ALS 240, §4)] State law authorizes the Commissioner of Revenue Services to permit sampling of cigarettes or tobacco products so long as (1) sampling is on the premises of a licensed "dealer" or at an event or establishment with an area the access to which is limited to adults provided such distribution is restricted to such area; (2) the sample, if cigarettes, contains no less than 2 cigarettes; and (3) the taxes on such cigarettes have been paid. The section does not apply to the gift or delivery of a package of cigarettes in connection with a sale of similar package of cigarettes. Dealers are liable for samples unlawfully distributed to minors on their premises. [Conn. Gen. Stat. §12-314 (1994) (amended 1996 Ct. ALS 240, §4); 1996 Ct. ALS 240, §5.]

OTHER:

Effective July 1, 1996, state law requires the Commissioner of Revenue Services to prepare a report on enforcement efforts undertaken pursuant to sections 12-286a (signage), 12-289a (vending machine restrictions), and 12-314 (sale of single cigarettes) of the general statutes, and Section 5 of Public Act 96-240 (sampling), and to submit that report annually to two designated legislative committees and to the state agency designated by the governor to reduce the rate at which tobacco products are sold to persons under 18 years of age. [1996 Ct. ALS 240, §7] The report "shall include the number of unannounced inspections conducted by [the] commissioner," and other information related to enforcement efforts. The statutory authority for "unannounced inspections" by the commissioner is unclear. Section 12-330I provides that "the commissioner and his authorized agents may examine the books, papers and records of any distributor or unclassified importer in this state for the purpose of determining whether the tax imposed by this chapter has been fully paid, and may investigate and examine the stock of tobacco products in or upon any premises where such tobacco products are possessed, stored or sold for the purpose of determining whether the provisions of this chapter are being obeyed." [Conn. Gen. Stat. §12-330(I) (1994), as amended by 1995 Ct. ALS26, §13. "This chapter" refers to the chapter containing the tax laws - not sales restrictions.

STATE SMOKING RESTRICTIONS PROFILE

ALASKA

Smoking is permitted in properly ventilated designated smoking areas in public or private elementary or secondary schools, so long as minors are not permitted in the area and a collective bargaining agreement requires the designation of a smoking area. [AK Stat. §18.35.305(1) (Michie 1996)]. Smoking is also permitted in limousines and taxis for hire so long as the driver consents and the driver ascertains that all passengers consent to smoking in the vehicle. [AK Stat. §18.35.310(a)(2) (Michie 1996)]. State law authorizes the designation of smoking sections by "(a) person in charge" of indoor places and vehicles. [AK Stat. §18.35.320 (Michie 1996)]. If smoking areas are designated, "reasonable accommodations" must be made "to protect the health of the nonsmokers who use the place or vehicle by separation, partition, or ventilation that ensures that nonsmokers...are not subject to the active by-products of smoke..." [AK Stat. §18.35.320(c) (Michie 1996)].

State law prohibits smoking on public transportation, including waiting, baggage, and boarding areas, in government-owned, -leased, and -operated buildings or portions of buildings; public or private elementary, secondary, or postsecondary educational institutions, or adult daycare facilities; in courtrooms and jury deliberation rooms, in places under the control of the state legislature; in health care and mental health care offices, institutions, and facilities; in food service establishments with a capacity of at least 50; in grocery stores; in places of employment where a posted sign states that smoking is prohibited by law; in correctional facilities; in elevators; and in Pioneers' Homes. [AK Stat. §18.35.300, §18.35.305 (Michie 1996)]. Violation is subject to a fine of \$10-50. [AK Stat. §18.35.340(c), §18.35.341(c) (Michie 1996)]. Although enforcement proceedings may be initiated by either the Commissioner of Environmental Conservation or by peace officers, a person may not be fined more than once for the same offense. [AK Stat. §18.35.342 (Michie 1996)]. Any affected party or the Commissioner can seek injunctive relief for repeat violations. [AK Stat. §18.35.343 (Michie 1996)].

State law requires the conspicuous display of smoking and no smoking signs. Failure to comply with state signage requirements is punishable by a fine of \$20-300. Each day a signage violation continues after a complaint is filed or a citation is issued constitutes a separate violation. [AK stat. §18.35.330, 18.35.340, 18.35.341 (Michie 1996)] The commissioner of Environmental Conservation and affected parties may seek injunctive relief for repeated violations. [AK Stat. §18.35.343 (Michie 1996)].

ALABAMA

No state laws restrict smoking.

ARKANSAS

State law requires the chief administrative officer of each state agency to promulgate smoking policies for the general office spaces of the agencies, taking into consideration the rights of both nonsmokers and smokers. [Ark. Code Ann. §25-1-102(b) (Michie 1995)] Requires Department of Human Services' to include a ban on smoking in day care centers in licensing requirements. [Ark. Code Ann. §20-78-217(b) (1995)] Unless designated a smoking area, prohibits smoking in school buses; waiting rooms of doctors' and dentists' offices; hospital corridors; nurses' stations in hospitals and clinics; and all shared patient rooms. Exempts hotels, motels and restaurants. Violation by smoker is a misdemeanor subject to fine of \$10 to \$100. [Ark. Stat. Ann. §20-27-702, 20-27-703 (1995)] State law makes it a misdemeanor to smoke in enclosed areas, buildings, or facilities of public elementary or secondary schools, except in designated smoking areas by nonstudents over the age of 18. Violation is subject to a fine of \$10-100. [Ark. Code Ann. §6-21-609 (1995)].

ARIZONA

State law prohibits smoking in state owned or leased buildings, except in areas that may be designated for smoking if Department of Administration determines that physical design of area, use of electrostatic filters, windows or venting to outside will prevent drifting of smoke to adjacent areas. Exempts inmate areas within state prisons, patients at state hospital and other residential facilities, and persons using tobacco for religious or ceremonial purposes. Prohibits discrimination against state employee on basis of use or non-use of tobacco products. [Ariz. Rev. Stat. §36-601.02 (1996)]. State law makes it a petty offense to smoke in the following public areas, except in designated and posted smoking areas: elevators, museums, lecture or concert halls, and public buses; waiting rooms, rest rooms, lobbies, and hallways of health care institutions; public waiting rooms of "health-associated laboratories or facilities" or physicians offices (including dentists, psychologists, podiatrists, chiropractors, naturopaths, optometrists, and opticians); and school buildings. [Ariz. Rev. Stat. §36-601.01 (1996)].

CALIFORNIA

State law prohibits employers from knowingly or intentionally permitting smoking, and persons from smoking "in an enclosed space at a place of employment". [CA Labor Code §6404.5 (Deering 1996) (as amended by AB, effective Jan. 1, 1997)]. Place of employment is defined by the areas it does NOT include, which are exempt from the smoking ban. Areas not included in the definition of place of employment are: (1) 65% of guest rooms in hotel/motels or lodging establishments; (2) 25% of floor space in hotel/motel lobby areas if floor space exceeds 2,000 square feet; (3) 50% of floor space in hotel/motel lobby areas if floor space is 2,000 or less square feet; (4) meeting rooms, banquet rooms in restaurants or convention centers (would ban smoking while food is being prepared or served); (5) retail or wholesale tobacco shops and private smokers' lounges that are attached to a tobacco shop; (6) cabs of motor trucks if no non-smoking employees are present; (7) warehouse facilities with more than 100,000 square feet and 20 or fewer full-time employees; (8) gaming clubs and bingo facilities that do not permit access to minors; (9) bars and taverns; (10) theaters (if smoking is an integral part of the story) and medical research or treatment sites, if smoking is integral to the function; (11) patient smoking areas in long-term health care facilities; and (12) private residences (except those licensed as family daycare centers, during hours of operation and when children are present. Employers are allowed to designate smoking breakrooms if (1) the smoke can be exhausted to the outside by an exhaust fan and the air is not recirculated; (2) standards meet those required by Occupational Safety and Health Standards Board ("OSHSB") or the federal EPA; (3) room is located so that no one must enter it as a part of their work; and (4) comparable nonsmoking breakrooms exist. [CA Labor Code §6404.5(d)]. Workplaces with 5 or fewer employees are allowed to designate smoking areas if (1) smoking area is inaccessible to minors; (2) all employees who would enter or work within area consent; (3) air is exhausted directly outside and not recirculated; and (4) standards meet those required by OSHSB or the federal EPA. [CA Labor Code 6404.5(d)(14)]. Smoking is allowed in gaming clubs, bars, and taverns only until the earlier of the following occurs: (1) January 1, 1998; (2) the date of adoption of a standard of permissible employee exposure to ETS by OSHSB or the federal EPA. If acceptable regulation is adopted on or before 1/1/98, the establishment may permit smoking subject to full compliance within two years; if the regulation is adopted after 1/1/98, smoking is banned until adoption occurs and then establishment would have two years to comply with regulation. [CA Labor Code §6404.5(f)]. From Jan. 1, 1997 through Dec. 31, 1997, smoking may otherwise be permitted in gaming clubs, bars, and taverns if: owner, if practicable establishes a designated non-smoking area, and if feasible, no employee shall be required to enter areas where smoking is permitted in the performance of his duties. Preempts new ordinances related to smoking in places of employment as long as 100% smoking ban in workplaces remains intact. Permits adoption of local restrictions in areas exempted from definition of places of employment. [CA Labor Code §6404.5(f)(h)(i) (Deering Supp. 1997)].

CALIFORNIA, cont'd

State law prohibits smoking in state-owned, -occupied, or -leased government buildings and within five feet of main entrance or exit, and in state vehicles. [CA Govt. Code §19994.31 (Deering 1996)]. Prohibition applies to state agencies, college and university campuses, legislative buildings and to the Supreme Court and Courts of Appeal, but exempts private living quarters of residential facilities and covered parking garages. [CA Govt. Code §19994.30]. State law allows for the accommodation of "the smoking public where it is economically feasible, provided state employees are not required to work in enclosed areas where the probability of exposure to secondhand smoke exists," where such accommodation is provided an agency specified in Division 3 of the Food and Agricultural Code. [CA Govt. Code §19994.34].

Other laws also regulate smoking, although it is unclear to what extent these laws are still effective in light of the broad prohibition noted above. For example, the California Indoor Clean Air Act of 1976 regulates smoking in publicly owned buildings, healthcare facilities, theaters and performance houses, certain restaurants, and retail food production and marketing establishments. [See e.g., CA Health and Safety Code §118875-118915 (Deering 1996)]. Smoking is restricted in certain transportation systems. [CA Health and Safety Code §118925-118945]. Other statutes prohibit smoking by pupils while under the supervision and control of school district employees. [CA Educ. Code §48901 (Deering 1996)]. Smoking is also separately regulated in: (1) licensed family day care home or licensed day care centers [CA Health and Safety Code §1596.795 (Deering 1996)]; (2) certain health care facilities [CA Health and Safety Code §1286]; and (3) certain food facilities [CA Health and Safety Code §114320].

COLORADO

State law prohibits use of tobacco on all public school property, including vehicles used by the school to transport people, nursery schools, day care centers, child care facilities, head start programs, and kindergarten, and elementary and secondary schools. Law allows local Boards of Education to exempt areas from ban "upon the board's determination that extraordinary circumstances exist which warrant the granting of such exemption." [CO Rev. Stat. §25-14-103.5 (1996)]. State law prohibits smoking in state legislative buildings, but authorizes the Legislative Council to establish a smoking policy, which may include designated smoking areas, for office space within legislative buildings. [CO Rev. Stat. §25-14-103-7(2) (1996)]. State law prohibits smoking in public elevators; museums; galleries; libraries; waiting and meeting rooms executive or judicial branches of state or local government buildings, except in designated smoking areas; public transportation vehicles, except in designated smoking areas, except in "extraordinary circumstances"; and schools. Smoking is prohibited in auditoriums and theaters, including enclosed sports arenas, except that smoking areas may be designated in lobbies. Restaurants, taverns, offices, and commercial establishments are encouraged to provide nonsmoking areas. "Every effort shall be made to provide a separate area for nonsmokers in employee lounges and cafeterias." Proprietors of other public places may post areas as nonsmoking. [CO Rev. Stat. §25-14-103, §25-14-104 (1996)]. State law prohibits smoking in hospital elevators and corridors and in areas containing flammable materials. Hospitals are required to (1) allow patients, prior to elective admission, to request a no-smoking patient room and accommodate such requests when possible; (2) prohibit employees from smoking in patient rooms; and (3) require visitors to obtain express approval from all patients in a patient room prior to smoking. [CO. Rev. Stat. §25-14-103(1)(b) (1996)]. Hospitals are authorized to ban smoking altogether, or may post specific areas as non-smoking. State law authorizes localities to regulate smoking if consistent with state statutes. [CO Rev. Stat. §25-14-105 (1996)]

CONNECTICUT

State law requires public and private sector employers to designate one or more work areas as nonsmoking; such areas must be sufficient to accommodate nonsmokers who wish to utilize such an area. Employers may ban smoking throughout the facility. Where smoking is allowed, "existing physical barriers and ventilation systems shall be used to the extent practicable to minimize the effect of smoking in adjacent nonsmoking areas." Commissioner of Labor may grant exemptions if employer makes good faith effort to comply and further efforts would constitute "an unreasonable financial burden on the employer." No penalty provisions specified for workplace restrictions. (Conn. Gen. Stat. §31-40q (1994)) State law defines "smoking area" as a "separately designated room" that does not need to be entered to conduct business, that does not deprive employees or members of the public of a nonsmoking lounge or waiting area, and that is designated as a smoking area. Permits smoking only in "smoking areas" in (1) publicly-owned, -leased, or -operated buildings; (2) health care institutions provided the smoking area is not the only waiting area, and provided notice is posted at entrances that smoking is prohibited by state law. Prohibits smoking in public areas of retail food stores and in passenger elevators. State law prohibits passengers and operators from smoking while on public buses, passenger trains and school buses, except for "any special bus or...any compartment or part of a regular bus or passenger railroad car especially provided or set apart for smoking therein." Violations is an infraction punishable by a fine. [Conn. Gen. Stat. §53-198 (1994)]. State law prohibits smoking "in any public area of a restaurant having a seating capacity of seventy-five or more person, unless a sign is posted which indicates that smoking is permitted in such area[.]" State law further provides that: (1) restaurants with a seating capacity of 75 or more may not be designated as smoking areas in their entirety; (2) "smoking may be prohibited in rooms used for private social functions" and 93) a sign must be posted at the entrance of the restaurant indicating the availability of nonsmoking areas. [Conn. Gen. Stat. §1-21b (1994)] Smoking in violation of section 1-21b, failing to post signs, or removing signs without authorization, is an infraction punishable by a fine. Section 1-21b does not apply to correctional facilities; dormitory rooms in any public institution of higher education; psychiatric facilities; public housing projects; and classrooms where demonstration smoking is part of a medical or scientific experiment or lesson. State law requires the person in control of an area in which smoking is prohibited to post in a conspicuous place signs stating that smoking is prohibited by state law. Signs must have letters at least 4 inches high "with the principal strokes of letters not less than one-half inch wide," except for signs in elevators, restaurants and health care institutions. State law provides that "[n]othing in section [1-21b] shall be construed to require any smoking area in any building." Section 1-21b supersedes and preempts local law and ordinances relative to smoking. Violation by smoker or failure to post nonsmoking areas is subject to fine up to \$5; restaurants in violation have three demerit points deducted from inspection ratings.

CONNECTICUT, cont'd

The owner or the person in charge of building is authorized to prohibit smoking throughout the building or in any part over which he has control. [D.C. Code Ann. §6-913.2]. Requires the posting of signs where smoking is prohibited. Smoking areas can be designated if entirely enclosed, under negative pressure, and exhausted directly outdoors. Other regulation by Dept. of Transportation prohibits smoking in main terminal of Baltimore-Washington International Airport, except in bars, cocktail lounges, airline or airport clubs, and other tenant areas not accessible to the public. Nursing homes, health clinics, and physicians' offices must regulate smoking to protect health of non-smokers. State law prohibits smoking in hospitals. Mental hospitals and long-term care facilities and acute care hospitals are exempted. Smoking is prohibited in public areas of retail stores with 20 or more full-time employees. Smoking must be restricted to designated areas in retail food stores; violators are subject to fine up to \$100. Smoking is prohibited in child day care centers and their grounds; group day care homes during hours of operation; and in family day care homes during hours of operation. Public conveyances with seating for fewer than ten persons may be designated entirely as a smoking area if all occupants consent. Regulations also restrict smoking to designated areas in hotels, motels and resorts, except in sleeping rooms. Violation by smoker is a petty misdemeanor; repeated violations by proprietor subject to injunction. Law prohibits smoking in hotel sleeping rooms designated as nonsmoking. No employer shall take adverse action against an employee, or refuse to hire an individual, because that person does not or does not use tobacco products.

Bars are exempt. Persons smoking in nonsmoking areas of restaurants are subject to a fine of \$25; restaurant owners and managers who fail to comply are subject to a fine of \$25.

Gambling, racing, and other sporting events facilities, bowling alleys, dance halls, roller skating rinks, and other facilities for "ambulatory recreation" are exempt. A violation of the ban on smoking in public conveyances is a petty disorder. It is a petty disorder punishable by a fine of up to \$200 to smoke in public places where such prohibition has been posted by the owner or person responsible.

Every public or private educational institution, except the board of education of a school district, shall regulate tobacco smoking on their premises, and shall prohibit smoking in classrooms, lecture halls, and auditoriums except as part of the instruction. Persons who smoke on prohibited areas of educational institutions are subject to a fine of \$100; persons controlling educational institutions who fail to comply are subject to fines of up to \$25 for the first offense, \$100 for the second offense, and \$200 for the third offense.

Smoking is prohibited in the waiting rooms of doctors offices (excluding specialists in psychotherapy, dentistry, or chiropractic medicine) unless there is more than one waiting room, in which case one may be smoking. Commissioner of the Dept. of Health is authorized to adopt rules on smoking in health care facilities, except for: private rooms or rooms where all patients agree; in one of several waiting rooms, or in the only waiting room if the person in control determines that there is an adequate section for nonsmokers; in dining areas with a capacity for 50 or more persons, if the person in control determines that there is an adequate section for nonsmokers; or in totally enclosed offices used only by employees. Persons who smoke in health care facilities or offices who fail to comply are subject to a fine of up to \$25 for the first offense, \$100 for the second offense, and \$200 for the third offense.

NEW MEXICO

State law restricts smoking at public places and public meetings and in enclosed indoor areas of buildings owned or leased by state or local government to designated areas. Smoking is allowed in fully enclosed offices occupied entirely by smokers; rooms used by groups for nongovernmental functions; and in areas required to be designated by person in charge of public places or by government employer. Employer is someone who employs 15 or more persons. Such designated areas may not exceed 50-percent of space. Smoking must be prohibited in such buildings in elevators, infirmaries, and at least one half capacity of employee lounges and cafeterias. [N.M. Stat. Ann. §24-16 (Michie 1996)]. Employers must adopt and maintain a written smoking policy. In areas where smokers and nonsmokers work in same room, smoke-free work areas must be provided for employees who request them. Conspicuously posted signs regarding the smoking status of public areas are required. Employer is not required to make "structural modifications"; implementing program and posting a sign is sufficient. [N.M. Stat. Ann. §24-16-1-11 (Michie 1996)].

Licensed gaming establishments may be designated entirely as smoking areas. Violation by smoker or proprietor is a misdemeanor, subject to criminal penalty. Local governments and agencies may not impose more stringent restrictions on smoking or use of tobacco than provided in state law. An additional penalty of \$100 is to be imposed, which may be collected by local health authority and credited to state account for health education for minors. [OR Rev. Stat. §92.710, 243.350, 441.815 (1995)].

PENNSYLVANIA

State law prohibits smoking in designated nonsmoking areas. Employers must implement policy on smoking in workplace, but collective bargaining rights are not affected. Restaurants must provide smoking and nonsmoking areas meeting needs of clientele. Persons in charge of other public places (buildings and public conveyances owned or operated by state or local government; other educational or health care facilities; and auditoriums, arenas, theaters, museums or concert halls) must implement policy on smoking. Exempts restaurants with seating for fewer than 75 persons, if policy is posted at entrances; private social functions; factories, warehouses, and similar places of work not frequented by public; bar areas in a licensed establishment; lobbies and hallways; hotel and motel rooms; and, retail tobacconist shops. Violation by smoker or person in charge is subject to fine up to \$50. [35 PA Cons. Violation by smoker is subject to fine of \$50 and court costs [55 Pa. Cons. Stat. §560.1 (1996)] Smoking is prohibited in hospital patient rooms and public areas. Violators are subject to a \$10 fine and the cost of prosecution. [35 Pa. Cons. Stat. §361 (1996)].

RHODE ISLAND

With respect to workplaces, state law requires employers to implement written policies which accommodate nonsmoking employees or prohibit smoking in areas "where nonsmoking employees may reasonably be expected to be adversely affected by passive cigarette smoke." [R.I. Gen. Laws §23-20.7-5 (1995)] Violation by employer is subject to fine of \$50 to \$500 per day. [Id. §23-20.7-7] These workplace restrictions do not apply to private homes which may serve as a workplace, office spaces rented by a sole independent contractor, and private enclosed workplaces occupied exclusively by smokers (except where prohibited by local ordinance). [Id. §23-20.7-6] With respect to public places, restaurants with seating for 50 or more persons are required to have separate seating for nonsmokers and smokers, and must ask patrons for preferences before seating. [Id. §23-20.6-2] Smoking is limited to designated areas in the state house; in elevators; indoor movie theaters; libraries; art galleries; museums; auditoriums; concert halls; buses; colleges, including dormitories; hallways of elderly housing complexes; public hallways in court buildings; supermarkets; medical offices; hospitals; and primary, secondary or postsecondary school buildings. [Id.] Violation is subject to fine of \$50 to \$500. Smoking also is restricted in nursing homes, except for residents who may smoke in rooms designated by administration as smoking, in private rooms, or in semi-private rooms when both residents smoke. The smoking rooms must be "ventilated in such a way that the air there shall not enter other parts of the nursing home." [Id. §23-17.5-26] Signs prohibiting smoking also must be prominently displayed at tents used as a place of assembly. [Id. §23-28.19-11] Similar signs must be posted in horse stables. [Id. §23-28.31-2] Finally, the Town of East Greenwich has prohibited smoking in all municipal buildings. [Id. §45-2-42]

SOUTH CAROLINA

South Carolina law provides that it is unlawful to smoke in certain public indoor areas, except where a smoking area has been designated. Regulated spaces include: (1) public schools and preschools, (excluding private offices and teacher lounges which are not adjacent to classrooms or libraries; this exclusion does not apply, however, if a local school board decides otherwise; schools also may be declared smoke-free by local officials); (2) other indoor facilities providing children's services, as specified; (3) health care facilities, except where smoking areas are designated in employee break rooms (however, nothing prohibits a health care facility from being smoke-free); (4) government buildings, except that smoking may be allowed in enclosed private offices and designated break areas; (5) elevators; (6) public transportation vehicles, except taxicabs; and (7) arenas and auditoriums of public theaters or performing art centers (however, smoking areas may be designated in foyers, lobbies or other common areas). [SC Code Ann. §44-95-20 (1996) (as amended by 1996 S.C. Acts 445 §1, effective June 18, 1996)] Smoking is also prohibited on school buses. [Id. §59-67-150]

SOUTH DAKOTA

State law restricts smoking or the carrying of any lighted tobacco product to areas that may be designated in hospitals, medical clinics, dental clinics, nursing facilities, public libraries, public museums, public indoor theaters, public concert halls, elementary or secondary school buildings, public conveyances, jury rooms, and elevators. This also applies to registered or unregistered day care programs, day care centers, day care cooperatives, or family day care homes during time children who are not family members are receiving care. Violation is a petty offense. State ADAMHA law establishes the state legislature as exclusive regulator of all matters relating to the distribution, marketing, promotion, and sale of tobacco products; state law provides that the state legislature is the exclusive regulator of all matters relating to the use of tobacco products, provided, however, that nothing prohibits a person or a public entity from voluntarily regulating the use of tobacco products on the person or entity's property. [SD Codified Laws §22-36-2, 34-46-6, 10-50-64 (1996)].

TENNESSEE

Smoking is not permitted in: (1) Child day care centers (i.e., facilities serving 13 or more children for less than 24 hours per day); provided, however, that this restriction does not apply to private homes. Adult staff may smoke in designated areas where children are denied access; if smoking area is indoors, written notification must be provided upon enrollment. (2) Any room or area in a community center while the space is being used for children's activities. (3) Group care homes (i.e., facilities receiving 7 or more children for full-time care); provided, however, that adults smoke in fully enclosed adult residential quarters, but not in the presence of children. (4) Health care facilities, excluding nursing home facilities; provided, however, that adult staff may smoke in designated areas to which children are denied access and outside. (5) Museums (except when used for private functions after-hours when children are not in attendance); provided, however, that adult staff may smoke in designated areas to which children are denied access. (6) All public and private kindergarten, elementary, and secondary schools; provided, however, that adult staff may smoke outdoors, but not within 50 feet of an entrance. Adults also may smoke in any fully enclosed residential quarters, but not in the presence of children. (7) Residential treatment facilities for children and youth; provided, however, that adult staff may smoke in designated areas to which children are denied access. (8) Zoos. (9) Youth Development Centers (10) School grounds; provided, however, that after regular hours, adults may smoke on surrounding property, but not blocking any entrance to any building (such property shall not include any public seating areas, including but not limited to, bleachers or public restrooms). [TN Code Ann. §9-17-1604 (1996)]. State law allows government agencies and public institutions of higher education to establish smoking policies; each policy must protect the rights of smokers and non-smokers, and provide at least one indoor smoking area. [TN Code Ann. §4-4-121 (1996)]. State law occupies and preempts the entire field of legislation concerning the regulation of tobacco products; however, certain local governments, airport authorities, utility districts and special school districts retain residual authority to regulate their facilities. Individual owners and operators of retail establishments in enclosed shopping malls also may establish tobacco use policies [TN Code Ann. §39-17-1551 (1996)].

TEXAS

State restricts smoking to areas that may be designated in public primary or secondary schools, elevators, enclosed theaters and movie houses, libraries, museums, hospitals, transit system buses, intrastate buses, planes or trains which are public places. Violations are a Class C misdemeanor, but it is a defense that an area did not have a "no smoking" notice prominently displayed (a reasonably sized notice that smoking is prohibited by law and that an offense is punishable by a fine not to exceed \$500). It is also a defense if the area is not equipped with facilities for extinguishment of smoking materials. [TX Penal Code Ann. §48.01 (West 1997)]. Each school district also must: (1) prohibit smoking or the use of tobacco products at a school-related or school sanctioned activity on or off school property; (2) prohibit students from possessing tobacco products at a school-related or school-sanctioned activity on or off school property; and (3) ensure that such policies are enforced. [TX Educ. Code Ann. §38.006 (West 1997)].

UTAH

Unless otherwise excepted, smoking in all enclosed indoor "places of public access" and publicly owned buildings and offices is forbidden. "Places of public access" means any enclosed indoor place of business, commerce, banking, financial service, or other service-related activity (including both public and private, and profit and non-profit) to which persons not employed at the place have "general and regular access" or "which the public uses, including: (1) offices and elevators; (2) means of transportation; (3) restaurants; (4) taverns; (5) malls; (6) libraries and concert halls; (7) barber shops; (8) sports or fitness facilities; (9) common areas of resorts, hotels, and motels; (10) certain childcare facilities; (11) certain schools; and (12) any area where the owner or manager has posted a conspicuous sign stating "no smoking". [UT Code Ann. §26-38-2 (1996)]. Exceptions to this prohibition include: (1) certain private clubs; (2) workplace smoking areas, if in existence pursuant to a workplace policy; (3) guest rooms in hotels and motels; (4) certain taverns; and (5) separate enclosed smoking areas of international airport passenger terminals, if specific requirements are met. [UT Code Ann. §26-38-3.5 (1996)]. Grandfather provisions apply to specific adjoining private clubs and public places which were in operation on January 1, 1995. [UT Code Ann. §26-38-4 (1996)]. This detailed regulatory regime "supersedes any ordinance enacted by the governing body of a political subdivision that restricts smoking and that is not essentially identical..." [UT Code Ann. §26-38-6 (1996)]. Another law prohibits smoking on buses, except chartered buses. [UT Code Ann. §76-10-1506 (1996)].

VIRGINIA

State law requires state and local government buildings to provide reasonable nonsmoking areas; non-public areas of Department of Corrections buildings are exempt. [Va. Code Ann. §15.1-291.2.A (Michie 1996)] Restaurants with seating capacity of 50 or more persons, excluding bar seating and private rooms, must have nonsmoking areas sufficient to meet customer demand. [Id. §15.1-291.2.c] Smoking is prohibited in elevators, except for open freight elevators not used by public; in public school buses; hospital emergency rooms; local and district health departments; polling rooms; indoor service and cashier lines; and in restrooms of state-owned or leased buildings as well as public restrooms in healthcare facilities. [Id. §15.1-291.2.B] Smoking is also prohibited in the interior areas of public elementary, intermediate and secondary schools, except for designated smoking areas in non-common areas to be used after regular school hours as long as all student activities have concluded. [Id.] Smoking is prohibited in the interior of a licensed child day care center that is not also used for residential purposes; "however, this prohibition shall not apply to any area of a building not utilized by a child day center, unless otherwise prohibited." [Id.] Reasonable nonsmoking areas must be designated in certain educational facilities; health care facilities; retail establishments with 15,000 square feet or more serving the public; and recreational facilities. [Id. §15.1-291.2(D)] Failure by proprietor to post appropriate signs is subject to fine of not more than \$25; a summons may be issued by any law enforcement officer. [Id. §§15.1-291.2.E and G] Retail tobacco stores, tobacco warehouses and tobacco manufacturing facilities are exempt. [Id. §15.1-291.2.H] Designated smoking areas must be separate to the extent reasonably practicable from those areas entered by the public in normal course of using that particular business or institution. [Id. §15.1-291.3.2] Local ordinances adopted before January 1, 1990 may remain in effect; ordinances adopted after this date must prohibit smoking in elevators, common areas of certain schools, restaurant nonsmoking areas, indoor service lines and cashier areas, and school buses and public conveyances. [Id. §15.1-291.4 and 5] Such local ordinances provide for the designation of reasonable non-smoking areas in: public meeting places; places of entertainment and cultural facilities; indoor recreational facilities; restaurants with seating for 50 or more; other public places; certain retail and service establishments. [Id. § 15.1-291.6] Local ordinances may not regulate smoking in bars and lounges; retail tobacco stores; restaurants, conference or meeting rooms, and public and private assembly rooms while they are being used for private functions; office or work areas not entered by general public; common areas of shopping malls; and lobby areas of hotels and motels. [Id. §15.1-291.7] Local ordinances may provide that employers may regulate smoking in the private workplace if designation of smoking and nonsmoking areas is subject of written agreement, and smoking may be totally banned only by affirmative vote of majority of affected employees voting, unless a smoking ban is part of contract of employment. [Id. §15.1-291.8]

VIRGINIA, cont'd

Local ordinances may not affect smoking policies previously established by employers. [Id.] Local ordinances may provide a civil penalty of not more than \$25. [Id. §15.1-291.10]

VERMONT

State law prohibits smoking in the common areas of all enclosed indoor public places of public access and in publicly-owned buildings and offices, except that restaurants, bars, cabarets, hotels and motels may choose to designate all or part of the public areas of the facilities as smoking areas until 7/1/95. After that date, only facilities with "cabaret" licenses may designate smoking areas. [Vt. Stat. Ann. tit. 18, §§1742, 1744 (1995)] "Cabarets" are business which are "devoted primarily to providing entertainment, dancing and the sale of alcoholic beverages to the public and not the service of food" where "the sale of food shall be less in amount or volume than the sales of alcoholic beverages and the receipts from entertainment and dancing." [Vt. Stat. Ann. tit. 7 § 2(5) (1995)] Municipal smoking ordinances may be more "protective of the rights of nonsmokers" than state law. [Vt. Stat. Ann. tit. 18, §1746 (1995)] The state law exempts: (1) certain social, fraternal or religious organizations; (2) designated workplace smoking areas; (3) areas not commonly open to the public of owner-operated businesses with no employees; and (4) other designated smoking areas under Section 1744. [Vt. Stat. Ann. tit. 18, §1743 (1995)] With respect to workplaces, state law requires employers to establish or negotiate through collective bargaining written policies on smoking; school boards are deemed "employers." [Vt. Stat. Ann. tit. 18, §1422 (1995)] Policy may prohibit smoking entirely or restrict it to designated areas. Smoking areas may be unenclosed only "if the layout of the workplace is such that smoking will not be a physical irritation to any nonsmoking employee in the workplace and three-fourths of the employees in the workplace agree." [Vt. Stat. Ann. tit. 18, §1423(a) (1995)] A copy of the smoking policy must be posted in a conspicuous location. [Vt. Stat. Ann. tit. 18 §1424 (1995)] Violation by employer is subject to fine of \$100. [Vt. Stat. Ann. tit. 18, §1426(c) (1995)] Municipal governments are authorized to adopt ordinances that are at least as stringent as state law. [Vt. Stat. Ann. tit. 18, §1428 (1995)]

WASHINGTON

Regulation prohibits smoking in indoor office workplaces effective 9/1/94. Prohibits smoking, except in designated enclosed smoking rooms that may be provided where nonsmokers are not required to enter. No smoking is allowed in such areas when cleaning or maintenance work is performed. Smoking rooms must be ventilated at a rate of at least 60 cfm; sufficient negative pressure must be maintained to prevent smoke migration to nonsmoking areas; and, separate mechanical exhaust system must exhaust air directly outdoors. Employers must also use engineering or administrative controls to minimize infiltration of smoke from sources outside the buildings. Rule does not preempt any federal, state or local regulations that are more stringent. [Department of Labor & Industries regulation adopted 3/15/94, effective 10/10/94.]

No person may smoke in a public place except in designated smoking areas. [Wash. Rev. Code §70.160.030 (1996)] Smoking areas may not be designated in: (1) elevators, certain buses, taxis, public areas of retail stores and similar areas; and (2) hallways of health care facilities, with the exception of nursing homes, and lobbies of concert halls, theaters, auditoriums, and similar areas. Except as otherwise provided, no public place--other than a bar, tavern, bowling alley, tobacco shop, or restaurant--may be designated as a smoking area in its entirety. Managers of restaurants who choose to provide smoking areas must designate an adequate amount of seating to meet the demands of smokers. [Wash. Rev. Code §70.160.040 (1995)] Appropriate signs must be posted. [Wash. Rev. Code §70.160.050 (1995)] Violations are subject to a civil fine of up to \$100. [Wash. Rev. Code §70.160.070 (1995)]

WISCONSIN

State law restricts smoking in publicly or privately-owned offices; indoor movie theaters; passenger elevators; certain restaurants; retail establishments; public waiting rooms; and buildings owned or operated by state or local governments unless a fire marshal, law, ordinance or resolution prohibits smoking all together. Smoking is banned in motor buses and in physicians offices and hospitals, except for mental health and drug abuse facilities and in day care centers when children are present. Violation by smoker or person in charge is subject to fine up to \$10. [Wis. Stat. §101.123 (1995)] Use of tobacco products on premises owned, rented or controlled by the school board of a common or union high school district is prohibited, except that boards may allow such use on premises being rented to other persons for noneducational purposes. [Wis. Stat. §120.12 (1995)]

WEST VIRGINIA

Every authority operating any vehicle accessible to the public, designated for the ground transportation of eight or more person, must post "no smoking" signs. No person may smoke or carry a lighted pipe, cigar or cigarette in any such vehicle. These requirements do not apply to any vehicle operated in interstate commerce, not to any chartered vehicle. [W.Va. Code §8-27-10a (1996)] Violations are misdemeanors with fines of \$20-\$100. STATE CIGARETTE EXCISE TAXES**

States that earmark cigarette tax revenues to special programs may allocate revenues on cents-per-pack basis, by percentages, or by specific annual amounts. Some states take funds for enforcement of tax laws "off the top" of incoming revenues; amounts that are specified as less than 1% are not included here. Current state tax rates are given in cents-per-20-pack.

STATE PROFILE

OF

EMPLOYMENT DISCRIMINATION

51715 4566

ARIZONA

State law prohibits discrimination by state government employers against employees or other persons "on the basis of the use or nonuse of tobacco products." [1991. Chapter 284. Section 36-601.02.]

CONNECTICUT

State prohibits employers from requiring as a condition of employment that employee or prospective employee refrain from smoking or using tobacco products outside course of employment, or otherwise discriminating against an individual with respect to compensation, terms, conditions or privileges of employment for smoking or using tobacco products outside course of employment. Exempts nonprofit organization or corporation whose primary purpose is to discourage use of tobacco by the general public. Also exempts municipal hiring practices or collective bargaining agreements involving paid firefighters and paid police officers. [1991, Public Act No. 91-271. New Section.]

DELAWARE

Governor's Executive Order restricts smoking in state-owned or operated facilities but provides that executive branch employees may not be discriminated against as a result of smoking habits. [1989, Executive Order, Governor Michael N. Castle.]

LOUISIANA

State law prohibits discrimination with respect to discharge, compensation, promotion, any personnel action or other condition, or privilege of employment because an individual is a smoker or nonsmoker, so long as the employee complies with applicable law or any adopted workplace policy regulating smoking. Prohibits requiring, as a condition of employment that an individual abstain from smoking or using tobacco products outside course of employment. [R.S. 23:966. 1991, Act 762, effective 9/6/91.]

MAINE

State law prohibits employers from requiring as a condition of employment that an employee or prospective employee refrain from using tobacco products outside the course of employment, or otherwise discriminating with respect to compensation, terms, conditions or privileges of employment for using tobacco products outside the course of employment, so long as the employee complies with any workplace policy concerning use of tobacco. [1991, Chapter 366. Title 26, Section 597.]

NEW HAMPSHIRE

Effective 1/1/92, state law prohibits employers from requiring as a condition of employment that employees or applicants abstain from using tobacco products outside course of employment, so long as they comply with any workplace policy. [1991, Chapter 274. RSA 275:37-a.]

NEVADA

State law prohibits discrimination in hiring, discharge or conditions of employment because an individual "engages in the lawful use in this state of any product outside the premises of the employer during his nonworking hours, if that use does not adversely affect his ability to perform his job or the safety of other employees." [1991, Chapter 359. New section in Chapter 613 of NRS.]

State law requires designation of smoking areas in buildings or offices occupied by state or local governments or University of Nevada System (other than school district buildings) and in restaurants with seating for 50 or more persons. Although county boards of health are charged with enforcing state smoking laws, local governments may not impose more stringent restrictions on smoking of tobacco. [1989, Senate Bill 25; 1991, Chapter 248 and Chapter 259. NRS 202.249 and 202.2491.]

RHODE ISLAND

State law prohibits employers from requiring as a condition of employment that an employee or prospective employee refrain from smoking or using tobacco products outside course of employment, or otherwise discriminating against employee with respect to compensation, terms, conditions, or privileges of employment for smoking or using tobacco products outside course of employment. Exempts any non-profit organization which as one of its primary purposes or objectives discourages use of tobacco products by general public. [1990, House Bill 8768. Section 23-20.7.1-1.]
