

EFFECTIVENESS OF INTEGRATED AGRICULTURE, HEALTH LIVELIHOOD & NUTRITION INTERVENTIONS TO IMPROVE MATERNAL AND CHILD NUTRITION & HEALTH IN RURAL UGANDA : A COHORT BIRTH STUDY

ATANGA SUB-COUNTY

Outline

- Study team
- Objectives of the Study
- Implementation Status
- Research design
- Data Collection
- Results
- Conclusions

STUDY TEAM

MAKERERE UNIVERSITY

- Prof. Bernard Bashaasha, PI
- Dr. Flo Turyashemererwa, Project Coordinator.
- Ms, Annet Kawuma, Research Specialist
- Edgar Agaba, Researcher

IFPRI

Dr. Nassul Kabunga, Post Doc Fellow

TUFTS UNIVERSITY

- Prof. Jeffrey Griffiths, Director
- Dr Shibani Gosh, Associate Director

HARVARD SCHHOL OF PUBLIC HEALTH

- Dr. Christopher Duggan , Co -PI
- Dr Wafale Fawzi, Co- PI
- Dr Nilupa Gunaratna, Co- PI

Overall Objective

- To understand the effect of Integrated Interventions (Nutrition, Agriculture and Health) on the Health and Nutrition status of Mothers and Children under Two years of Age

Specific Objectives

- To determine the Effect of integration of nutrition, agriculture and health interventions on the health and nutrition status of pregnant women and children under two years of age
- To determine the effect of aflatoxin exposure and environmental enteropathy on health and nutritional status of pregnant women and children under tow years of age

Specific Objectives

- To assess the coverage, uptake and adherence to CC intervention messages and activities and assess the effect of heterogeneity on pregnant women and children under two years of age
- To determine the heterogeneity in the effect of CC interventions on maternal and child health and nutrition status due to variability in households

Research Design

- A Cohort of Mothers and young children were followed from pregnancy through the first two years of life
- Randomly selected CC interventions were matched to non cc sub-counties that provided the control
- Each selected CC sub-county was individually matched to a non-CC sub-county with the same
 - Agro ecology
 - Predominant language
- The matched sub –counties are located in non-CC districts to minimize spillover from interventions areas

Table 1: Implementation sites

District	Sub county	Predominant Language	Status
Kabale	Ruhija	Runyankore/Rukiga	Intervention
Kabale	Nyamweru	Runyankore/Rukiga	Intervention
Kanungu	Rugyeyo	Runyankore/Rukiga	Intervention
Kamwenge	Bwizi	Runyankore/Rukiga	Intervention
Kabarole	Kibiito	Runyankore/Rukiga	Control
Rukungiri	Kebisoni	Runyankore/Rukiga	Control
Rukungiri	Bugangari	Runyankore/Rukiga	Control
Rukungiri	Buyanja	Runyankore/Rukiga	Control
Nebbi	Parombo	Alur	Intervention
Zombo	Atyak	Alur	Control
Pader	Atanga	Acholi	Intervention
Lamwo	Agoro	Acholi	Control
Lira	Agweng	Langi	Intervention
Kole	Ayer	Langi	Intervention
Apac	Aduku	Langi	Control
Apac	Apac	Langi	Control

Sampling and Sample size

- The study was conducted in 16 sub counties
- Village health teams/guides were recruited and worked closely with the team to identify pregnant women
- Approximately 322 pregnant women were selected in each of the 16 sub-counties
- The target was to enroll 5152 pregnant women and children
 - In total 5,044(98%) women were enrolled in the study
 - Were to be followed up over a three year period
- In Atanga Sub-county 320 pregnant women were selected and formed the study sample

Sampling contd..

Eligibility criteria

Sample of respondents consisted of

- Pregnant women aged 15-49 years
- Women in their second and third trimester
- Must be Living in the study area until study follow-up period
- Mother provides informed consent

Data Collected

- At Household level
 - Demographic and socioeconomic information
Household composition, Wealth indicators, assets, income, livelihood activities , social participation, water and sanitation, sanitation, access to health services
 - Agriculture
Activities, production and sale, labor, utilization of technologies and management practices
 - Food Security
 - Gender roles and Dynamics
Women's role in agriculture, access, ownership and control of assets , production and income, decision –making, time use and access agricultural and nutritional information

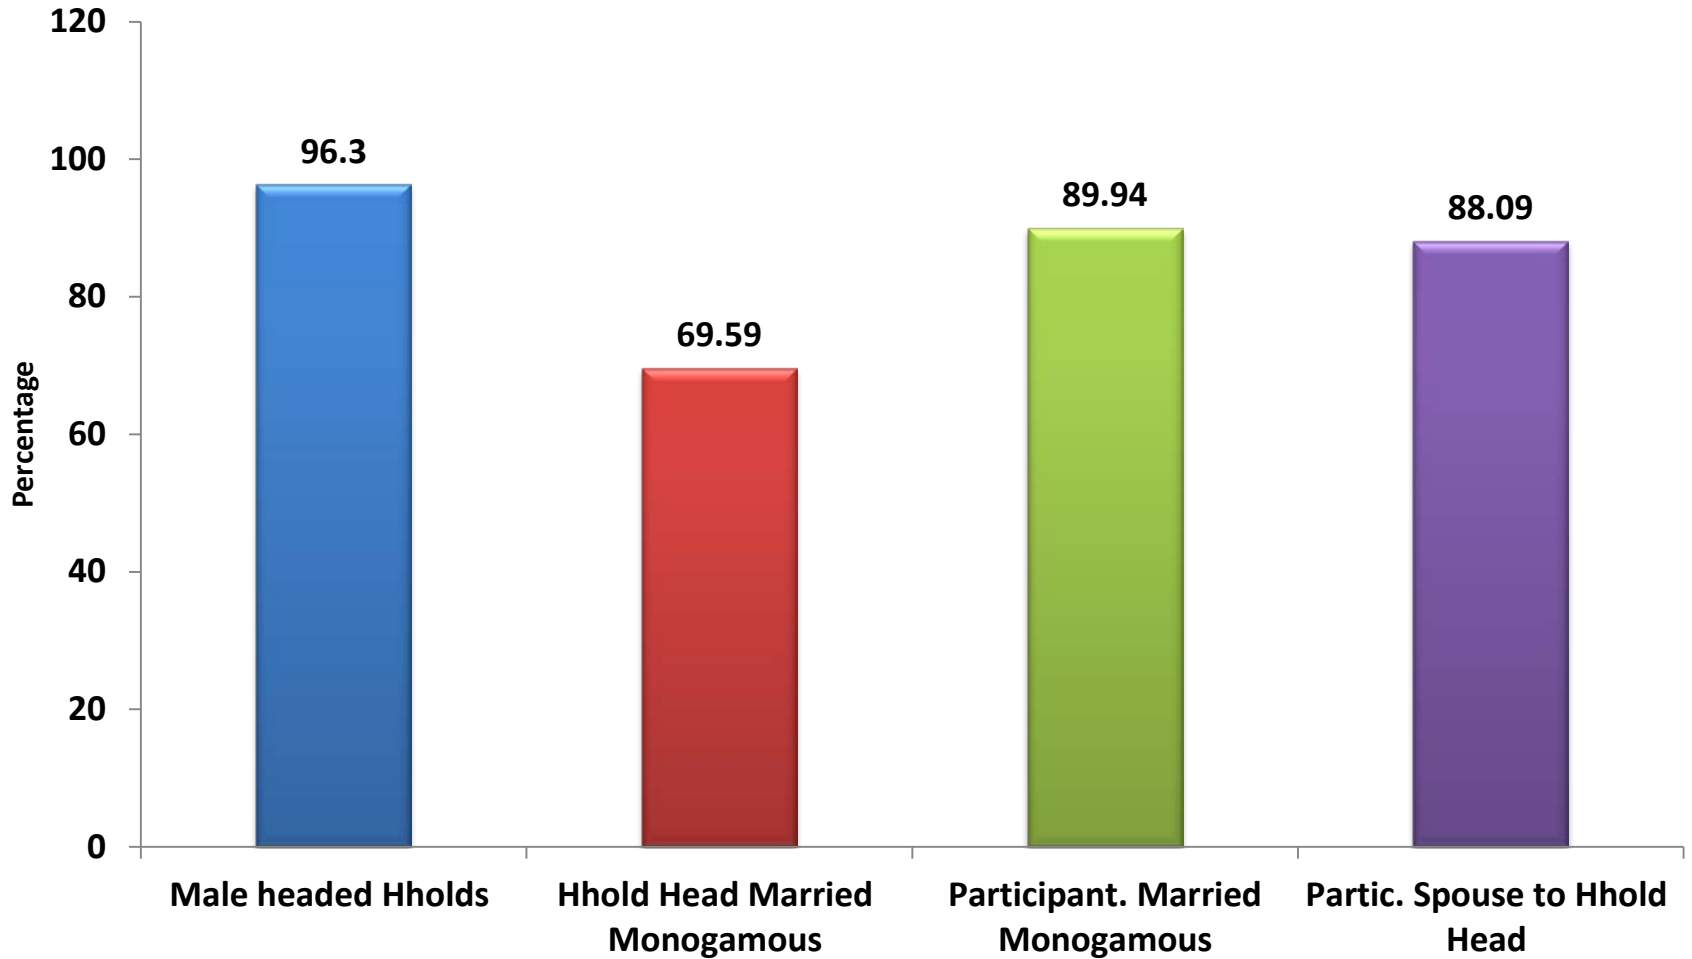

Data Collected

Caregiver and child (0-23 months)

- Diet
 - Included infant and young child feeding practices
- Health
 - Recent morbidity, hygiene, utilization of health interventions and services
- Nutritional status
 - Anthropometry
- Venous blood draws
 - Iron, Malaria, Aflatoxins

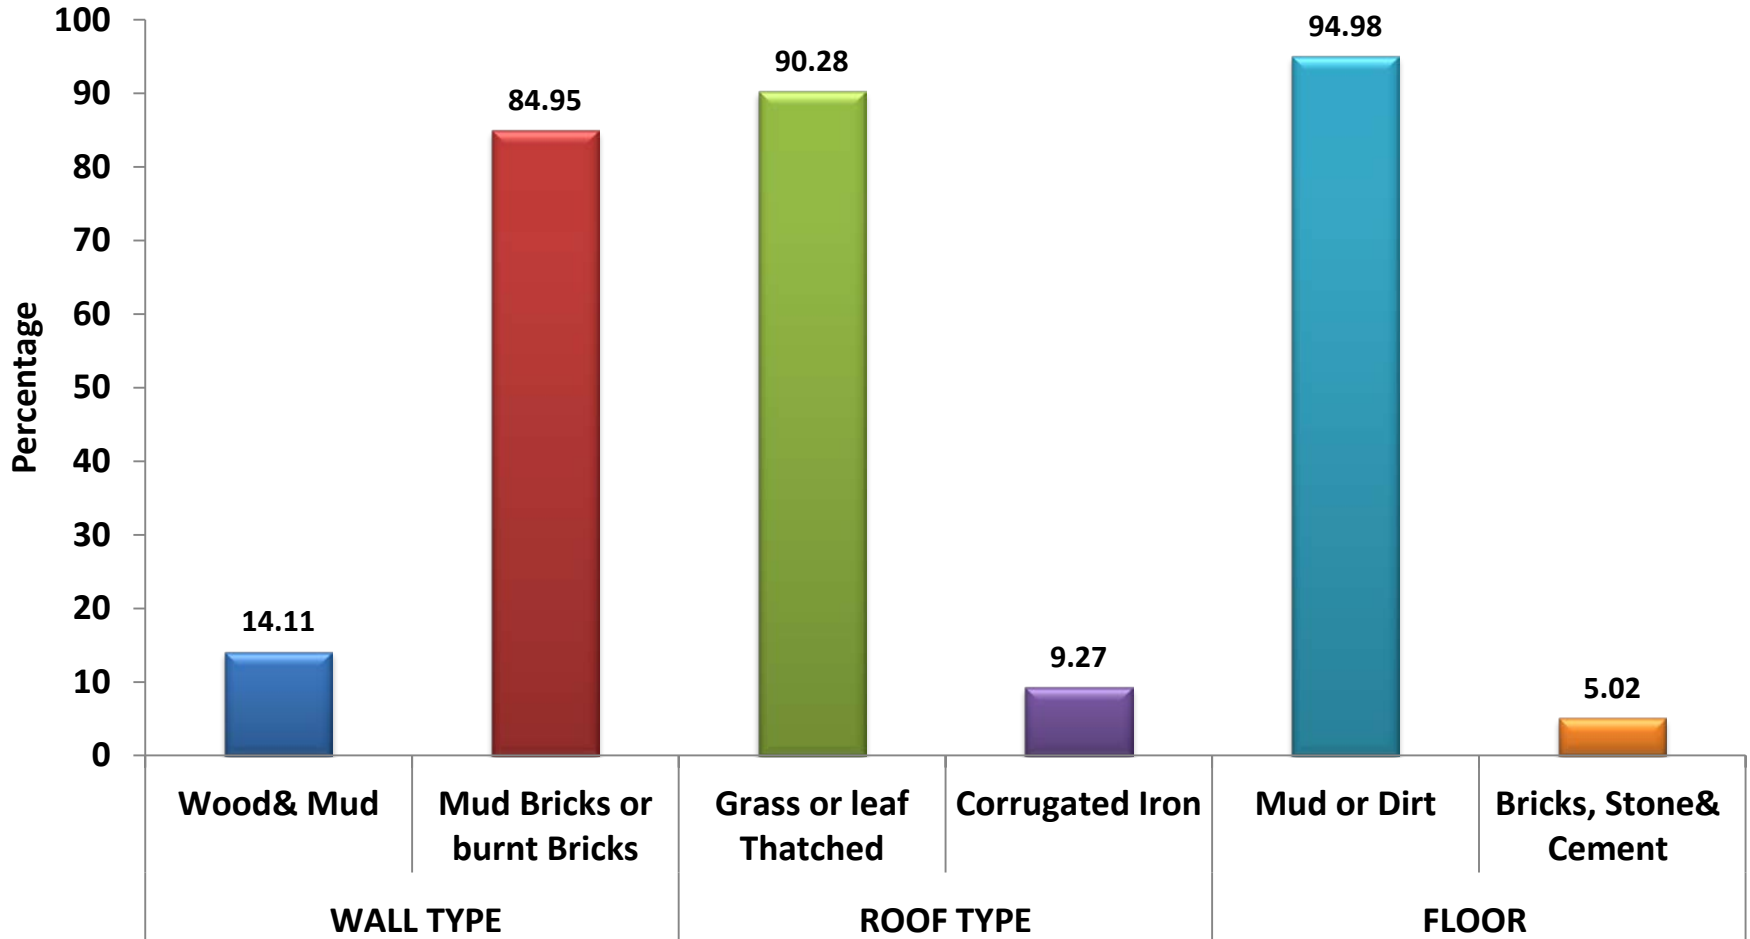

Household Demographics

Atanga- Household Characteristics

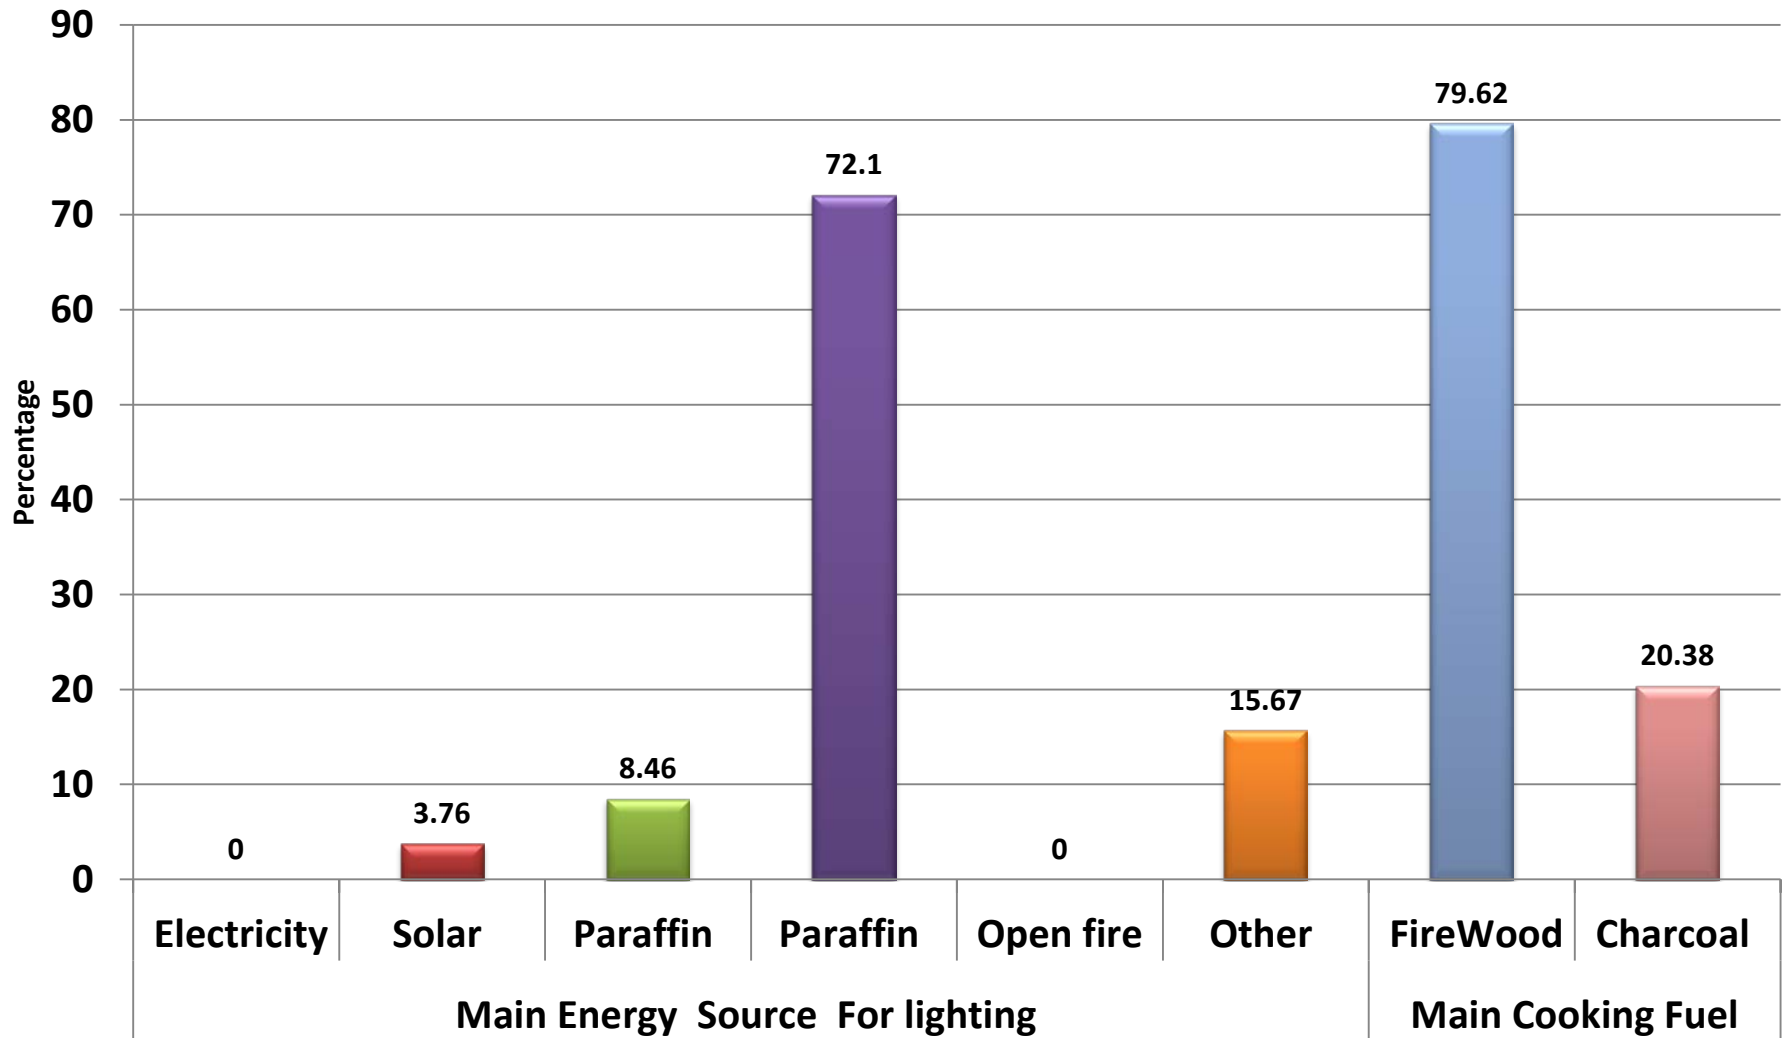

Housing Characteristics

Atanga-Household Housing Characteristics

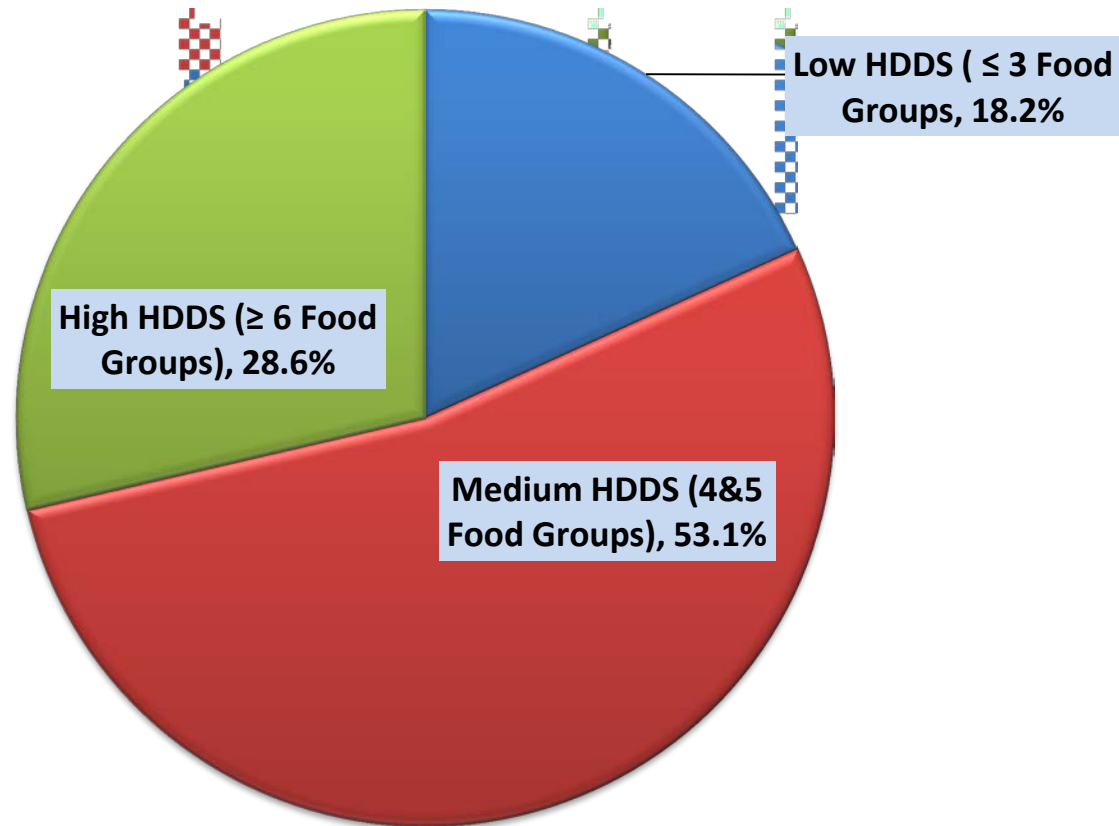

Household Characteristics

Atanga- Households' Main Lighting Source and Cooking Fuel

Household Dietary Diversity Score

Atanga-Household Dietary Diversity Score

Food Groups Consumed

Atanga- Food Groups Consumed by Households

Food Groups Consumed by Households in Low HDDS Group

Atanga -- Food Groups Consumed by Households with Low HDDS

Food Groups Consumed by Households in Medium HDDS Group

Apac - Food Groups Consumed by Households with Medium HDDS

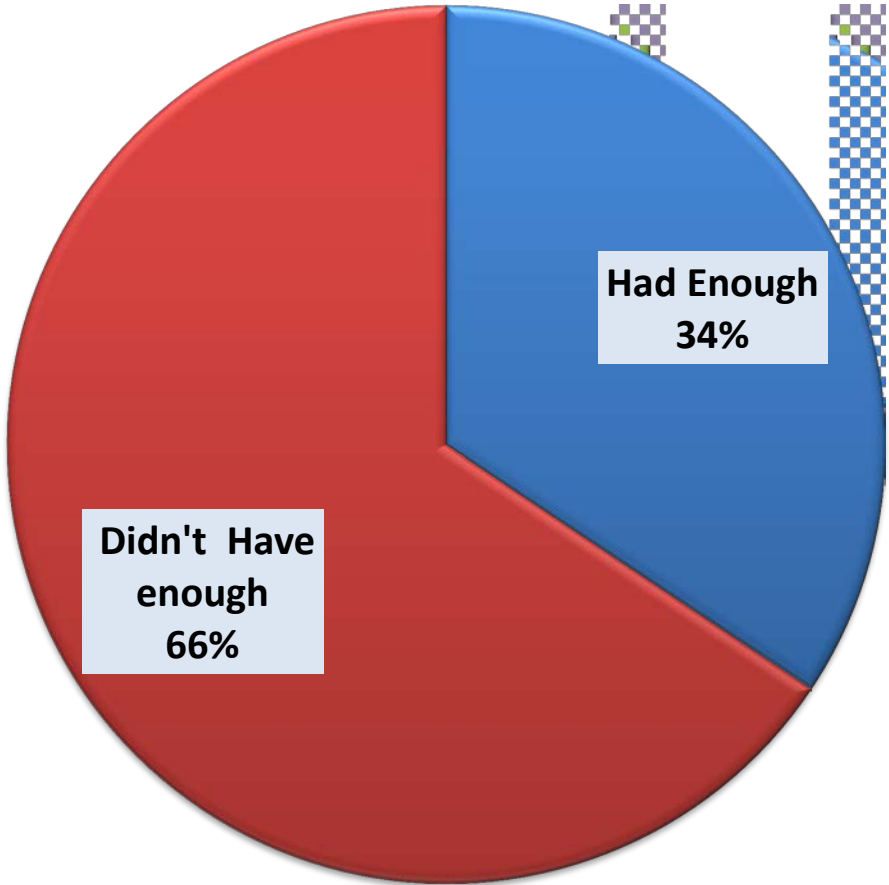

Food Groups Consumed by Households in High HDDS Group

Apac -Food Groups Consumed by Households with High HDDS

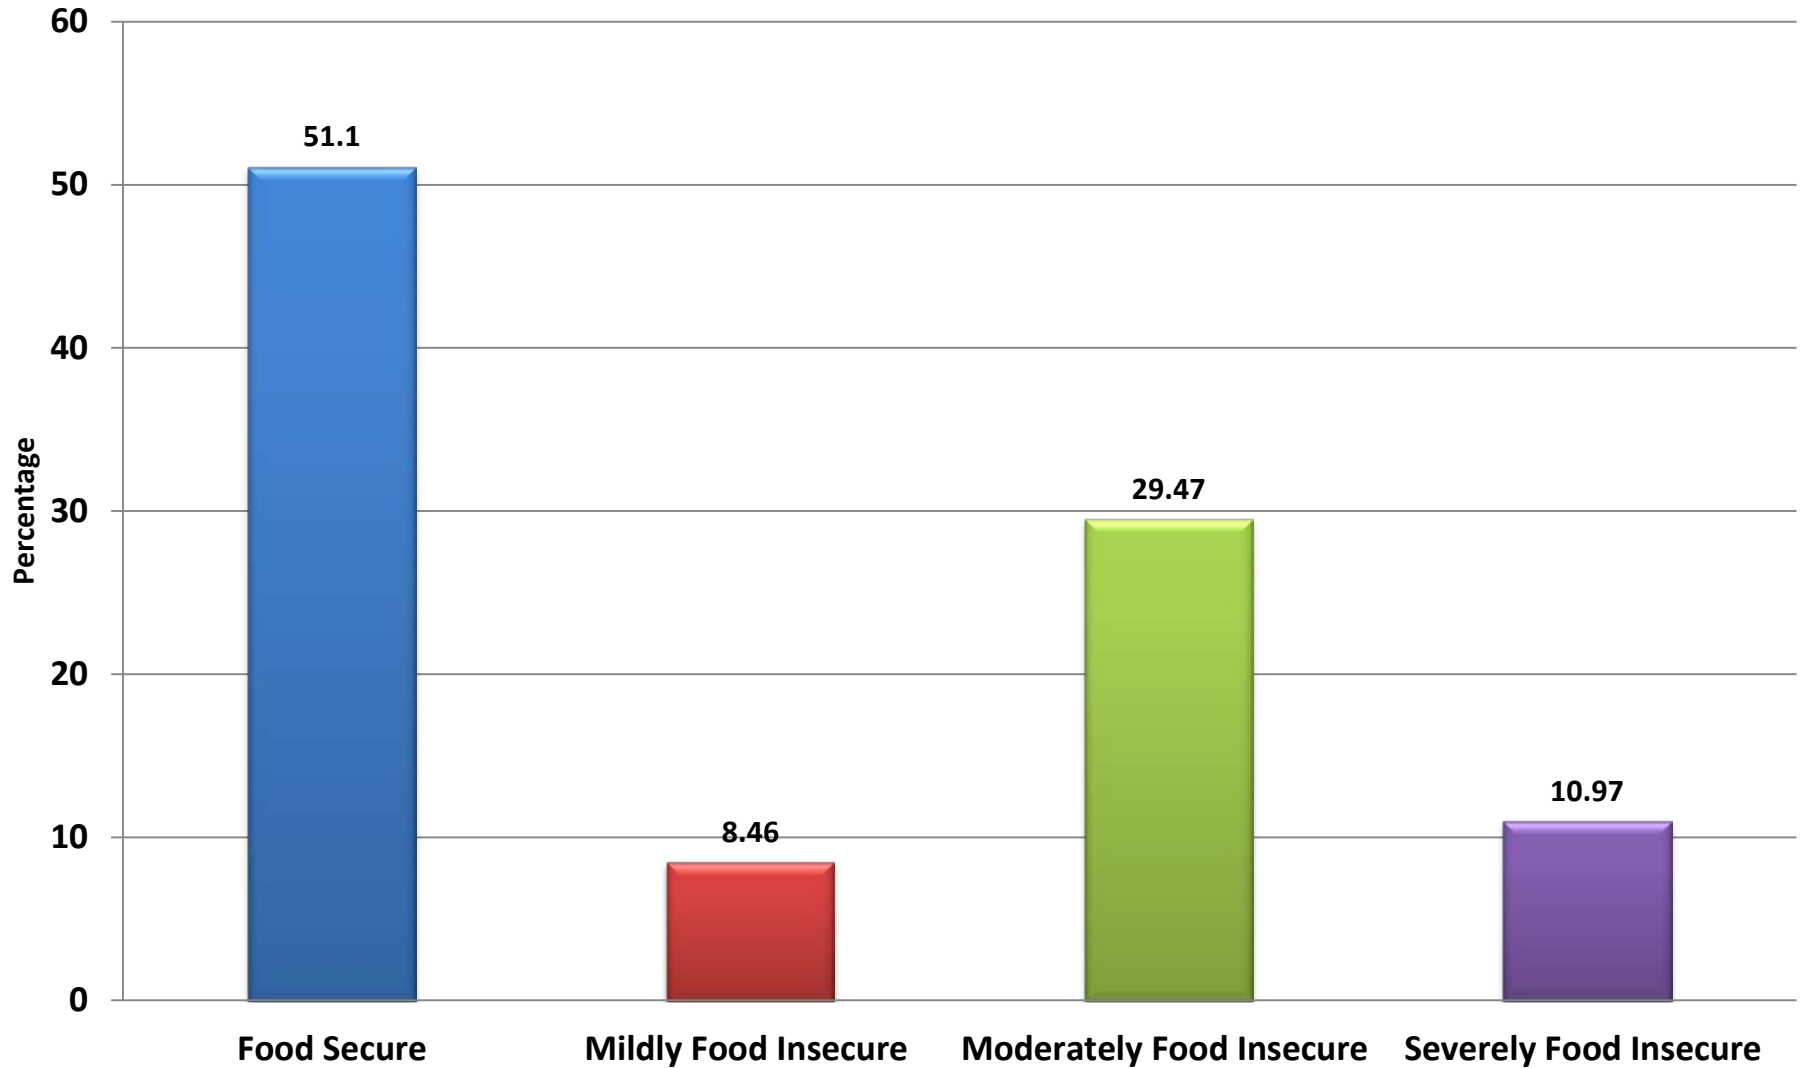

Household Food Provisioning (MAHFP)

Atanga -Household Food Provisioning (MAHFP)

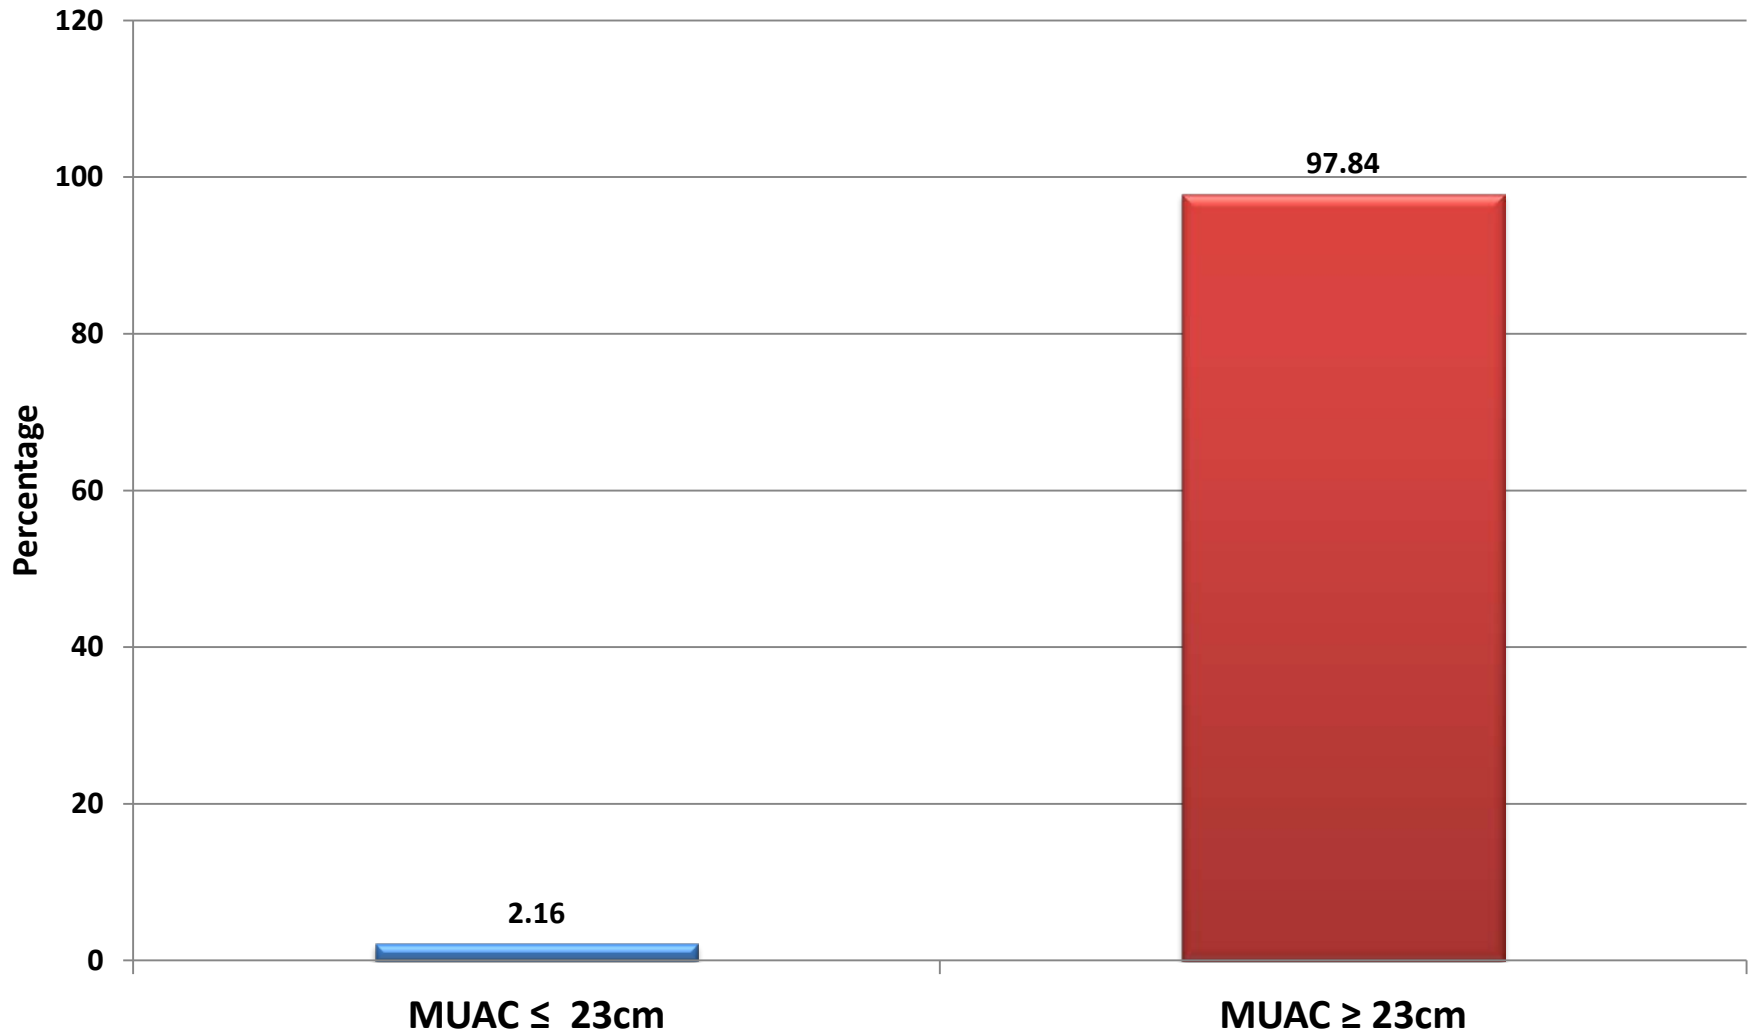

Household Food Insecurity Access Prevalence

Atanga-Household Food Insecurity Access Prevalence

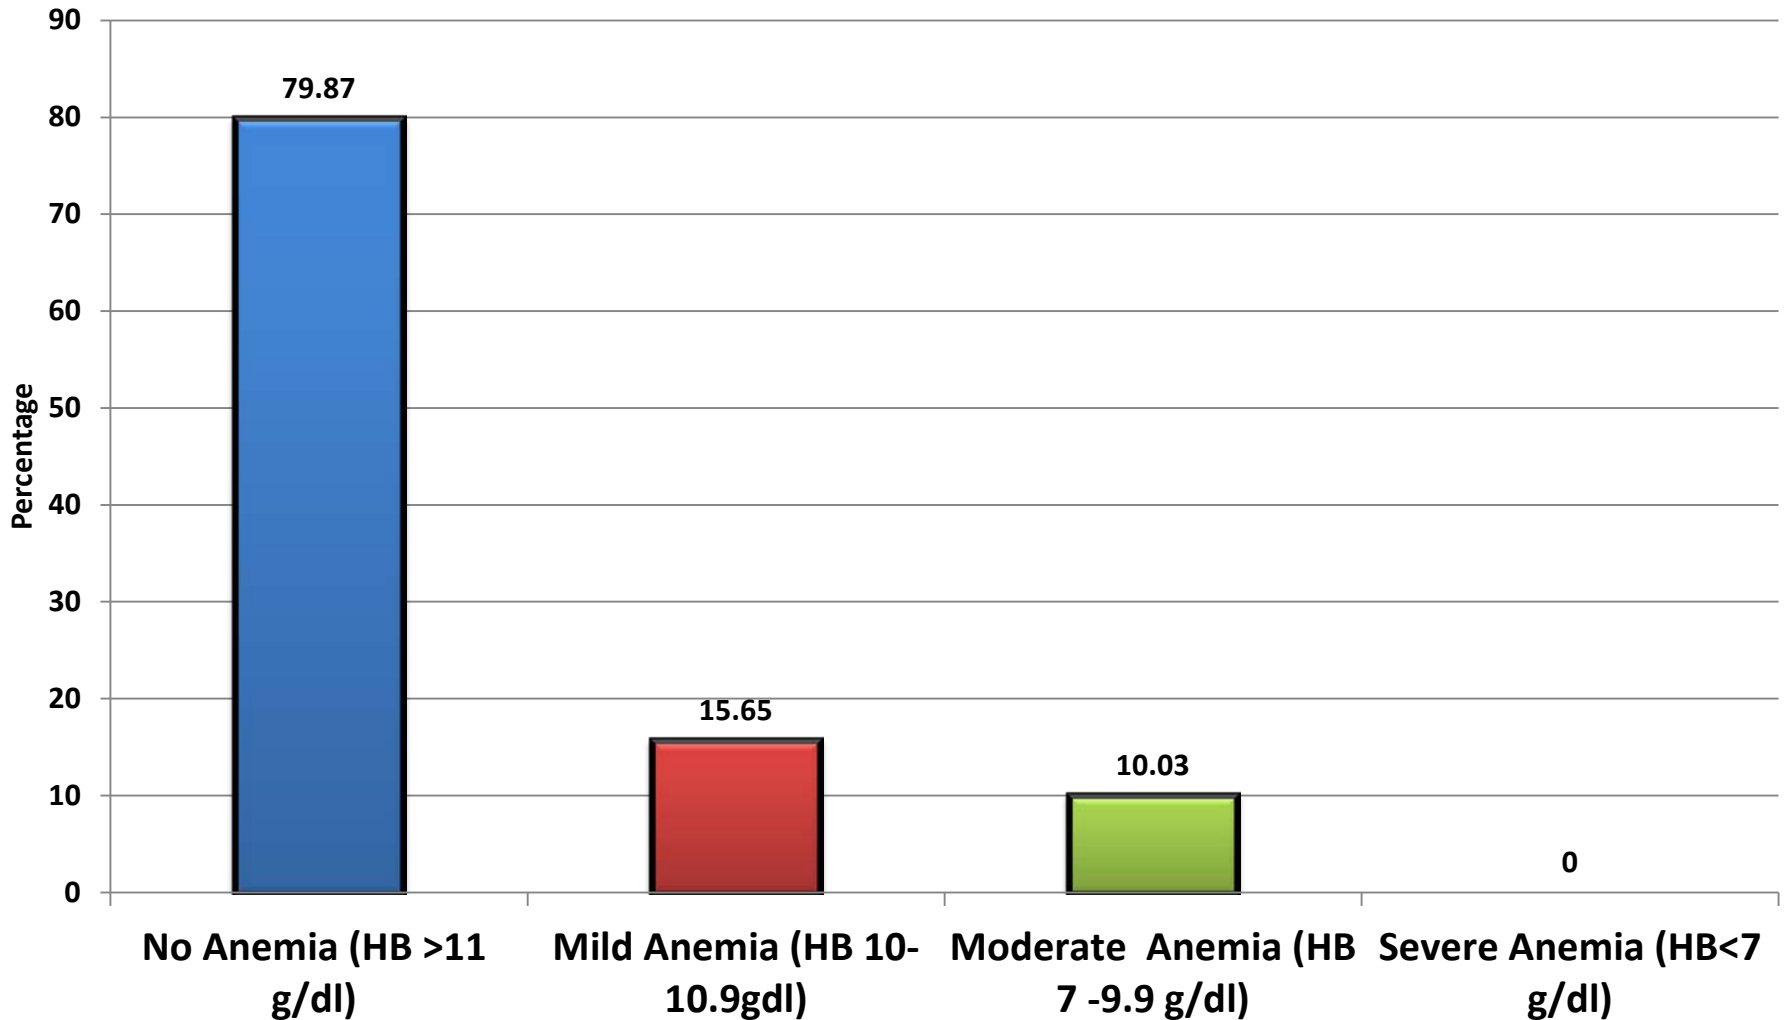

Maternal Wasting

Atanga-Mid Upper Arm Circumference for. Pregnant Women

Maternal Anemia

Atanga-Prevalence of Anemia in Women 15 to 49 Years

SEEKING HEALTH CARE SERVICES

Maternal Health Status & Pregnancy

Atanga- Women of various Age Groups who Sought Antenatal Care

Maternal Health Status & Pregnancy

Atanga-Women of Variuos Age Groups Who Received or Bought Iron Tablets

Maternal Health Status & Pregnancy

Atanga- Women of Variuos Age Groups who Received Deworming Drugs

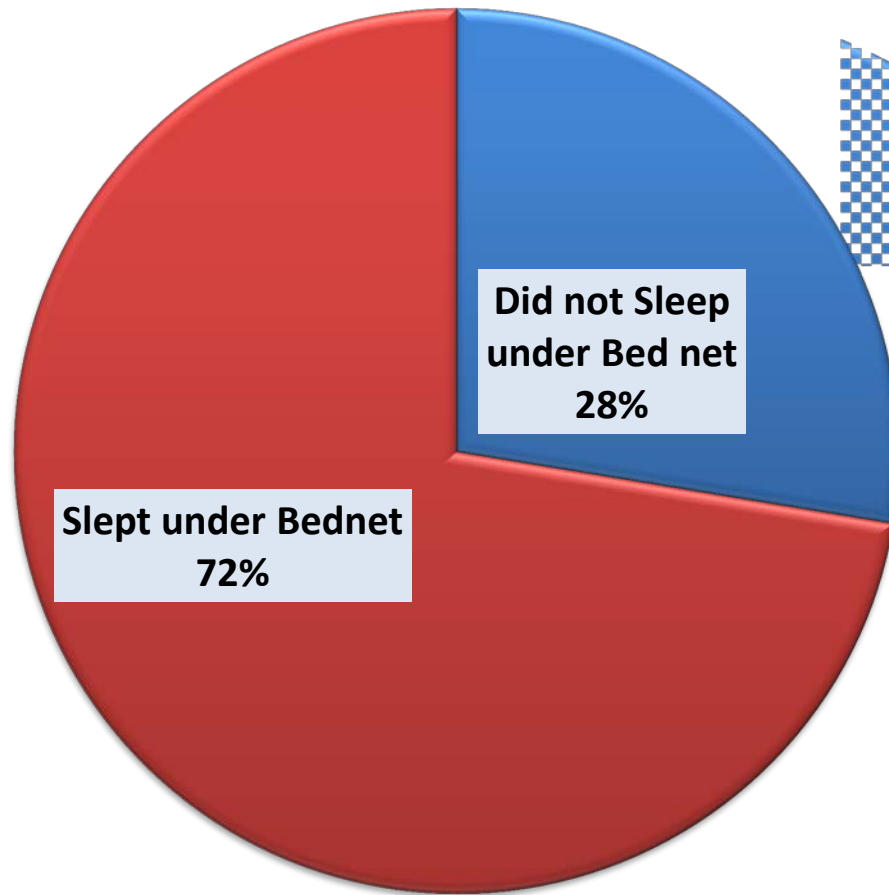

Maternal Health Status & Pregnancy

Average Percentage of Women Who Received Prenatal Testing

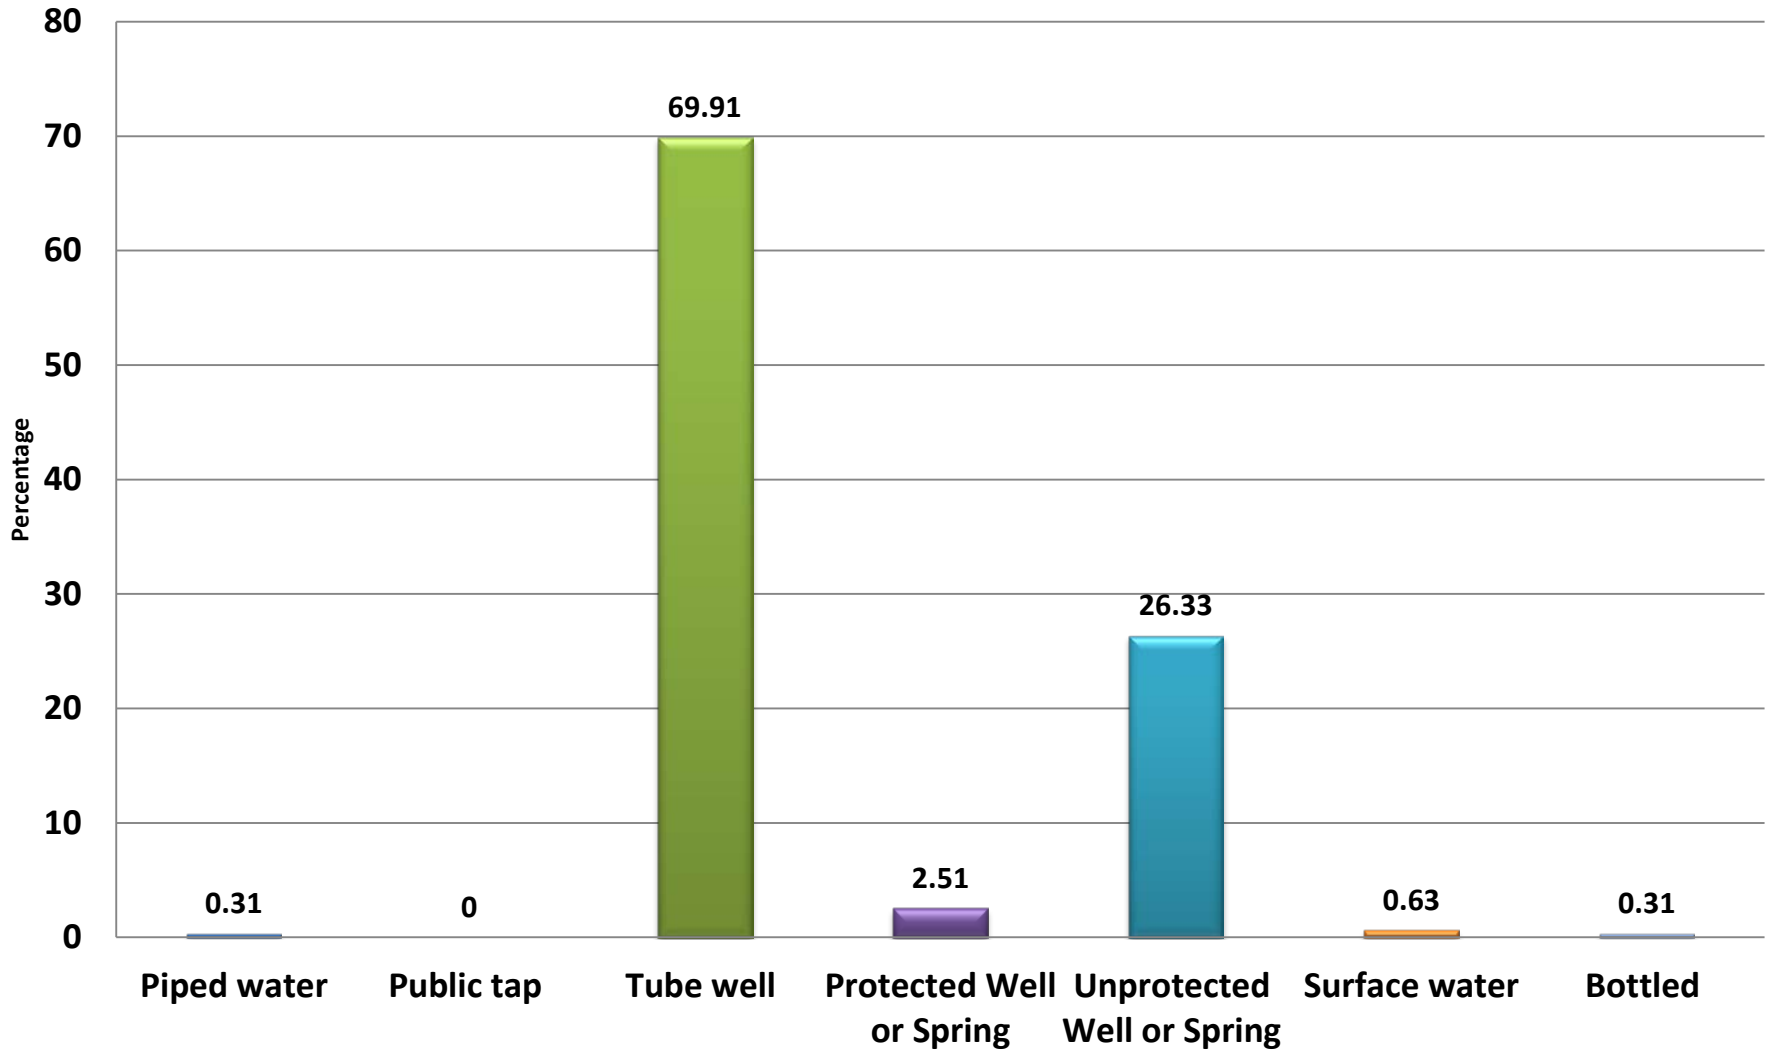

Maternal Health Status & Pregnancy

Atanga - Percentage of Women who Slept Under a Bednet

Water, Sanitation and Hygiene

Atanga - Common Water Sources

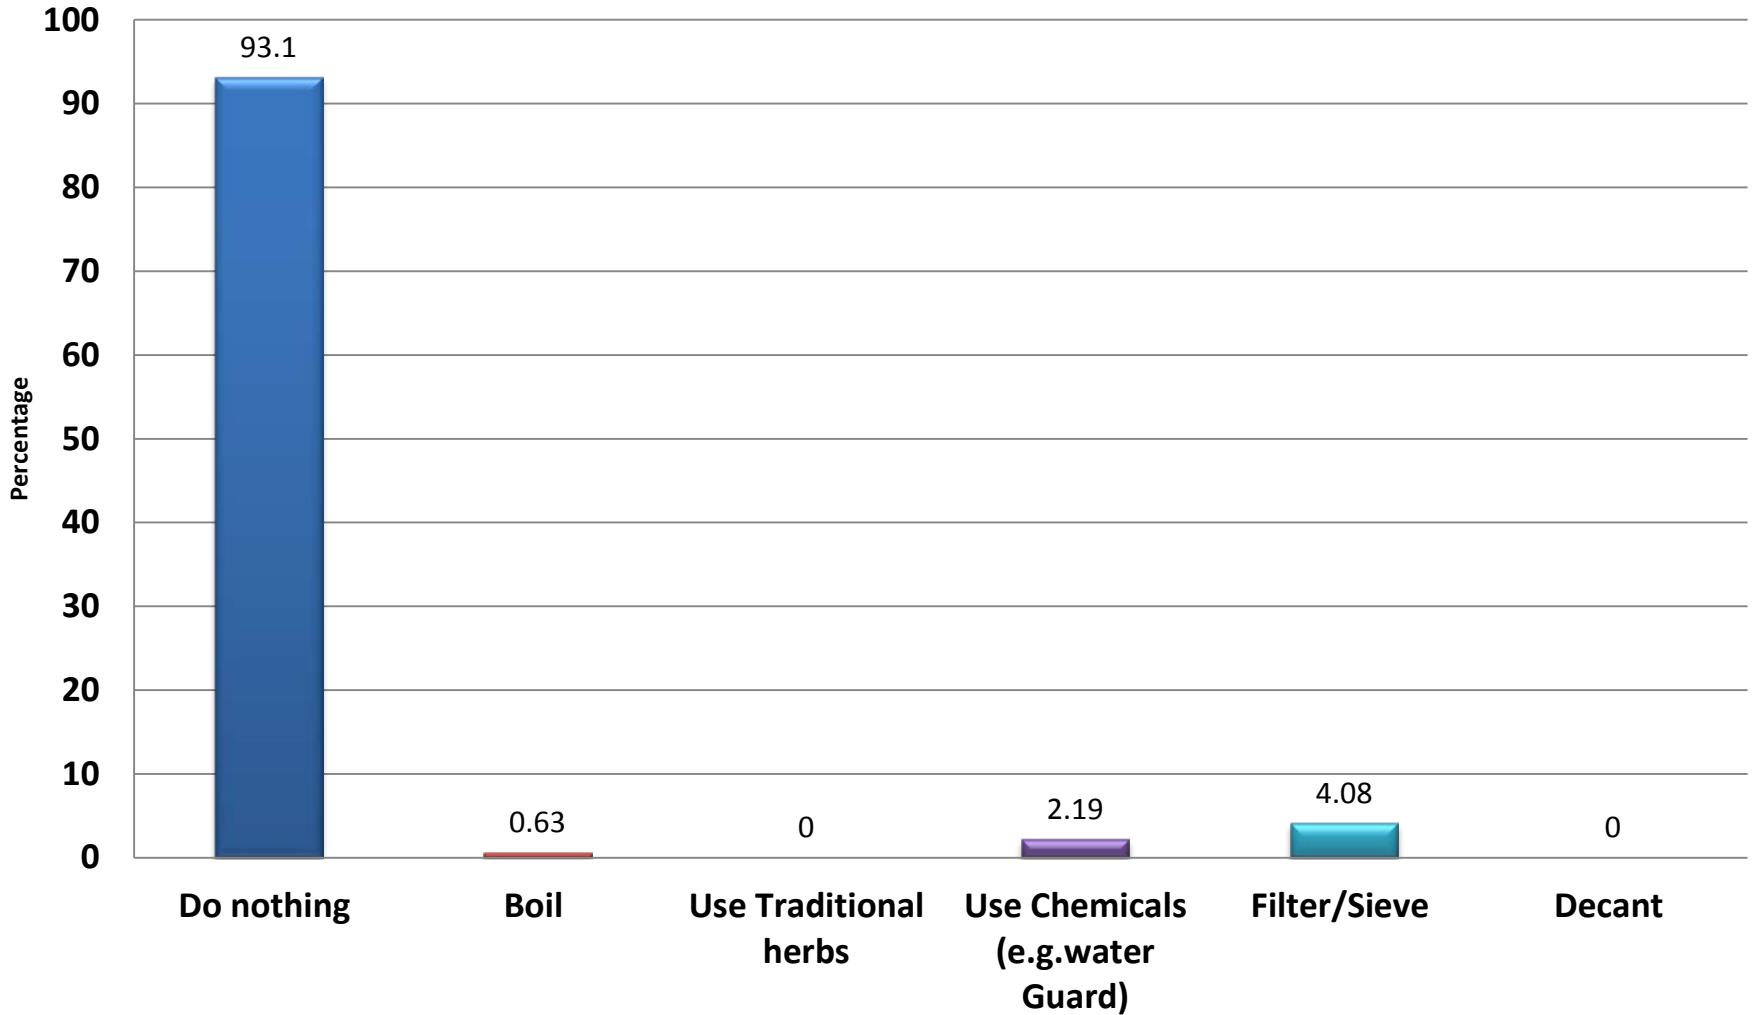

Water, Sanitation and Hygiene

Atanga - Household RainWater Harvesting

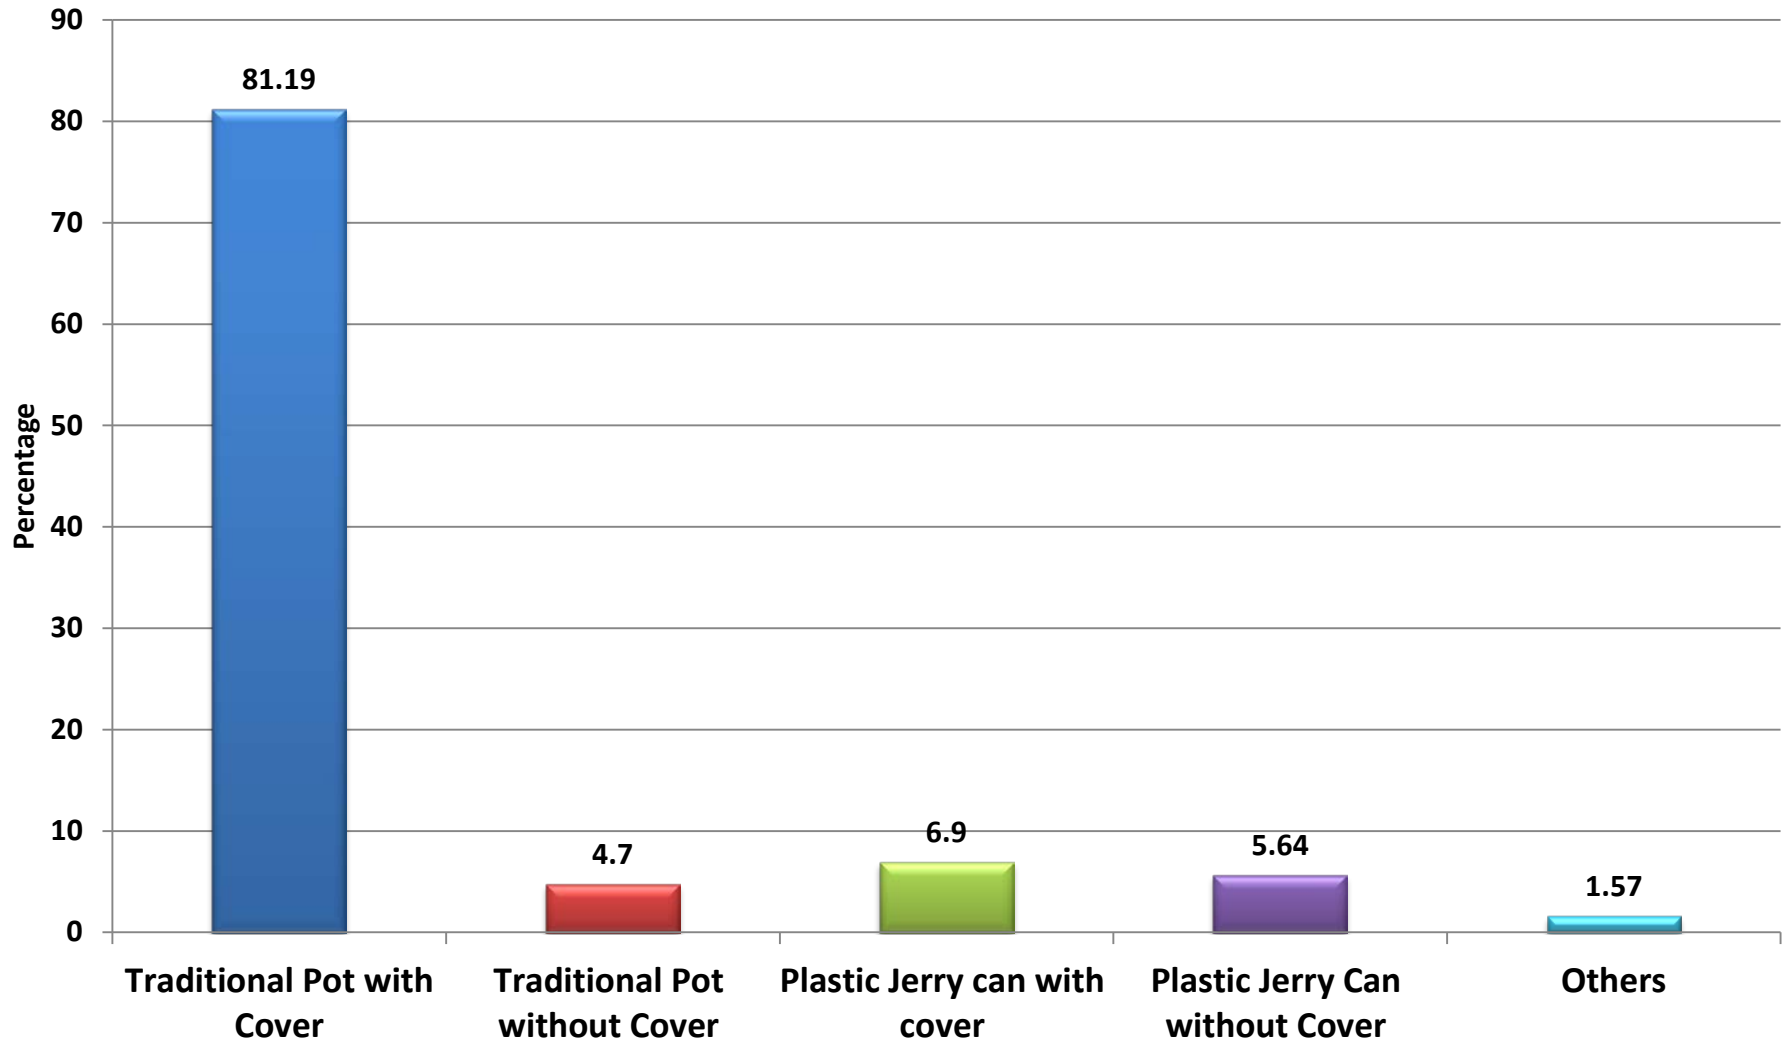

Water, Sanitation and Hygiene

Atanga- Common ways Households Treat Drinking water

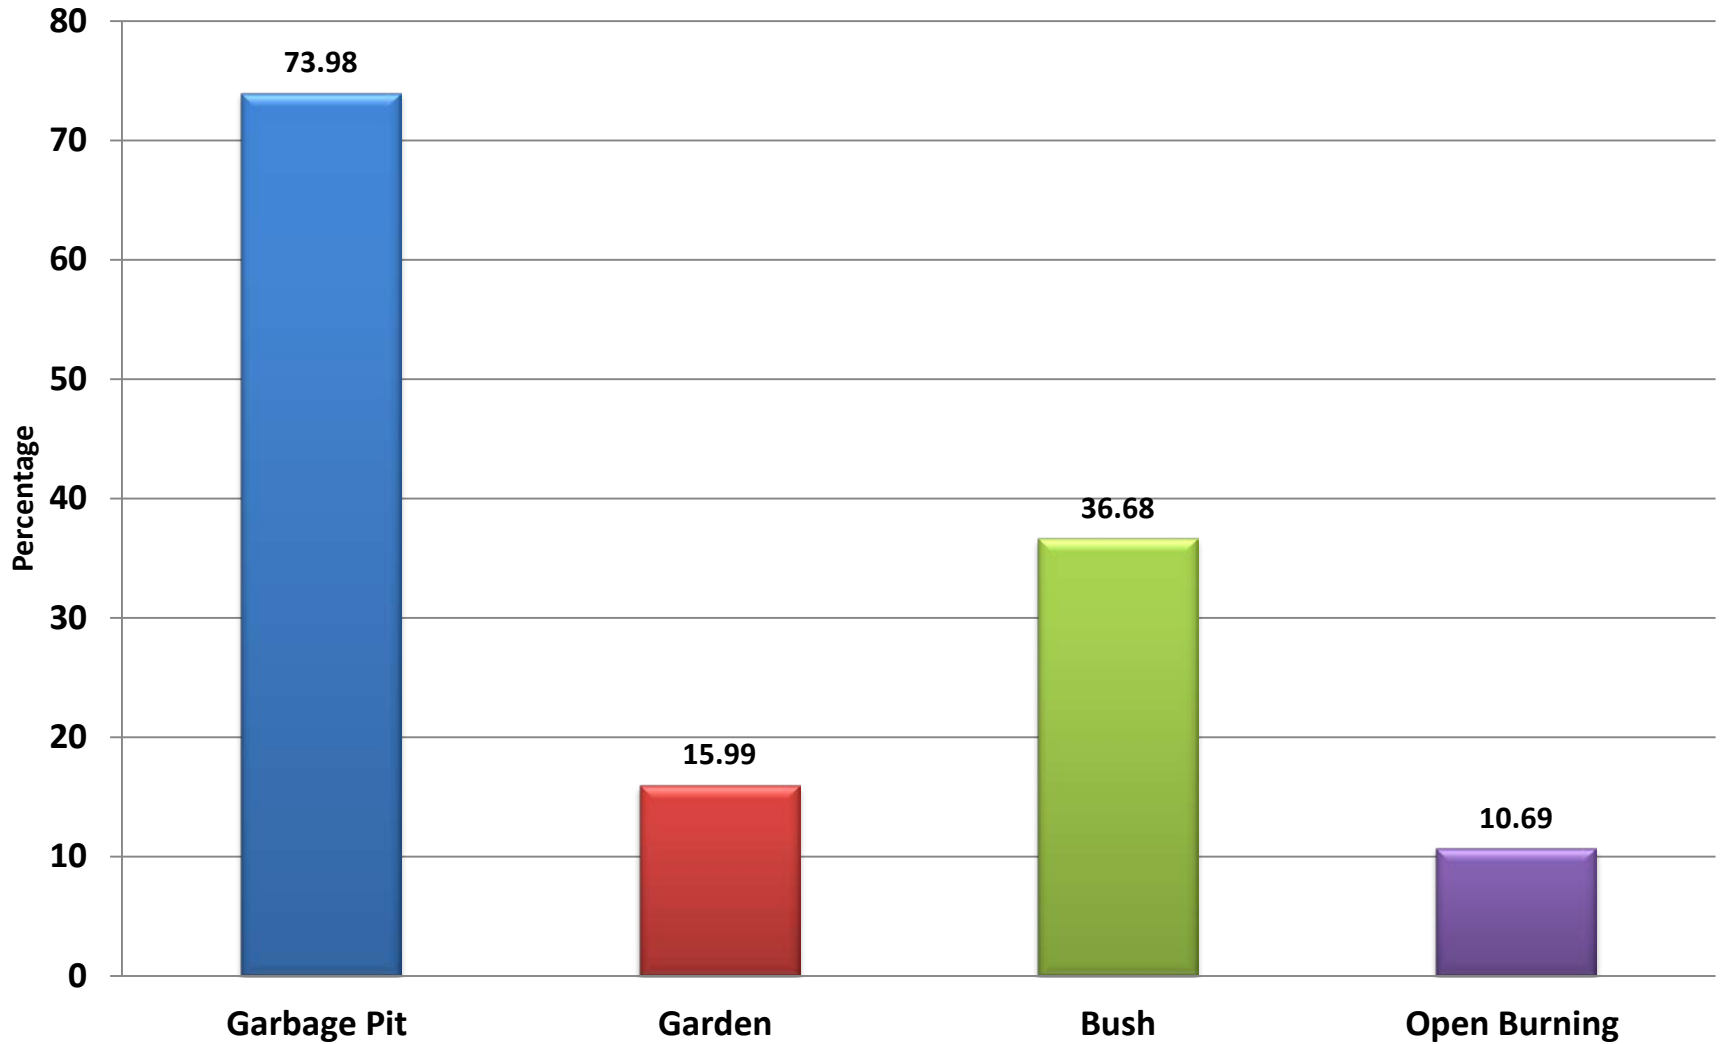

Water, Sanitation and Hygiene

Atanga- Where Households Store Drinking Water

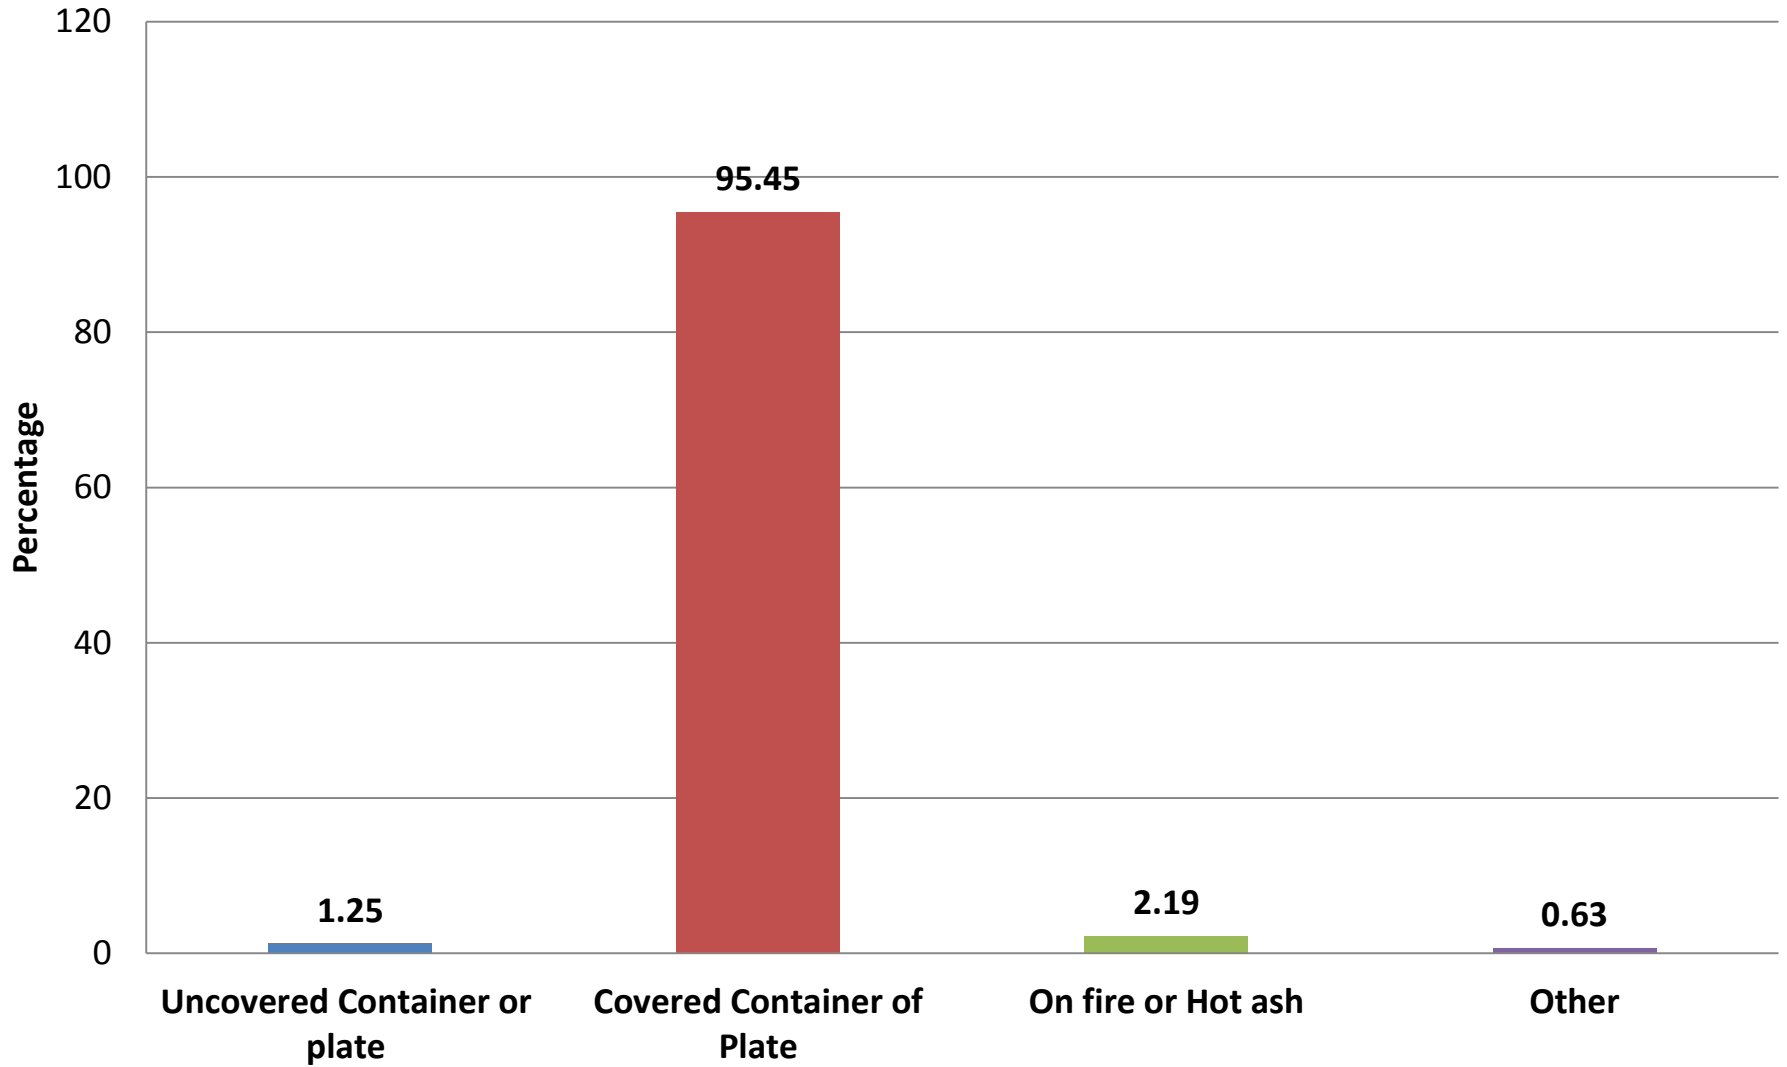

Water, Sanitation and Hygiene

Atanga - Garbage Disposal methods (n =318)

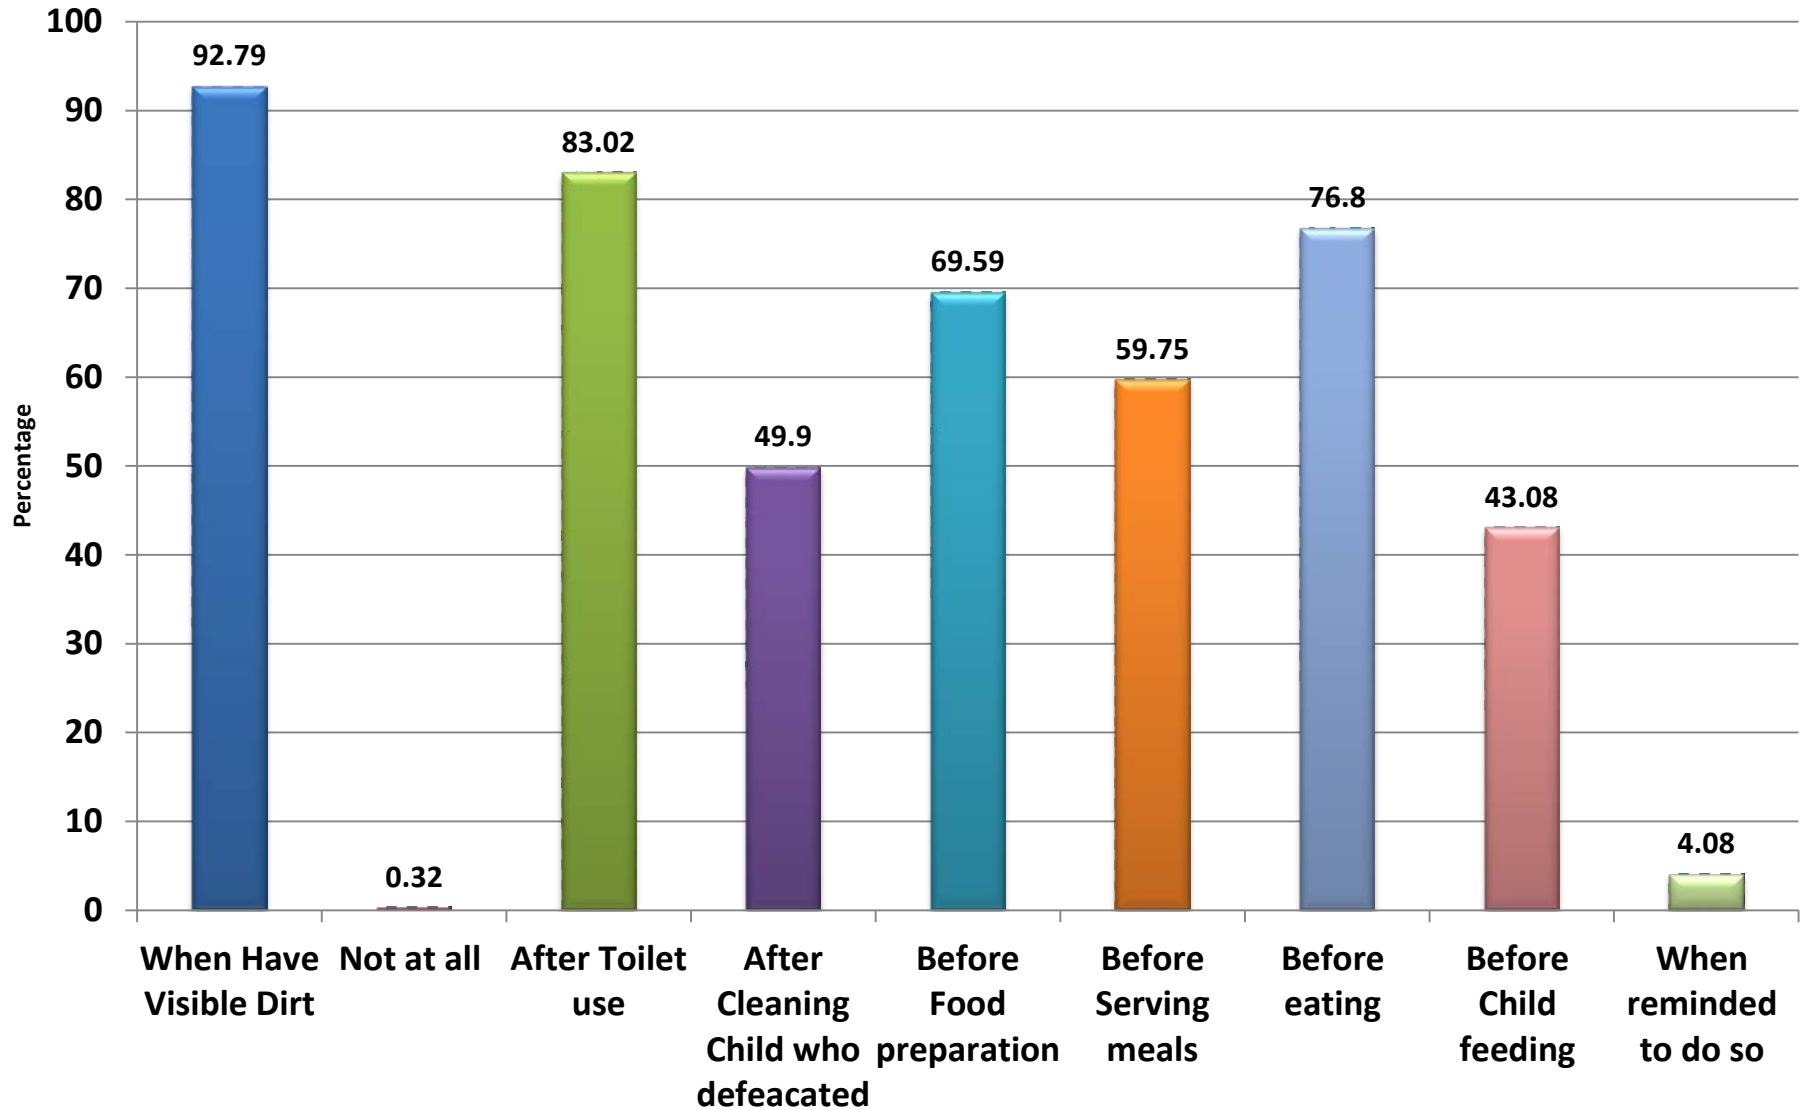

Water, Sanitation and Hygiene

Atanga - Common Food Storage Methods

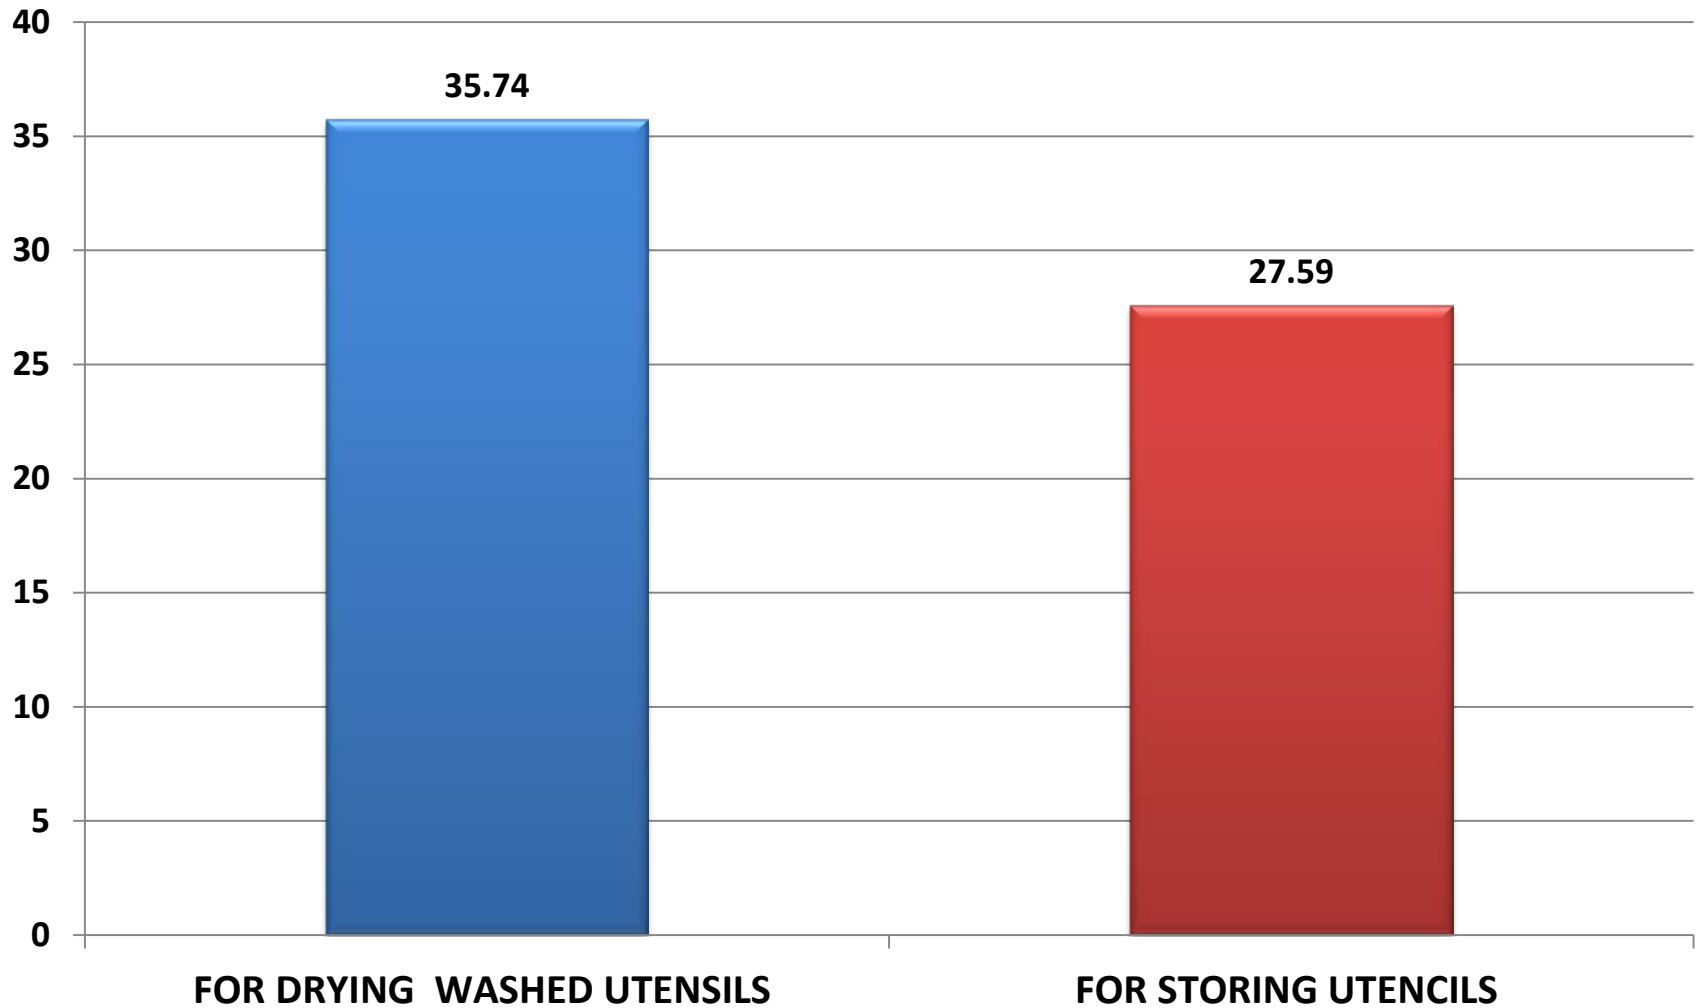

Water, Sanitation and Hygiene

Atanga- Time When Repondents Wash Hands

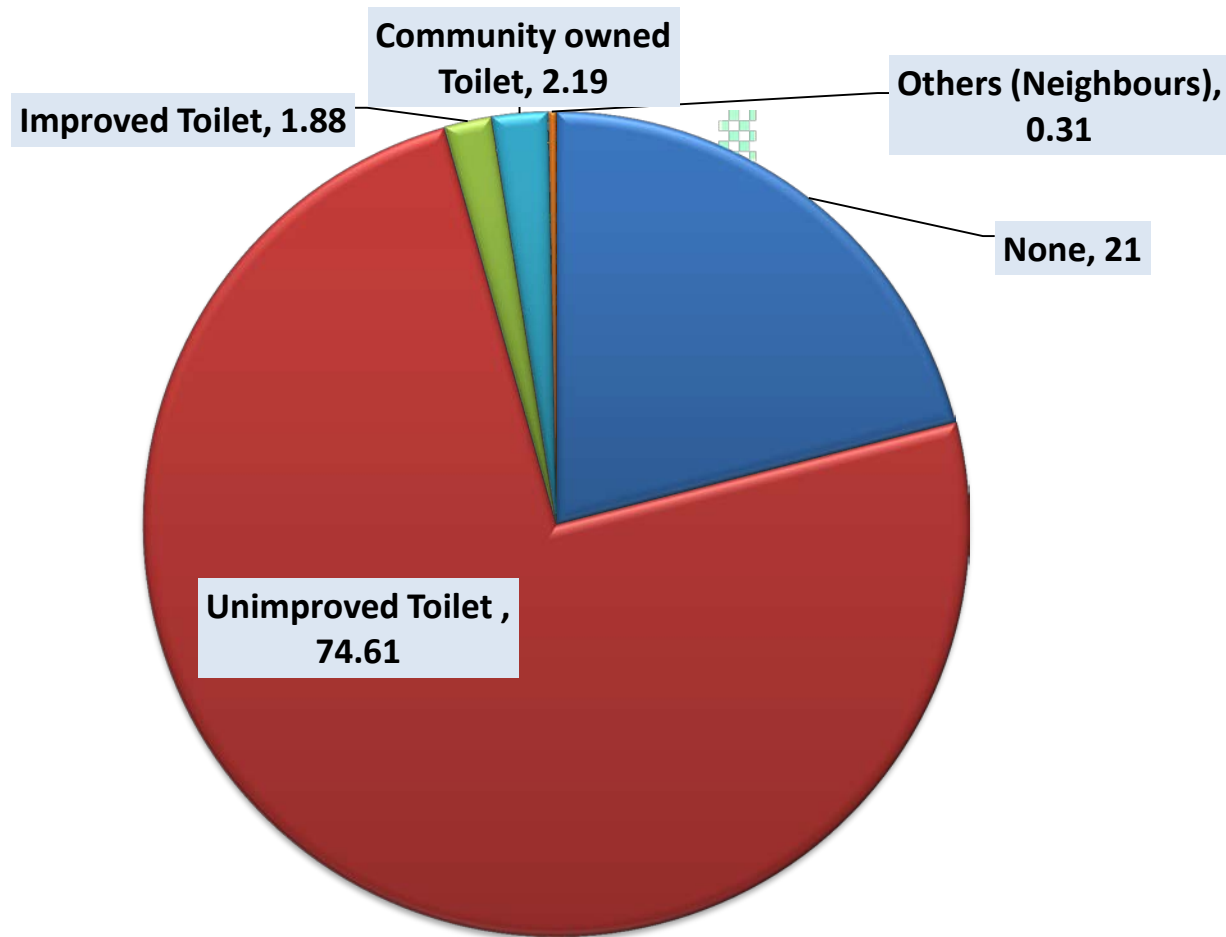

Water, Sanitation and Hygiene

Atanga -Rack Ownership and Use

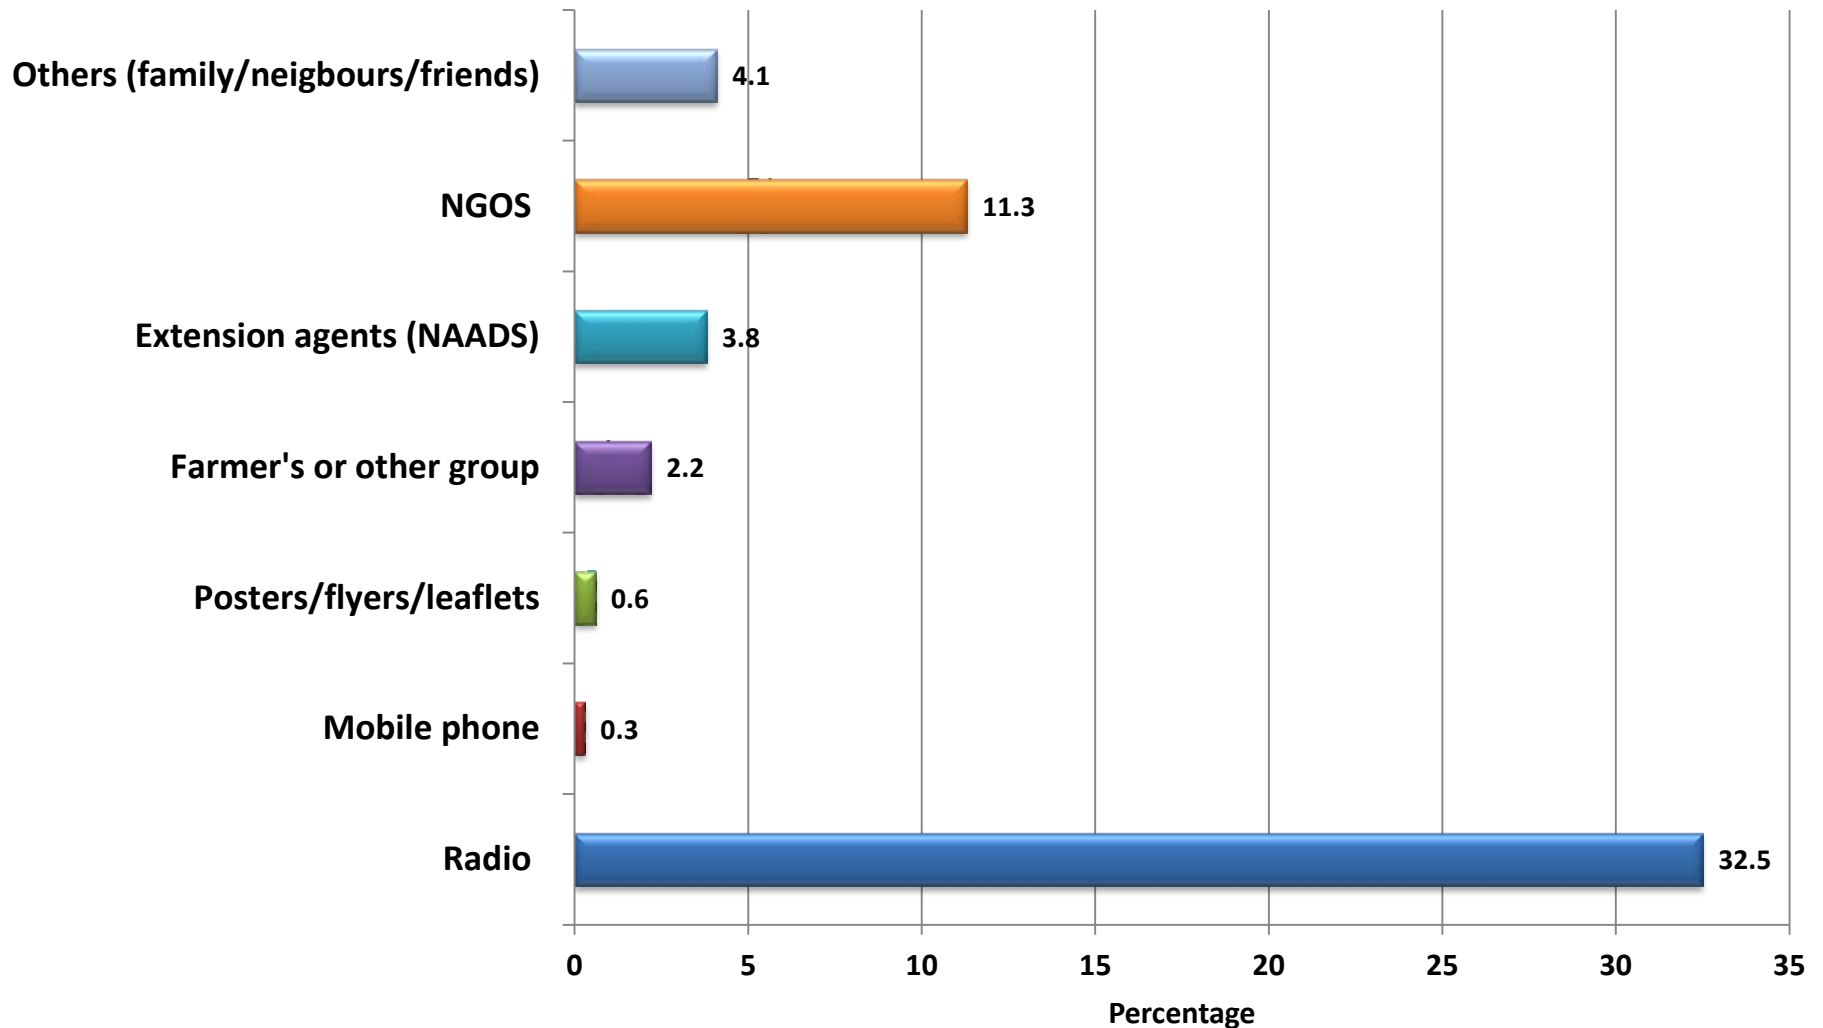

Water, Sanitation and Hygiene

Atanga - Common Types of Toilet used by Households

Sources of Agricultural Information

Atanga- Source of Agricultural Information

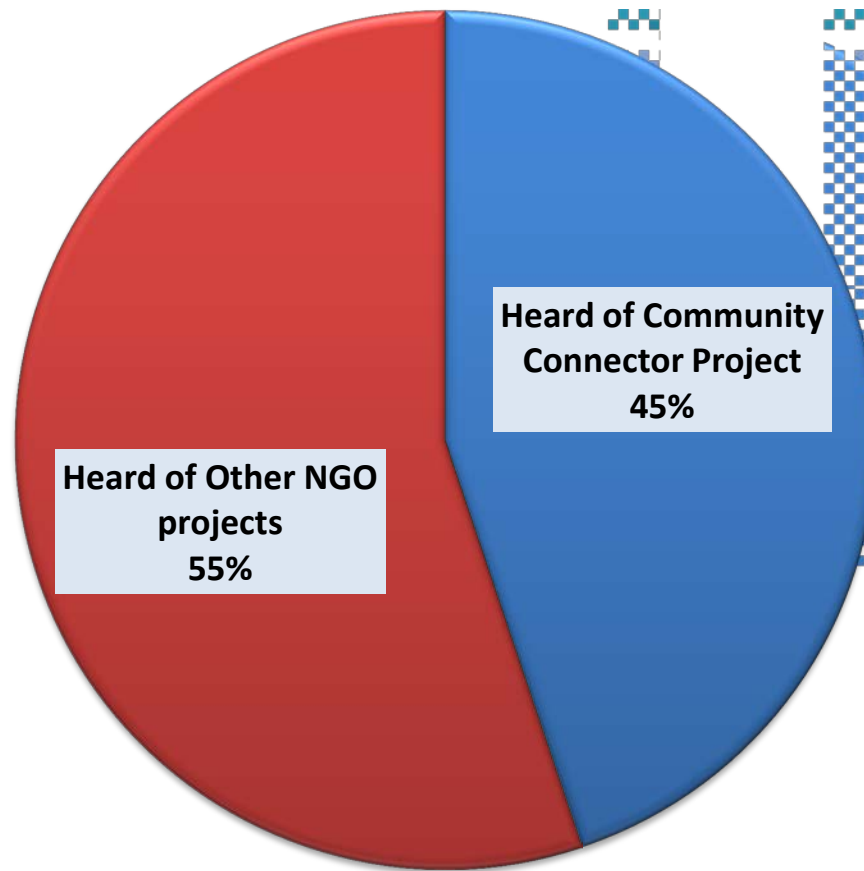

Sources of nutrition information

Atanga - Sources of Nutrition Information

Social Participation Information Access & Program Exposure

Atanga- Program Exposure & Uptake

Social Participation Information Access & Program Exposure

Atanga- Receipt of Information to Increase Cultivation of Crops

Social Participation Information Access & Program Exposure

Ayer- Crops Households were Encouraged to Produce

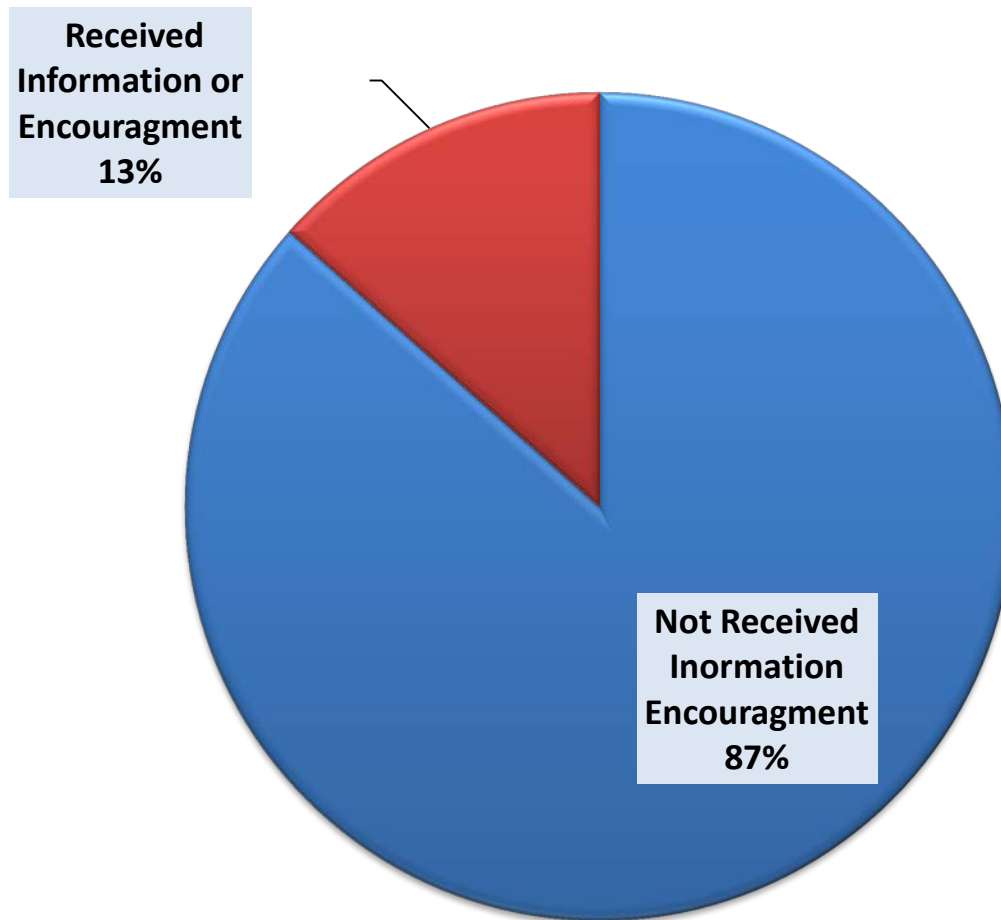

Social Participation Information Access & Program Exposure
