

AIRLINER CABIN AIR QUALITY -- POSSIBLE PROJECTS

1. Commission survey of prevalence of cigarette smoking among flight attendants. Such a survey could also recheck the level of flight attendant hostility to "smoky air."
2. Commission retrospective study of lung function and overall health of longterm flight attendants.
3. Engage expert consultant to testify that a sound scientific basis to condemn passive cigarette smoke exposure does not exist.
4. Engage expert consultant to testify that stresses arising from the need to handle the increased hostility levels of deprived smokers would have negative implications for flight attendant health.
5. Smokers' airline -- Air Marlboro.
