Susan:

Re: Schlein and IAQ Legislation

Seems we should continue to help him especially in light of his purported "lead" role with AFL. *yes*

Question arises as to how far we should go in building him up as an IAQ witness. At some point, the local or federal legislative policy will come to a head in a mark-up. Can we go all the way to the edge with AFGE and schlein and then pull back? - No

Can we give O & M the OK to help him with his Kennedy testimony now or must we get Lewis' concurrence? *you don't need Lewis -*

As to Forscey and the D.C. IAQ legislation, can this proceed without further SAD involvement? - *Forscey should not be drafting legislation or talking points. Let's discuss.*
