravorti	Bhaskar.Chakravorti@tufts.edu
<p>Effective strategists can: size up the dynamics of the external environment of a firm, covering its economic, political, and social contexts; take a holistic view across all functions and configure all of a firm's internal choices to give it a competitive advantage; sustain this advantage over time and leverage it into adjacent business and geographic opportunities; use acquisitions and alliances when these are the more effective approaches to support a strategy; create the right organizational context to execute the chosen strategy efficiently; ensure the continuous renewal of the firm in anticipation of and adapting to its changing environment. The objectives of this short course are to master the field's core concepts and to build the skills needed to be an effective strategist.</p>				

146908	Peace and Democratization Processes: Cross-Comparative Perspectives			
	Subject: DHP	Catalog Nbr: D266		
	2024 FALL	Primary	Tamirace Fakhoury	Tamirace.Fakhoury@tufts.edu
<p>This course is about peace governance and the twin processes of peacebuilding and democratization in post-conflict societies. It examines patterns of governance after conflict, and their complex relationship with the quality of democracy, authoritarian resilience, and sustainable peace. The course addresses the following questions: How do post-conflict societies navigate the complex journey of peace and democratization? What are the trade-offs between peace and democratization? What role do various actors play in shaping peace and democratization outcomes? Lastly, how do practitioners go about sequencing peacebuilding activities? Students will gain analytical and conceptual tools to analyze peace governance and learn their application through various case studies and post-conflict scenarios. They will also acquire insights into practical missions such as electoral monitoring or designing town hall meetings in post-conflict societies.</p>				

Course Bulletin

146909	Seminar in International Relations Theory			
Subject: DHP	Catalog Nbr: D201			
2024 FALL	Primary	Daniel Drezner		Daniel.Drezner@tufts.edu
<p>For those students who do not plan to specialize in international relations, this course is designed to provide a grounding in the basic concepts, theories, and literature of international relations theory. For those who plan on specializing in IR, the course is designed to expose you to a variety of theoretical approaches and debates that you will see repeatedly in your future career. For those who question the need to understand feminist or Marxist approaches to social life, think of the course like Don Corleone would: keep your intellectual friends close, but your intellectual enemies closer. The more you know about approaches you dislike, the better equipped you are to develop a sophisticated and nuanced rejection of the approach.</p>				

146916	The Fletcher Design, Monitoring, and Evaluation (DME) Lab: Developing Real-World Interventions			
Subject: DHP	Catalog Nbr: P230			
2024 FALL	Primary	Kimberley Wilson		Kimberley.Wilson@tufts.edu
2024 FALL	Primary	Melita Sawyer		Melita.Sawyer@tufts.edu
<p>The course provides foundational knowledge and skills for students to design, monitor, and evaluate real-world interventions, including policies and programs in a range of fields. Past DME students have found DME tools and processes to be immediately useful in capstone development, internships, and many professional spaces. This course differs from past offerings in design, monitoring, and evaluation—which focused on program or project interventions—in that it includes a variety of interventions such as policy or product interventions. The course addresses critical steps in the policy development/program cycle including assessment, problem analysis, program logic, monitoring systems development and implementation, and evaluation.</p>				

146918	Nuclear Weapons: Technology, Strategy, and Policy			
Subject: DHP	Catalog Nbr: P239			
2024 FALL	Primary	David Logan		David.Logan@tufts.edu
<p>What are the causes and consequences of nuclear weapons? How do nuclear weapons and related capabilities work from a scientific and technological perspectives? What is the physical impact of a nuclear explosion? What are the technical elements of delivery systems and what is the likelihood that one nuclear-armed state could disarm another? Will nuclear weapons be used in our lifetimes? Why do states sometimes pursue nuclear weapons and why do they sometimes stop that pursuit? What can gender, sex, race, and religion teach us about the politics of nuclear weapons? Can the use or even the mere possession of nuclear weapons ever be legally, ethically, and morally justified? How will emerging technologies such as artificial intelligence and cyber weapons impact nuclear weapons? How should the United States and other nuclear-armed states structure their nuclear forces and design their nuclear strategies? Students will explore these issues from both technical, historical, and contemporary perspectives. The course will also touch briefly on more general issues related to international politics, international organizations, and science and technology.</p>				

Course Bulletin

146926	Challenges to Democracy in East Asia				
	Subject:	Catalog Nbr:			
	DHP	P270M			
	2024 FALL	Primary	Aram Hur		Aram.Hur@tufts.edu
<p>Democracy stands on fragile ground. Challenges to democracy are mounting everywhere, even in places like the United States—the global beacon for liberal democracy. What is even more alarming is that democracies today do not die by sudden external threats or coups. They weaken gradually from within at the hands of democratically elected leaders who capitalize on internal divisions and subvert institutions to maximize power, not democracy. What is the nature of contemporary challenges to democracy and how serious are they? Is democracy really in decline? This course examines broad questions about challenges to democracy through the specific lens of East Asia. Prominent democracies are faltering in all regions, but the status of the East Asian democracies holds particular importance to global politics. They are the most adjacent neighbors to the world’s arguably most powerful authoritarian regime—China. Unique lessons can be learned about why democracies succeed and fail by looking closely at a single region that houses both developmentally successful democracies as well as repressive and resilient autocracies.</p>					

146927	Data Science and AI for Global Leaders				
	Subject:	Catalog Nbr:			
	GMA	D258			
	2024 FALL	Primary	Anna Haensch		Anna.Haensch@tufts.edu
<p>In an era where data permeates every aspect of our world, understanding its potential is more valuable than ever. As a global leader it is important to understand both its capabilities and the potential pitfalls. This course will focus on the full data life-cycle including the generation, collection, processing, analysis, and management of data. Special attention will also be paid to data ethics as it pertains to representativeness and missingness of data. We will also discuss how recent advances in artificial intelligence have impacted the data life-cycle and the opportunities and threats that this poses. The technical aspects of this course will be supplemented by relevant readings and case studies showing data science in action.</p>
