

BICKERSTAFF'S
BOSTON

ALMANACK,

OR FEDERAL CALENDAR, for 1789.

First after LEAP-YEAR and Thirtieth of INDEPENDENCY.

WASHINGTON and LIBERTY forever.

The Rising Glory of the AMERICAN EMPIRE.

BOSTON, Pr. by E. RUSSELL, next Lib. Pole.

PREFACE TO THE PUBLICK.
KIND READER,

THE favourable reception of my former Calculations of this kind, would render a PREFACE to this WORK altogether unnecessary, were it not that this year appears pregnant with extraordinary events, which could not well be passed over unnoticed. The appearance of the COMET, or BLAZING-STAR, the latter end of last and beginning of this year, will, doubtless, be deemed omenous. Should any dispute this, let them take a view of France, Turkey, Russia and Sweden, and see what effect this COMET's influence on the human species has already produced.

THE TRANSIT of MERCURY presages something uncommon: But as the greatest part of this TRANSIT will happen when he is easterly of us, it is an omen in our favour. But we may depend on some very extraordinary events taking place in several parts of our globe this year; and should we be so fortunate to escape the scourge which awaits some other countries, we may hope for something important taking place among us, which will cause future generations to call to mind the year 1789, with joy and satisfaction: The year in which the illustrious PATRON of the United States was called forth from the more soft amusements of life (to which he had retired victorious from the field of Mars) to take the Reins of Government; an æra which will ever be celebrated annually with joy, in every American mind, as it is the commencement of a stable and permanent Government, which gives us rank and respectability among the nations, and guards us against the insults of any earthly potentate; a government under which agriculture, manufactures and commerce will equally flourish, and every class and denomination of citizens be duly protected and encouraged; consequently produce peace and plenty throughout the Union.

I WILL just observe, that in this Almanack you will find what never before appeared in any work of this kind, viz, a few of such eclipses of Jupiter's first satelite, as can best be observed by us, and the conjunctions, oppositions, &c. of the new discovered planet HARSHEL.

PERHAPS some may find fault with my Almanack because the calculations are different from others; but pray do not condemn me before you compare these calculations with observations or with the calculations of the COMMISSIONERS of LONGITUDE, and then I believe I shall be acquitted. I do not wish to agree with some, and to make my calculations agree with all is impossible, for we have now a number of Quibblers who not only differ from each other, but some of them can scarcely agree with themselves, and far less with true calculations.

As the History of our own Country must be a pleasing subject to every Friend thereto, I have inserted a Geographical and Historical Account of the UNITED STATES, and hope it will be acceptable to my kind Readers.

I HAVE, as in my former Almanacks, purposely omitted inserting the several aspects of the planets, which some so much abound with, (not being understood by many, and of very little use to any persons:). Instead thereof, have inserted what appeared to me more useful. Should this Diary meet your approbation, equal pains will be taken to gratify you the ensuing year.

I WILL now conclude my PREFACE, by taking leave of my generous READERS wishing them, the ensuing and all their years, not only the inestimable blessings of PEACE, LIBERTY and SAFETY, but every other felicity this world can afford; and remain, their sincere Friend and most obedient, humble Servant,

ISAAC BICKERSTAFF, Esq.

ECLIPSES for the Year 1789.

FOUR Eclipses this Year, two of the Sun, and as many of the Moon. The first will be of the Moon, May 9th, viz.

Beginning	3 h. 54 m.	} Morn.
Middle	4 47	
End	5 40	
Duration	1 46	
Dig. eclipsed 2° 54' on the northern limb.		

Note. Only the first half of this Eclipse will be visible to us.

The second will be a Solar Eclipse, May 24th, at 18 m. after 5 o'clock in the afternoon invisible to us, on account of the moon's southern latitude.

Third will be a Lunar Eclipse, Novem. 2d, as follows;

Beginning	6h. 43m.	} Evening.
Middle	7 48	
End	8 52	
Duration	2 9	
Digus eclipsed 3° 40' on the southern limb.		

The fourth will be of the Sun, November 16th, at 38m. after 10 o'clock in the evening, invisible.

VULGAR NOTES for the Year 1789.

Golden Number,	4	} } Cycle of the Sun, - 6	
Eoact,	3		} } Dionysian Period, - 118
Dominical Letter,	D		

•• The new discovered planet Herschel will be opposite the sun 21st Jan. 5 cl. mor. Its 3d q. will be Ap. 20, 8 cl. mor. Its conjunction with the sun, July 27, 6 clock evening: Its first quarter November 1st, at 6 o'clock in the morning.

Besides the Eclipses, there will be a TRANSIT of the planet MERCURY over the Disk of the Sun, Nov. 5, as follows :

Beginning	8 h. 26 m.	} Morn, Even.
Middle	10 53	
End	1 20	
Duration	4 54

Mid. of Transf.

Those inclined to view the Transit and have not a telescope, may use smok'd glass.

This calculation is made for 71 d. W. of Greenwich ; the times differ from those mentioned in the Columb. Mag. for its appearance at Boston 2 m. It is probable that Author puts Bost. in 70 $\frac{1}{4}$ d. W of Greenw. if so, the calcu. are alike, when 2m. are allow'd for $\frac{1}{4}$ d.

The Author of this knew nothing of the calculation being in the Magazine, until it was gone to the Printer.

The COMET or BLAZING-STAR, (from which some predictions are mentioned in the Preface) will be discovered first in more southern lat. in the mor. with its tail extended westerly.

SUP. JUD. COURTS in MASSACHUSETTS-BAY.

On the Appearance of the BLAZING-STAR, in 1789.

The Comet blazes, carnage stains the field,
Great Generals, proud of conquest, forc'd to yield;
Great nations pull each other quite afunder,
COLUMBA rising to a pitch of wonder,
Welcomes the vanquish'd to her favour'd shore,
Where tyrants and despoticks are no more.

It is H. Water at Salem, Marblehead, Cape-Ann, Ips-
wich, New-Port, 20m. sooner than at Boston; 2h. 26m. sooner
at Tappan-Cove, New-London, New-York; 3h. sooner at
Rhode-Island and Amboy; 3 h. sooner at Sandy-Hook; 5 $\frac{1}{2}$ h.
sooner at Albany; 3 h. later at Philadelp. half h. later N. Havea.

The times of the eclipses of Jup. & it's satellite, mentioned in
the monthly pages, is the time of immersion or begining of the
eclipses of January 10th, and of those mentioned in Novem-
ber and Dec. but 'tis the times of emerision, of those mention-
ed in the other months, as well as of that of the 20th of Jan.

A general Description of AMERICA.

THIS great western continent, frequently denominated, The new World, extends from the 30th degree north, to the 56th degree of south latitude, and where its breadth is known, from the 35th to the 136th degree of west longitude, from London, stretching between 8 and 9000 miles in length, and its greatest breadth 2690. It sees both hemispheres; has two summers and a double winter; and enjoys all the variety of climates which the earth affords. It is washed by two great oceans. On the east it has the Atlantick, which divides it from Europe and Africa. On the west it has the Pacifick, or great south sea, by which it is separated from Asia. It is composed of two great continents, one on the north, the other upon the south, which are joined by the kingdom of Mexico, which forms a sort of isthmus 1500 miles long, and in one part of Darien, so extremely narrow, as to make the communication between the two oceans by no means difficult, being only 60 miles over. In the great gulph which is formed between the isthmus and the northern and southern continents, lies an infinite multitude of islands, many of them large, most of them fertile; and denominated the West-Indies, in contradistinction to the countries and islands of Asia, beyond the Cape of Good-Hope, which are called the East-Indies.

UNITED STATES of AMERICA.

IT was on the 4th of July 1776, that Congress made their Declaration of Independence, and assigned Reasons for withdrawing their Allegiance from Great-Britain; on the 30th of Nov. 1782, the King of Great-Britain acknowledged the Thirteen Colonies to be Free, Sovereign, and Independent States. We hope the following Geographical Account of the UNITED STATES will be agreeable to our Readers, viz.

M A S S A C H U S E T T S - B A Y.

Miles.	}	between	{	Degrees.
Length, doubtf.				42 and 45 N. Lat.
Breadth, doubtf.				70 and 75 W. Long.

Gov. His Excellency JOHN HANCOCK, Esq.

THE State of Massachusetts-Bay, comprehends the Colony of Massachusetts-Bay, granted by the Council of Plymouth, to Roswell and others in 1627; the Colony of Plymouth, granted by the same Council, to William Bradford in

1629; and, the Province of Main, granted by the same Council to Robert Gorges, in 1622.

The two latter, together with the Territory of Sagadahock, were annexed to the former by a Royal Charter, dated October 7th, 1661.

The Intervention of the State of *New-Hampshire* separates the Province of Main and the Territory of Sagadahock, from the other Parts of the State of Massachusetts-Bay, and it will be difficult to convey a just Idea of either the Situation or Extent of this very large Commonwealth.

N E W - H A M P S H I R E .

Miles.	}	between	}	Degrees.
Length 250				45 and 49 N. Lat.
Breadth 140				67 and 72 W. Lon.

President, His Excellency JOHN SULLIVAN, Esq;

THIS State was granted by the Council of Plymouth to Captain John Mason: The Capital of it is *Portsmouth*, situate upon the River Piscataqua, which has a very fine Harbour, and this, indeed, is the only Port of any Consequence in the State.—The Climate is healthy, and the Soil various:—Towards the Sea Coast, and in many inland Parts the Soil is sandy, but yields good Pasturage; and the back Lands which have been cultivated are very fertile, and produce Indian Corn, Rye, Barley, Oats, Beans, Peas, Flax, Hemp, &c.

In New-Hampshire, as in the Rest of the United States, there is no particular religious Establishment, but every Man is at Liberty to worship God according to the Dictates of his own Conscience.

The Legislature consists of a Council, and a House of Representatives, both chosen annually by the People. The President of the Council acts as Governor of the State, is Captain General of the Militia and Vice Admiral.

C O N N E C T I C U T .

Miles.	}	between	}	Degrees.
Length 90				40 and 43 N. Lat.
Breadth 60				72 and 74 W. Lon.

Gov. His Excellency SAMUEL HUNTINGTON, Esq;

THIS State comprehends the old Colonies of Connecticut and New-Haven.

The Face of the Country is generally very uneven, and in many Places extremely stony, yet the Soil is fertile and the Produce plentiful: The latter consists of Wheat, Rye, Indian Corn, Oats, Barley, Flax, Hemp, &c. &c.

The old colony of Connecticut was originally settled by emigrants from Massachusetts-Bay, about the year 1635; and in 1662 the colony of New-Haven was united with it, and the common name Connecticut given to both. Since this union the state has had two capitals, Hartford and New-Haven.

When the wind is Easterly, it will be High Water at Boston later; but when Westerly, earlier than the time specified above. In the former case, higher; in the latter, lower than common.

Besides the city of Hartford and New-Haven, three others have been lately incorporated, viz. New-London, Middletown and Norwich.

The principal rivers in the state are, the Connecticut.

Governor, His Excellency JOHN COLLINS, Esq;

THE first settlers of this state were inhabitants of some of the other New-England colonies, from whence they removed on account of a difference in their religious sentiments, some of them fixed themselves at Providence, and others on Rhode-Island; and their settlements were distinguish-

IX. SEPTEMBER, hath 30 DAYS. 1789.

number of elegant houses, and is the capital of the state. Here is a college, at which the same degrees are conferred, as in the European Universities. It is a large brick building, on a very convenient plan; and, from its situation on an high hill, commands an extensive and elegant prospect of the town, river and adjacent country. Providence river runs through the town, and is crossed by a wooden bridge, on stone piers.

Island of Manhattens, or New-York, is about a mile and a half in length, and half a mile broad, contained before the fire on 21st of Sept. 1776, and 3d of August, 1778, about 4200 houses, and 30,000 inhabitants. It was put under the government of a Mayor, five Aldermen, and a Sheriff, by Governor Nicholls, in 1665; since that time several charters have been
 [Continued next ROADS.] granted.

General History of AMERICA, continued from Calendar Pages.

granted. It is divided into 7 wards, and is under the government of a Mayor, Recorder, 7 Aldermen and 7 Assistants, or Common Council Men. The Mayor, Sheriff and Coroner, are annually appointed by the Council of Appointment: The Recorder has a patent during pleasure: The Aldermen, Assistants, Assessors and Collectors, are elected annually by the freemen and freeholders of the respective wards. The Mayor appoints his deputy, and together with 4 Aldermen, has the nomination of a chamberlain. The Mayor or Recorder, Aldermen and as many Assistants, form the Common Council of the City of New-York, and this body by a majority of voices, has power to make bye-laws for its government, which are binding only for a year, unless confirmed by the Governor and Council. They have power to regulate ferriages, markets, fairs, assize of bread, wine, &c. licensing and regulation of tavernkeepers, carters, &c. The Mayor, his Deputy, Recorder and Aldermen, are, ex officio, Justices of the Peace; can hold a court of Record once a week, to take cognizance of all civil causes, and a court of general quarter sessions of the peace.

VIRGINIA. Excellency EDMUND RANDOLPH, Esq; Gov.
 Length 750 M. } between { 36 and 40 Dg. N. Lat.
 Breadth 240 — } { 75 and 90 — W. Lon.

VIRGINIA is remarkably pleasant and commodious; having the river Potowmack on the N. E. which separates it from Maryland; the Atlantic Ocean on the E. Carolina on the S. and the Apalachian Mountains on the W. which divide it from a vast tract of land in Canada and Louisiana.—The principal towns are Richmond, Williamsburgh, Norfolk, Alexandria, Petersburg and Fredericksburgh.—Richmond is now the seat of government, and is situated near the Falls of James river.—Williamsburgh is the capital of Virginia, and was formerly the seat of government: It is situated between two creeks, one falling into York, and the other into James river, and contains about 200 houses. Here is a university, formerly called William and Mary.—Norfolk, situate on the south bank of James river, was burnt by the Liverpool man of war, Jan. 2, 1776, to the amount of 300,000l. sterl. damages: 'Tis mostly rebuilt, and has one of the best harbours in North-America.—Alexandria, situate on the river Potowmack, is increasing beyond expectation in the commercial line, and is no more than 8 miles from the seat of that illustrious American hero, General WASHINGTON.—Fredericksburgh is on Rappahannock river; and Petersburg is a growing place, on Appamatow river. Universal toleration is allowed in this state. Towards the sea shore and the banks of the rivers, the soil of Virginia consists of a dark rich mould, which, without manure, returns plentifully whatever is committed to it. At a distance from the water, there is a lightness and sandiness in the soil, which, however, is of a generous nature, and helped by a kindly sun, yields corn and tobacco very well. [To be continued.]

OSGOOD CARLETON, Teacher of Mathematicks, near Oliver's-Dock, Boston, teaches the method of finding the longitude at sea, by Lunar Observations; which method has been tried and approved by sea-faring Gentlemen whose learning and talents renders them competent judges.—He likewise continues to teach other branches of education as usual.

PUBLICK Securities of all kinds bought by WILLIAM BRYANT at his office, No. 34, Marlboro-Street, opposite the State Treasurer, Boston.—At the same place may be had, cheap for cash, certificates that will pay state or continental taxes:—Orders that will pay impost and excise:—Certificates that will pay taxes in New-Hampshire state.—Choice INDIGO.

ROBERT LAFFAN,

SOAP-ROLLER and TALLOW-CHANDLER, from EUROPE.
He is now from the city of NEW-YORK, (where he carried
on the Soap-making and Tallow-chandling Business.)

He has leave to inform his FRIENDS and the PUBLICK in
general, that he continues to carry on the above business
in its various branches; in SHORT-STREET, the bottom of
Rowe's LANE, and at his Store, the head of DOBBS'S
WHARF, in FORT-STREET, North-End, BOSTON;—Where
they always be had, wholesale or retail, at the very lowest
rate for cash, the best of crown soap, rosin and Cattle do;—
white soft-soap by the barrel, for the use of families;—
Also, mould and dip'd candles, for families or shipping;—
the best of Rush-Lights, by the box or single pound, as low
as can be had in BOSTON, &c.

Large allowances to those who purchase any of the above
articles by the quantity to sell.—CASH and a generous price
for good family-tallow and clean ashes.

Gentlemen Merchants, Shopkeepers and others who please
to honour him with their commance, may depend on being
served with the utmost fidelity and punctuality, and the least
favour will be gratefully acknowledged by the PUBLICK'S
most obedient, humble Servant,
ROBERT LAFFAN.
