DATE: March 7, 1990
SUBJECT: January Activity Report

I went to the cities of Wadena, Olivia, and Morris, Minnesota. I communicated with city and county local governments discussing the Clean Air Act. Naturally, I ended up talking about cigarettes and cigarette vending machines. The only one who had a little concern about cigarettes was Morris, because of the junior college there. I suggested to them that if it became a great concern, they could use the electronic coins. I also suggested that they wait until this legislative session because I thought there would be some phase of legislation pertaining to tobacco.

I have also been meeting with Minneapolis and St. Paul. I think that there will be an agreement soon pertaining to vending machines.
