MEMORANDUM

TO: Martin Gleason

FROM: Susan Stuntz *ms*

As we begin to determine how best to respond to the anticipated OSHA notice on indoor air issues, and how we might encourage our allies to respond, it would be helpful if we knew how many building studies ACVA/HBI has completed on behalf of the Labor Management Committee, where they were done, the symptoms that prompted the unions to ask for help (and which unions were involved) and what the results were.

Would you please ask staff to go through the files and to compile a report that begins to answer these questions? With OSHA giving a 120-day time frame for response, this beginning step will have to be done quickly. But since I have no idea that the universe of studies is that we're talking about, I'll leave it to you and staff to let me know the deadline. Just let me know by Friday what the deadline is that you've set for yourselves.

Thanks.
