## Dear Alma Mater

---

We con beside thy knee, Dear Alma Mater, Earth's book of mystery, Dear Alma Mater. We track the storied past, Dear Alma Mater, Over plains of learning vast, Dear Alma Mater, with thee.	Speed on thy sunlit way, Dear Alma Mater. We vow new faith today, Dear Alma Mater! May glory light thy name, Dear Alma Mater, All thy children sing thy fame, Dear Alma Mater, for aye!

## Tuftonia's Day

---

*by Elliot Wright Hayes, A16*

Steady and true, rush along, Brown and Blue.  
Raise a mighty score today.  
Fearless tear down the field and never yield!  
Brown and Blue, Brown and Blue for aye!  
Hammer them hard, boys, and break through their guard.  
That is old Tuftonia's way.  
And our glorious banner once again will wave o'er Tuftonia's Day.  
T-U-F-T-S, T-U-F-T-S, Hurrah! Hurrah! for dear old Brown and Blue!

*Refrain:*

*Up on the Hill tonight all will be gay.*

*Victorious in the fight, we'll raise the standard of dear old Tufts to glory!*

*Pile up a mighty score.*

*It's bound to soar.*

*Now one goal more!*

*Nothing can stop us; it's Tuftonia's Day.*

Push it right through, boys, we're rooting for you! Now then smash their guard  
once more.  
See, they are losing fast, their line can't last!  
Brown and Blue, boys, forevermore.  
Right through the hole, lads, and make it a goal in the good old fashioned way.  
And we'll all turn out with a lusty shout to honor Tuftonia's Day.  
T-U-F-T-S, T-U-F-T-S, Hurrah! Hurrah! for dear old Brown and Blue!

*Refrain*

## Recipients of Honorary Degrees

In the past decade, **LANCE ARMSTRONG** has gone from being the world's top-ranked cyclist, to battling life-threatening cancer, to beating the disease and winning seven consecutive Tour de France titles. Now retired at age thirty-four, the legendary athlete is committed to helping others defeat cancer through the Lance Armstrong Foundation.

Armstrong grew up in Plano, Texas, and by age sixteen, was a professional cyclist. He spent his senior year of high school training with the United States Olympic cycling developmental team in Colorado Springs, Colorado, and by the 1990s, he was winning international races, including the World Championship, the Tour du Pont, and multiple stage victories at the Tour de France. He also secured a spot on the U.S. Olympic team.

At the beginning of 1996, Armstrong was ranked as the top cyclist in the world, but by October, he was forced off his bike with excruciating pain. Doctors discovered he had advanced testicular cancer that had spread to his lungs and brain. They estimated his chance of recovery at less than fifty percent. Despite the odds, Armstrong began an aggressive form of chemotherapy that his doctors hoped would offer a chance for full recovery without the side effect of reduced lung capacity.

The treatment worked, and Armstrong returned to the competitive racing circuit in 1998. He ended his first race before the finish line, but the next race—the Lance Armstrong Foundation Downtown Criterium in Austin, Texas—found him back in the victory spotlight.

From there, Armstrong had his eye on the Tour de France, and he won the prestigious race for the first time in 1999. It was not only a personal victory, but also a win for all cancer survivors. Armstrong went on to win six more consecutive Tour de France titles before retiring in 2005.

Armstrong has won numerous sports awards, including the ESPY Male Athlete of the Year three years in a row and the Associated Press Sportsman of the Year for four consecutive years. *Sports Illustrated* has called him “one of the greatest athletes of all time.”

For cancer survivors, he is an inspiration and a source of support through the Lance Armstrong Foundation, which provides the practical tools people need to battle cancer and “live strong.” The foundation sparked a worldwide campaign for cancer research and survivor support through the popular yellow LIVESTRONG bracelet, worn by more than forty million people across the globe. Armstrong sits on the President's Cancer Panel and has written two books, including his autobiography, *It's Not About the Bike*, and *Every Second Counts*.

He will receive an honorary Doctor of Humane Letters degree.

To **WILLIAM S. CUMMINGS**, A58, “giving back” often means “paying it forward” by investing in worthy projects and people with promising futures. Widely known as an enormously successful real estate developer and founder of the flagship firm Cummings Properties LLC, he is equally well known as a philanthropist, having established Cummings Foundation in 1986.

Cummings Properties was founded in 1969 with the construction of Cummings Park, followed by the adjacent Tower Office Park, in Woburn, Massachusetts. Today,

the corporation operates nearly eight million square feet of office and research space as well as luxury condominiums and other residential properties in ten metropolitan Boston communities. In 1998, Cummings was named Real Estate Entrepreneur of the Year for New England by Ernst & Young.

Cummings, who grew up in Medford, Massachusetts, attributes his extraordinary success to being able to take calculated risks and knowing how to draw on others' strengths. "I like to foster the attitude that, whatever idea you have, if you do it alone, it will be only eighty percent as good as it could be," he said.

Today, most of Cummings Properties' investment portfolio has been donated to Cummings Foundation, now one of the largest charitable foundations in Massachusetts, with assets of \$500 million. Cummings and his wife, Joyce, spend much of their time working for the foundation.

The foundation owns and operates two nonprofit independent and assisted-living facilities, New Horizons at Choate and New Horizons at Marlborough, which collectively serve more than five hundred senior citizens. The foundation also supports the McKeown Scholars program, which awards college scholarships in the communities where most of Cummings Properties' five hundred employees live.

Through the foundation, Bill and Joyce Cummings endowed the Cummings Family Chair in Entrepreneurship and Business Economics in the School of Arts and Sciences at Tufts University and made the landmark \$50 million naming gift for the Cummings School of Veterinary Medicine.

Bill Cummings has served as a director of the Woburn Boys and Girls Club for twenty-five years. Since the early 1990s, he also has published three community newspapers, has served on boards of directors, and has even been licensed as an auctioneer and a justice of the peace.

He is a trustee *emeritus* of Tufts University and was an overseer to Tufts School of Medicine. He is a recipient of the Distinguished Service Award, the highest honor the Tufts University Alumni Association confers upon an alumnus.

Tufts will award Cummings an honorary Doctor of Public Service degree.

**GEN. JOSEPH P. HOAR**, A56, retired from the United States Marine Corps in 1994 after a long and distinguished career. During his last three years of active service, he was the commander in chief of the U.S. Central Command, the unified command that has planning and operational responsibilities for nineteen countries in the Middle East, South Asia, and the Horn of Africa.

Highlights of his tenure include enforcement of the naval embargo in the Red Sea and the Persian Gulf and the no-fly zone in southern Iraq, humanitarian and peacekeeping operations in Kenya and Somalia, support for operations in Rwanda, and the evacuation of United States civilians from Yemen during the 1994 civil war.

Hoar was the deputy for operations for the Marine Corps during the Gulf War, and prior to that, he was General H. Norman Schwarzkopf's chief of staff at Central Command.

Hoar grew up in Brighton, Massachusetts, and attended Boston College High School. He received his undergraduate degree in psychology from Tufts in 1956, and is celebrating his fiftieth reunion this year. He also holds a master's degree from George Washington University. His wife, Dr. Charlie Hoar, a licensed clinical psychologist, earned her undergraduate degree from Tufts in 1957.

"I still think the value of liberal education is without parallel," he says. "Tufts has made a huge difference to me."

After graduating from Tufts, he went to work in New York City, learning to buy

and sell futures in the metals market. He received a draft notice, and chose to enlist in the Marines Corps at the Officer Candidates School at Quantico, Virginia. Although he intended to serve for three years, he said he realized he could be successful in the Marines and decided on a military career.

Hoar has held a broad range of command and staff assignments. As an infantry officer, he commanded at all levels, from platoon to regiment. He also commanded three Marine Corps Air Ground Task Forces. He holds numerous military decorations from the United States as well as the Vietnamese Armed Forces.

Following his retirement from the military, Hoar formed the consulting firm of J.P. Hoar & Associates, which is engaged in business development in the Middle East and Africa.

Since 2002, Hoar has actively opposed the war in Iraq. He has testified before the Senate Foreign Relations Committee and the Senate Armed Services Committee and has written several articles for newspapers and magazines about his opposition.

He is a director of Quantum Group Inc., in San Diego, California, and a trustee of Suffolk University in Boston and the Center for Naval Analysis in Washington, D.C. Hoar is chairman of the board of the national security studies program at the Maxwell School of Citizenship and Public Affairs at Syracuse University.

The university will award Hoar an honorary Doctor of Public Service degree.

**LYNN MARGULIS** is a scientist and a pioneer. Her groundbreaking theories on the origins of cells and other evolutionary problems were regarded as radical when she first put them forth some forty years ago. Now, her ideas are accepted.

With many colleagues, she revolutionized scientific classification. And she helped Dr. James E. Lovelock develop his concept known as “the Gaia hypothesis,” which claims the Earth’s surface forms a physiological living system. In short, Margulis has made a career of pushing boundaries, even when her ideas take us beyond the accepted concepts.

A Distinguished University Professor in the Department of Geosciences at the University of Massachusetts at Amherst, Margulis was on the faculty at Boston University for twenty-two years. She was elected to the National Academy of Sciences in 1983 and received the Presidential Medal of Science from Bill Clinton in 1999. The Library of Congress announced in 1998 that it will permanently archive her papers.

Born in Chicago, she entered the University of Chicago at age fourteen and received her idiosyncratic liberal arts bachelor’s degree in 1957. She holds a master’s degree from the University of Wisconsin and a Ph.D. in genetics from the University of California at Berkeley. She is involved in science education activities from middle school to graduate and adult education levels.

Margulis is an expert in cell biology and microbial evolution. She is best known for her theory of “cell symbiogenesis,” which argues that inherited variation, most significant in evolution, is not due mainly to random DNA mutations. Rather, new species evolve through a process of “symbiotic merger,” the fusion of different kinds of organisms that make new forms.

Margulis still has trouble finding grant support for her work, even though much of it is now acceptable to the scientific community. “I greatly admire Lynn Margulis’s sheer courage and stamina in sticking by the endosymbiosis theory and carrying it through from being an unorthodoxy to an orthodoxy. This is one of the great achievements of twentieth-century evolutionary biology,” wrote evolutionary biologist Richard Dawkins.

She is the author of numerous books, including scholarly works, essays, and one

novel, in press for 2007. She has co-authored more than eight books with her son, science writer Dorion Sagan. Along with K.V. Schwartz, she has written *Five Kingdoms: An Illustrated Guide to the Phyla of Life on Earth* (4th edition, Academic Press, in press, 2008).

As a species, Margulis says, we should be more mindful of the environment that sustains us. “We humans should be more humble. ‘Humble’ comes from *dghem*, an ancient Indo-European word that means Earth. It’s the root of *humus*, *humanities*, *human*, and *humanity*. All of these things are, in some sense, of the Earth and from the Earth,” she says.

“The world is full of nonhuman splendor,” she wrote, “and I think people are healthy and happy insofar as we interact with that splendor. The trend toward environmental destruction of our non-human planetmates and their habitats is treachery.”

Margulis will receive an honorary Doctor of Science degree.

She’s painfully shy. She’s soft-spoken and demure. But in her roles as a pediatrician, minister, and anti-slavery activist, **GLORIA WHITE-HAMMOND**, M76, doesn’t know how to quit.

Over the past twenty-three years, this quiet woman has made herself into a ferocious tiger for change in the lives of countless afflicted and forgotten people, from black female teens adrift on the streets of Boston to throngs of Sudanese enslaved beneath a burning African sun. White-Hammond is both a physician and a minister, and her practice extends from heaven to hell and back. There are no boundaries to her compassion or her care. Faith is her inextinguishable pilot light.

Her quest began with medicine. When she was eight or nine years old, Gloria White walked into her town library, plucked *How to Become a Doctor* off the shelf, and took it home to read. She was the third of eight children born to a stay-at-home mom and a dad who was a sergeant in the Air Force; the family moved around a lot, with brief stays in Texas, Tennessee, Maine, New Hampshire, Guam, and finally rural Indiana, where she graduated from high school.

White attended college at Boston University. She married Ray Hammond, a student at Harvard Medical School, during her first year as a Tufts medical student.

Following her pediatric residency, White-Hammond became a physician at the South End Community Health Center in Boston, where she remains on staff. The center serves a population that is some sixty percent Latino and thirty percent African-American. She noticed that her patients were showing up with more than medical problems; they were also wrestling with social issues such as academic underperformance and marginal family backgrounds. To address these greater needs, White-Hammond launched a bold program called Do the Write Thing a dozen years ago. It was aimed at inner-city girls between the ages of eight and seventeen.

In meetings held once a week at her church, White-Hammond pressed the girls to be more accountable in their lives. She gave them weekly writing assignments and got them reading Toni Morrison. She took them to plays in Boston. “She exposed us to culture we’d never seen before,” recalls one participant. “She opened up our minds.” Since its inception, Do the Write Thing has touched the lives of hundreds of girls, all of whom have either graduated from high school or earned their GEDs.

During this period, White-Hammond decided to become a minister. “That was a watershed moment for me,” she says, describing it as “a sense of yielding to the call.” She enrolled at Harvard Divinity School, from which she graduated with her M.Div. degree in 1997. Currently co-pastor with her husband of the Bethel A.M.E.

Church, White-Hammond devotes half the week to her religious obligations and shares preaching duties with her husband.

Her engagement with the issue of African slavery represents a further widening of the arc of her compassion and care. Since 2001, while working part-time as a pediatrician and part-time as a minister, White-Hammond has traveled to Sudan repeatedly to help purchase the freedom of some ten thousand slaves. These trips are arduous and filled with danger, as negotiations must proceed in the midst of a war zone. White-Hammond says only, "I don't come from people who shrank back." She and some friends have established a group called My Sister's Keeper, which has bought grinding mills for women in southern Sudan and established a school for one hundred girls there, encouraging them all to prosper and grow.

In February 2005, White-Hammond traveled to the Darfur region of Sudan to listen and learn from female victims of genocide. She currently serves as cochair of the Massachusetts Coalition to Save Darfur and is chairwoman of the national Million Voices for Darfur campaign.

White-Hammond has never known how to shrug things off. Whether in Boston or Africa, she can't leave troubled people alone. She insists on going the extra distance—the humanitarian and spiritual lengths that her faith demands of her—in order to heal them.

Tufts will award her an honorary Doctor of Humane Letters degree.

## One Building, Four Professors, Seven Students. . .

### NOTES ABOUT TUFTS AND ITS COMMENCEMENT EXERCISES

Tufts College opened its doors in 1854 under the modest but courageous leadership of Hosea Ballou 2d. Hesitant as to his fitness for the presidency, he wrote to his brother Levi: “But I shut my eyes to the consequences, and rush forward . . . I am in for it, and if I come out ground to powder, I hope it will bring the price of flour down.”

The distinguished Ballou and his successors wrought well, however, for Tufts College has grown from its original complement of “one building, four professors, seven students” into a university with a full-time faculty and staff of more than 3,800 and student enrollment of more than 9,000. The climax of the academic year has traditionally been a public Commencement, which for many years was scheduled on the second Wednesday in July. The first Commencement at which degrees were conferred took place on July 8, 1857, when three candidates were graduated. In those days students were assigned Commencement parts in accordance with their class rank, and appropriate addresses were delivered in Latin. Until 1879, the degree candidates were listed alphabetically. Until 1875, the morning Commencement exercises were followed by a formal program in the afternoon under the auspices of the leading undergraduate literary and debating club. In 1875, the afternoon program was conducted by the Association of Alumni and marked their increasing interest in the affairs of their alma mater. Printed circulars of the first Commencement were sent to all Universalist pastors to read to their congregations, and special notice was given that ladies were invited to all of the festivities.

*Source: Light on the Hill: A history of Tufts College, 1852–1952, by Russell E. Miller*

Since that auspicious day in July 1857, Tufts has conferred 131,213 earned degrees. The Medical School opened in 1893, and the first graduating class consisted of twenty-two students, including eight women. Since then, it has conferred 12,206 M.D. degrees.

The Boston Dental College was incorporated into Tufts in 1899, and all graduates after this union received the Doctor of Dental Medicine from Tufts instead of the degree of Doctor of Dental Surgery. Thus, Tufts became one of only three dental schools in the United States to award the D.M.D. instead of the D.D.S. as the degree for general practitioners of dentistry. The Tufts University School of Dental Medicine has conferred 10,552 D.M.D. degrees.

The Fletcher School of Law and Diplomacy opened its doors in 1933 to twenty-one students, all college or university graduates. In 1935, fourteen students received the Master of Arts degree, and at the same Commencement, the first Master of Arts in Law and Diplomacy was awarded. Since 1935, the Fletcher School has conferred 3,148 Master of Arts degrees, 3,977 Master of Arts in Law and Diplomacy degrees, and 621 Doctor of Philosophy degrees.

The Tufts University School of Veterinary Medicine was founded in 1979 and has conferred 1,545 Doctor of Veterinary Medicine degrees. It is New England’s only veterinary school and was named Cummings School of Veterinary Medicine in 2005.

The Sackler School of Graduate Biomedical Sciences was established in 1980 in cooperation with the schools of medicine, dental medicine, and veterinary medicine, and with the Graduate School of Arts and Sciences. Furthering Tufts' commitment to multidisciplinary health investigations, the Sackler School has conferred 527 degrees.

The Gerald J. and Dorothy R. Friedman School of Nutrition Science and Policy began as the Graduate Department of Nutrition in the College of Arts and Sciences in 1976. It began operation as a school in 1981. Since then, the school has conferred 798 degrees.

#### THE COMMENCEMENT EXERCISES

Today the Tufts Commencement exercises open with an academic procession that brings all participants to the Academic Quad in front of Ballou Hall, where the first Commencement was held. Candidates for degrees lead the procession, followed by members of the faculty. Members of the administration, deans, trustees, and honorary degree recipients are ushered in by the Marshal of the 25<sup>th</sup>-year Reunion Class of 1981, Margaret D. Ingalls, to seats on the platform. Professor of Classics Peter L.D. Reid, the Presenter, carrying the official mace, leads the platform party and its final marcher, President Lawrence S. Bacow.

#### ACADEMIC REGALIA

Traditional academic regalia has been worn by the Tufts faculty since the Commencement of 1906. The gown for the Bachelor's degree has pointed sleeves and is designed to be worn closed. The Master's gown has elbow-length, pointed sleeves; the Doctor's gown has bell-shaped sleeves; both may be worn open or closed. The Doctor's gown is faced, and the sleeves are trimmed with velvet. By its color and its arrangement, the hood worn with the gown indicates the wearer's highest advanced degree, the field in which it was awarded, and the school from which it came. The lining of the hood carries the school's colors, brown and blue in the case of Tufts. The velvet edging on the hood, wider for the Doctor's degree than for the Master's degree, signifies by its color the field in which the degree was designated. Master of Science and Doctor of Science hoods are trimmed in yellow; Engineers in orange; Medicine in green; Dental Medicine in lilac; and Doctor of Philosophy in blue. The mortarboard or Oxford-type cap is the one usually worn, but of late, the soft cap, which resembles an oversized beret, has come into favor because of its comfort. Tassels, other than the universally accepted black, may indicate by the various colors the field of learning in which the degree is earned, while the gold tassel generally signifies a doctoral degree.

## Tufts' First Commencement

---

*Excerpted from Light on the Hill: A history of Tufts College, 1852-1952, by Russell E. Miller*

The first Commencement exercises were held on July 8, 1857, when three young men received the Bachelor's degree – Heman A. Dearborn, of Weare, New Hampshire, William N. Eayrs, of Boston, Massachusetts, and Harvey Hersey, of Calais, Vermont. At the Chapel exercises in the forenoon the Latin Salutatory was given by Mr. Hersey, the Philosophical Oration on the "Study of Man," by Mr. Eayrs, and the Valedictory by Mr. Dearborn. Great enthusiasm was shown during the exercises, and the *Boston Journal* records that "the President, calm as he is ordinarily, was at times moved to tears."

The Commencement dinner was served in a large tent, and a long list of toasts met with enthusiastic responses. At three o'clock in the afternoon special exercises were held under the auspices of the Mathetican Society. It is recorded that this day, like all the college festival days which had preceded it, was beautiful, bright, and clear.

The college was not so fortunate in its next Commencement, however, for the day was characterized by a most unpleasant drizzling rain. The chapel was so crowded that many could not obtain admission, and the "Trumpet" says that "the ladies with enlarged skirts found themselves in a peculiarly inconvenient situation." At this second Commencement the entire class of nine members received the degree, and for the next four years no student who had attained to Senior standing failed to graduate.

*Although the first Commencement exercises were held in 1857, the 150th Commencement is being held in 2006. The reason for this is that in 1943, during World War II, two Commencement ceremonies were held.*

## Order of Events Phase II School of Arts and Sciences

---

In 2001, President Lawrence S. Bacow created the Task Force on the Undergraduate Experience to evaluate the intellectual climate at Tufts, the community in which students learn, and the coherence of the educational experience. One of the recommendations made by the Task Force was to enhance Commencement by organizing smaller, more intimate degree-awarding ceremonies for departments within the School of Arts and Sciences and for the School of Engineering. The new plan was adopted and first implemented in May 2004. While the first phase of Commencement remains an all-university event, the second phase now features departmental celebrations in which students receive degrees from faculty in their major discipline side-by-side with their academic peers.

Undergraduate and graduate students in the School of Arts and Sciences participate in department ceremonies. The School of Engineering holds one ceremony for all graduating students. Each celebration has a unique order of events that reflects the character of the departments involved. We invite you to enjoy the ceremonies. The recognition of our students is well deserved. We congratulate all of our graduates for their academic achievement and wish them well in the future.

### DOCTOR OF PHILOSOPHY

#### **Diah S. Bramono**

Biomedical Engineering,  
B.S., Tufts University  
Dissertation: "Characterization of  
Anterior Cruciate Ligament (ACL)  
Cells and Optimization of an  
Engineered Ligament through  
Mechanical Stimulation"

#### **Jia Huang**

Chemical Engineering,  
Ph.D., Sichuan University /P.R.  
China  
M.S., Sichuan University /P.R. China  
B.E., Chengdu University of Science  
and Technology / P. R. China  
Dissertation: "Assembly and  
Structure of Fibrous Proteins -  
Bombyx mori Sericin, Nephila  
clavipes Dragline Silk and Human  
Type I Collagen"

#### **\*\*\*Karel Martin Kapoun**

Chemical Engineering,  
B.S.CHE., University New  
Hampshire  
M.S., Ecole Centrale / Paris  
Dissertation: "Water-Gas-Shift  
Membrane Reactor for Pure H<sub>2</sub>  
Production - Theory and  
Experiments"

#### **Xiaoyan She**

Chemical Engineering,  
M.S., Tufts University  
M.S., Tianjin University / P.R. China  
B.S., Chengdu University of Science  
and Technology/P.R. China  
Dissertation: "Activity and Stability  
of Ag-Alumina Catalysts for the  
Selective Catalytic Reduction of NO<sub>x</sub>  
with Methane"

#### **\*\*Yipeng Wang**

Chemical Engineering,  
M.S., Tianjin Institute of Light  
Industry / P.R. China  
B.E., Tianjin Institute of Light  
Industry / P.R. China  
Dissertation: "Searching for Genes  
Mediating Autolysis and Bacterial  
Cell Death in Bacillus subtilis"

#### **Yongzhong Wang**

Chemical Engineering,  
M.E., Dalian University of  
Technology /P.R. China  
B.E., Harbin Engineering University  
/ P.R. China  
Dissertation: " Regulation of Bone  
Marrow Mesenchymal Stem Cells,  
Cell-Cell, and Cell-Matrix  
Interactions"

#### **Peng Xu**

Biotechnology Engineering,  
M.S., University Massachusetts /  
Lowell  
M.S., Tsinghua University / P.R.  
China  
B.E., Tsinghua University / P.R.  
China  
Dissertation: "Molecular Control of  
Biopolymer Assembly on Surfaces"

#### **\*John David Zolock**

Mechanical Engineering,  
M.S., Pennsylvania State University  
B.S.ME., Grove City College  
Dissertation: "A Methodology for  
the Modeling of Forced Dynamical  
Systems From Time Series  
Measurements Using Time-Delay  
Neural Networks"

#### **Jin Zou**

Mechanical Engineering,  
M.S., State University of New York at  
Binghamton  
B.S., Zhejiang University / P.R.  
China  
Dissertation: "Design, Analysis,  
Fabrication and Testing of a Multi-  
Step Enzymatic-Cascade  
Microsystem"
