

Criminal Justice Reform

Hello,

I am not highly Educated, or an expert, but I feel as though I have a Solution to a problem that has plagued our Country for too long, and has been handled poorly, Criminal Justice, here are a few examples:

1. Rehabilitation V.S. Mass Incarceration,

first we must recognize that there are many factors that play key roles in criminal cases and how they are handled, those same factors that play a role in crimes are not factored in when men and woman are sentenced, The main Role of Judges, and prosecutors, is one of No leniency, Tough on crime, you screw up your Done, and you keep the cycle going with punishing broken people, who have broken people, Incarceration is not the solution to crime, yes some cases must be treated as such, you cant save every one, they have to want it as well and be willing to meet you half way, but I believe the majority of crimes can be either stopped or slowed to near non-existence, by Addressing mental Health, Educating people, and understanding the brain and its functions through psychoanalysis or psychology, the 1st step is to recognize when treatment is needed, then Applying it, Im not saying be soft on crime, but Im also saying Dont be too tough there has to be a middle ground, where people receive help rather than punishment you get a person who has been victimized

and then he or she victimizes, then our System either executes them or throws them away, we see that individual as garbage and nothing more our humanity is stripped away by anger and pain, now a person has lost his or her life, and so has the Attacker, and the victims family is devastated, and so is the family to the victimizer, do you see what's happened? From 1 victim, many more are created, but if we had taken the time to Address his or her mental Health who knows how he or she might have effected many lives in a positive way, If 1 individual can devastate and hurt so many, surely if we save said individual who might said individual in turn save? and thus a new cycle is born, one of Love, and redemption, a cure to the disease that has plagued man kind for too long, we have to stop Acting in emotion, and start listening to our experts, Science and education, so we can fix our problems and quit suffering. This is what I think, Thankyou.

Rehabilitation V.S. mass incarceration
Leniency V.S. lockem up throw away the Key
mental Health, Education, psychology V.S. An eye for an eye, a draconian Concept
born from the Heat of passion rather than using Cool Reflection.

Help bring Hope to the Hopeless, be apart of a Solution, rather than Contributing to what obviously is not working.
