

Thomas, Olivia, and the Super Magic Car

By Brooke Juhel

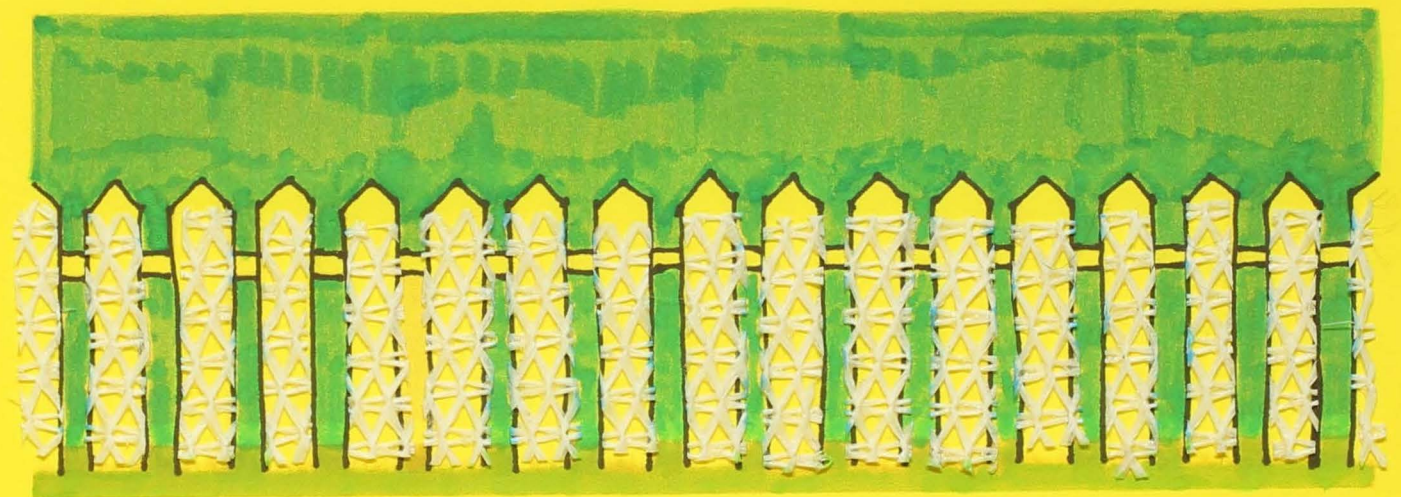

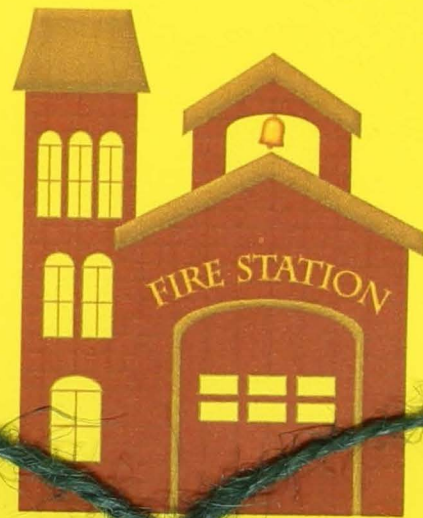

Thomas and Olivia are neighbors and best friends in a small town. Every day they walk to school together, except Thomas doesn't walk, he rides his **Super Magic Car**.

One day, Thomas and Olivia meet outside the fence by their houses earlier than usual. Olivia wants a car just like Thomas, so they go looking for one...

...They go past the supermarket, the fire station,
and into the toy store.

Follow the
Path...

The toy store has a car that looks like Thomas's Super Magic Car, but Olivia has to use her legs to move it around. She decides to take it anyways, so she can be just like her best friend. Thomas is so happy.

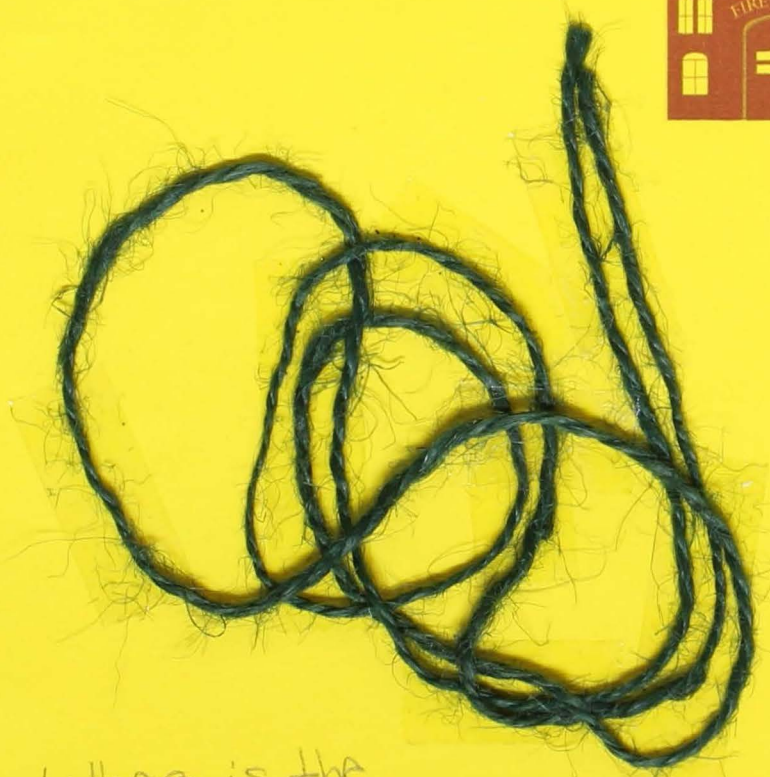

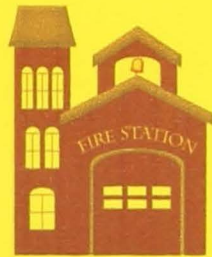

TOYS

TOY

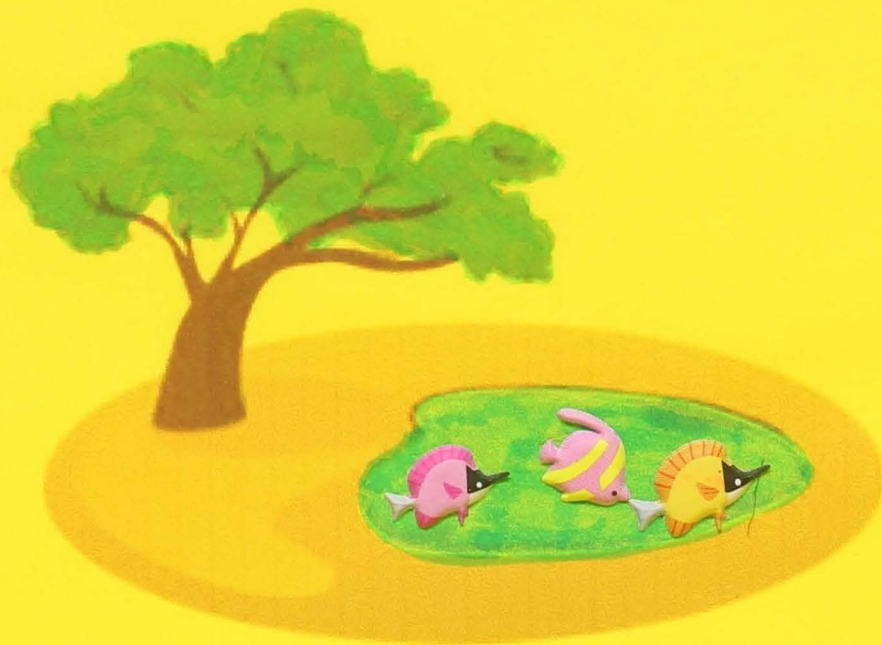

It is time to go back to school, but when they leave they don't recognize where they are. They'd never been there without their parents. Thomas and Olivia are lost!

Where is the path now?

But then Thomas's **Super Magic Car** turns around and drives Thomas back towards school, and Olivia follows. They see the big tree they pass every morning, the pond, and finally they are back at school!

The teacher asks Olivia to leave her car outside. Olivia understands because her car isn't magic like Thomas's car. She leaves hers on the playground to share with the other kids.

Thomas and Olivia are back in the classroom now, ready to learn, all thanks to Thomas's Super Magic Car!

THE END
